Mo., St. Louis—Dredge Pontoons—U. S. Engineers Office, War Dept., Wash., D. C., 12 steel dredge pontoons to Ruemmeli-Dawley Mfg. Co., 3900 Chouteau St., St. Louis, Mo., $35,880.

FEDERAL POWER COMMISSION

Applications for Licenses and Permits

Applications

462—H. V. Gates, The Dalles, Ore.—Wants license for small power plant on Crooked River, Jefferson Co.

463—D. P. Cooper, 217 Summer St., Buffalo, N. Y.—Wants preliminary permit to develop tidal power at Passamaquoddy Bay, and Head Harbor on Bay of Fundy in Maine and New Brunswick.

464—H. M. Thurman, Randsburg, Calif.—Wants license for small high head development in Birch Creek, Inyo Co.

465—H. M. Thurman, Randsburg, Calif.—Wants license for small high head development in Jail Canyon, Inyo Co.

466, 469, 472, 476, and 477 are constructed projects and are applying for license to operate, in compliance with Commissions rules and regulations.

467—Idaho Power Co., 7th and Bannock Sts., Boise, Idaho—Wants license for transmission line 8 mi. long in Baker and Malheur Counties, Ore.

468—J. A. Shafer, 1008 Odd Fellows Bldg., Indianapolis, Inc.—Wants preliminary permit for power project in Wabash River, Cass Co., near Logansport.

470—Pringle Falls Electric Power & Water Co., 500 Journal Bldg., Portland, Ore.—Wants preliminary permit for power project on West Fork of Deschutes River in Dechutes Co.

471—San Joaquin Light & Power Corp., 1801 Tulare St., Fresno, Calif.—Wants license for transmission line in Kern, San Luis, Obispo and Santa Barbara Counties, Calif.

473 — Kentucky Northern Power Co., Frankfort, Ky.—Wants preliminary permit for dam in Licking River, 3 mi. above Falmouth.

474—Southern Sierras Power Co., Riverside, Calif.—Wants license for transmission line about 17 mi. long, known as Cajon-Lime Products extension transmission line, in San Bernardino Co., Calif.

475—Hiawasse River Power Co., Murphy, N. C.—Wants preliminary permit for series of power dams in Hiawasse River in Cherokee and Clay Counties, N. C.

478—Great Falls Power Co., Butte, Mont.—Wants license to build 3.2 mi. transmission line in Cascade Co.

479—Montana Power Co., Butte, Mont.—Wants license for 12 mi. transmission line in Granite Co.

480—Southern Sierras Power Co., Riverside, Calif.—Wants license for 6.15 mi. transmission line near Victorville, San Bernardino Co.

481—Southern Sierras Power Co., Riverside, Calif.,—Wants license for transmission line in Riverside Co.

482—Gila Valley Power Dist., Wellton, Ariz.—Wants license for transmission line in Yuma Co.

483 — Nevada — California Power Co., Riverside, Calif.—Wants license to divert north fork of Rush Creek into Gem Lake Reservoir, Mono Co., Calif.

484—H. V. Gates, Terrebonne, Ore.—Wants preliminary permit for power project in Crooked River, Jefferson Co., irrigation and lighting for commercial purposes.

485 — Columbus Electric & Power Co., Columbus, Ga., Wants preliminary permit for power project on Chattahoochee River in Chambers and Lee Counties in Alabama and Harris Co. in Georgia.

487—Pennsylvania Power & Light Co., Allentown, Pa.—Wants license for dam and power house in Wallenpaupack Creek, Wayne and Pike Counties, near Hawley.

488—Thermalito Irrigation Dist., Oroville, Calif.—Wants license for 80 ft. dam in Concow Creek, Butte Co., near Oroville, diverting water through Coal Canyon plant of Pacific Gas & Electric Co.

489—City of Aberdeen, Wash. — Wants preliminary permit for 240 ft. dam across Wynoocke River and power house in Grays Harbor Co.

490—San Diego Consolidated Gas & Electric Co., 861 6th St., San Diego, Calif.—Wants license for transmission line between Escondidi and Rincon, 15.8 mi. long in San Diego Co.

492 — J. E. Walker, Mackay, Idaho — Wants preliminary permit for 10 ft. diversion dam and power house in Big Boulder Creek, Custer Co., near Mackay and Challis.

493—L. E. Foster, Buckhorn, Grant Co., New Mexico—Wants preliminary permit ror power project on Gila River, Hidalgo and Grant Counties, to develop 30,000 h.p.

494—Dell & Potter, Clifton, Ariz.—Wants preliminary permit for power project on Black River in Apache, Greenlee and Graham Counties.

Unclassified

PROPOSED WORK

Wharf—Plymouth, Mass.—Plymouth Relocation Com. plans wharf. To exceed $25,000. F. Eastwood, chn.

Transmission Line — New York — St. Lawrence Co. Utilities Inc., Ogdensburg, plans 8-9 mi. 3 phase high tension line, transmission line from Ogdensburg to Morristown. To exceed $25,000.

Development Play Grounds, etc.—Phila., Pa.—Dept. Welfare, Bureau Recreation, plans developing and improving as follows: Mill Creek Play Ground, 47th and Ashland Sts., $14,000; Hancock Sq. Play Ground, Mascher, Hancock, Master and Jefferson Sts., $7,000; East Germantown Playground, Chelton Ave. and Anderson St. $17,538; plot at American, Phillips, Reed and Earp Sts., $21,000; plot at Richmond, Buchius, Ash and Bath Sts., $15,000; Roxborough Playground Pennsdale and Mitchell Sts., $39,200; Belmont Playground, 21st and Chew Sts., $16,300; Pennse Memorial Playground, Susquehanna and 12th Sts., $29,800; Francisville Recreation Center, Francis and Shirley Sts., $42,000; Weccacoe Playground, Catherine St., $13,500; plot C. D. Ontario and Wesmoreland Sts. $1,000; equipping and constructing pool Whitehall Commons Playground, Torresdale and Wakeling Sts., $40,000. Private plans.

Park, etc. — Melbourne, Fla. — Election June 9, $35,000 bonds, park, incl. fill and hydraulic dredging.

Fire Walls—New Orleans, La.—Bd. Port Comrs., 200 New Court Bldg., plans 4 new fire walls, two at 1st and Robin St. sheds, and two in lower end of city below Canal St.

Stadium — Wooster, O. — College of Wooster having plans prepared rein.-con. stadium, 5,000 seating capacity. $25,000. Osborn Eng. Co., 7016 Euclid Ave., Cleveland, engrs. Noted Jan. 10.

Stadium—Madison, Wis.—University of Wisconsin having plans prepared by A. Peabody, State Capitol, one 25 x 62 ft., one 50 x 62 ft., and one 22 x 450 ft., concrete additions to athletic stadium at Camp Randall. $50,000. Noted Apr. 24.

Grand Stands—St. Louis, Mo.—Dodier Realty Investment Co., 2906 North Spring Ave., making preliminary plans baseball park stands, concrete and steel, 10,000-15,000 seating capacity. $100,000. Private plans.

Pipe Line—Texas—Magnolia Petroleum Co., Beaumont, making plans 210 mi. gas pipeline from Webster Parish, La., to here. $500,000. Private plans.

Gas Mains — Montreal, Que. — Montreal Light, Heat & Power Co., Craig St. W., plans 29,043 ft. 4 in. c.i. gas mains in 33 streets and avenues, $66,039, and 12,237 ft. 6 in. c.i. gas mains in 10 streets and avenues, $35,573, 4,955 ft. 8 in. c.i. pipe in 3 streets $16,803. E. S. Stanton, supt. gas distribution.

Power Development — Ontario — Ontario Hydro Comn. Ottawa, plans development on Ottawa River on sites between Ottawa and Pembroke Chats Falls, Du Ford Falls, Des Joachin Falls and Alumette Falls, to result in generation of 700,000 hp.

BIDS DESIRED

Subway — Cincinnati, O. — June 6, by Rapid Transit Comrs., City Hall, 5.3 mi. rapid transit line, incl. 1,600 ft. subway, 415,000 cu.yd. excav., 20,200 cu.yd. rein.-con., 910 tons reinforcing, 5,200 cu.yd. plain concrete, 235 ton structural steel, etc. $1,000,000. F. Krug, City Hall, engr. Noted May 15.

Street Lighting System—Calif., Hawthorne—See "Streets and Roads."

Seawall — California — See "Streets and Roads."

BIDS RECEIVED

Wharf & Transfer Shed—Corpus Christi, Tex.—Corpus Christi and Neuces Co. Navigation Dist. 1, wharf and transfer shed, from Sumner Sollit Co., Natl. Bank Commerce, San Antonio, $745,070. Noted Apr. 10.

CONTRACTS AWARDED

Coal Pocket—Everett, Mass.—New England Fuel & Transportation Co., 111 Devonshire St., Boston, trestle, bulkhead, etc., here, to Aberthaw Constr. Co., 27 School St., Boston. Engrs. est. $100,000.

Coal Handling Plant—Fall River, Mass.—A. J. Richards & Sons, Weymouth, new coal handling plant, to G. P. Carver, Inc., 261 Franklin St., Boston. Archts. est. to exceed $100,000.

Coal Handling Plant—Hartford, Conn.—Capitol Coal Co., new plant on property of New York, New Haven & Hartford R.R., to G. P. Carver Inc., 261 Franklin St., Boston. Archts. est. about $100,000.

Trolley Tunnel—Phila., Pa.—Fairmount Park Comn., City Hall, completion trolley tunnel in front Art Museum, to O'Neill Co., 127 East Mermaid Lane, $200,000. Noted May 8.

Retaining Wall—Wheeling, W. Va.—See "Streets and Roads."

Retards, etc.—Lexington, Mo.—State Hy. Dept., Jefferson City, 2,400 lin.ft. current retards along north bank Missouri River, above here, in connection with bridge over Missouri River, here, to Woods Constr. Co., Lincoln, Nebr., $140,400. Noted May 15.

Grain Elevator—Ft. Worth, Tex.—Kimbell Milling Co., South Main St., concrete addition to grain elevator, to Jones-Hettelsater Constr. Co., Mutual Bldg., Kansas City, Mo., $125,000. Noted Feb. 28.

Heating—Denver, Colo.—See "Buildings."

Gas Mains — Montreal, Que. — Montreal Light, Heat & Power Co., Craig St. W., will build 28,358 ft. 4, 6, 8, 12 and 16 in. c.i. gas mains in 29 streets and avenues, by day labor, $104,159. E. S. Stanton, supt. gas distribution. Noted May 15.

Tunnel—British Columbia—British Columbia Electric Ry. Co., 425 Carroll St., Vancouver, 3,561 ft. tunnel, 14 x 14 ft. diameter, from Alouette Lake to Stave Lake, to O. Olson, Maple Valley, Wash., $331,600. Noted Apr. 24.

Material and Equipment

PROPOSED WORK

Road Oil—Syracuse, N. Y.—Pub. Wks. and Park Comn., plan to purchase road oil. $33,000.

Road Oil—Watervliet, N. Y.—Common Council plans to purchase 20,000 gal. road oil.

Snow Removal Machinery—Racine, Wis.—Racine Co., plans to purchase snow removal machinery. W. Bechthold, hwy. comr.

Tractors, etc.—Minneapolis, Minn.—F. S.

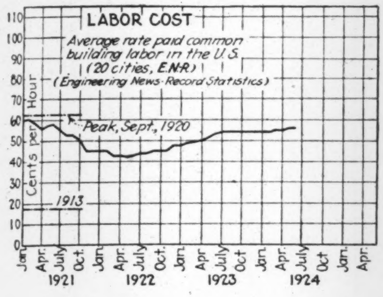
CONSTRUCTION NEWS

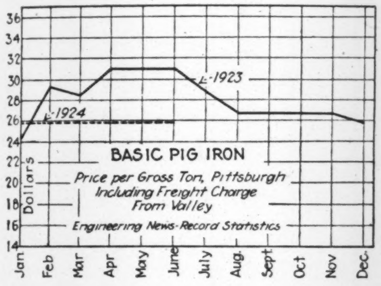
Engineering News-Record, June 5, 1924

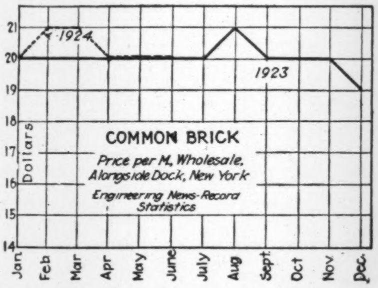
The Construction Barometer

Lower Cost Resulted in May Volume Twenty Per Cent Greater Than That for Preceding Month or Corresponding Period in 1923

CONSTRUCTION is apparently the only one of the principal industries not adversely affected by the present general slump in business. In every other direction there is falling off in demand and consequent curtailment of production. The price trend is downward in certain of the basic materials, as shown by the charts, while in others there is a tendency to remain suspended at present levels. It is evident, then, that lower cost has resulted in a volume of May construction at least 20 per cent greater than that for the preceding month or the corresponding period in 1923. Comparisons of *Engineering News-Record's* Construction Cost and Volume Index Numbers are shown on p. 997 of this issue.







Engineering News-Record Statistics

Minimum on water-works and excavations, $15,000; other public work, $25,000; industrial buildings, $40,000; commercial buildings, $150,000.

Tenn., Union City — June 18, by City Clerk, waterworks supplies, incl. air compressor, 55 lb. pressure, with 3 phase 220 volt motor, 1 domestic supply pump, 750 g.p.m. two boiler feed pump, 40 g.p.m., 1 fire service pump 1,500 g.p.m., 1 feed water heater of c.i. open type 3 superheaters for 208 hp. boilers and 3 rein.-con. settling tanks, 14 x 70 x 13 ft., 6 x 30 x 12 ft., and 10 x 50 x 12 ft. C. H. Jenks, Union City, engr. Noted Dec. 20.

Ky., Hazard—Taking bids 6,800 ft. 2- to 6-in. class B c.i. pipe, 40 fittings, 25 valves, 16 fire hydrants, 5,000 lb. lead, 200 lb. jute, etc.; 800 ft. 14 in. c.i. sewer pipe, 10 connections, 6,060 ft. 6- to 12-in. vitr. sewers, 30,000 brick, 30 manhole covers, 3 lamphole covers, 25 road box covers, etc. Shield Eng. Co., Hazard, engrs.

Ky., Morganfield—June 24, by W. Young, mayor and City Council, at office of A. F. Waller, city clk., river intake, pumping station, filter plant, pumping equipment and 6 mi. 8 in. c.i. or wood stave pipe line. Gannett, Seelye & Fleming, 236 Randolph Bldg., Memphis, Tenn., engrs.; adv. E. N.-R. June 6.

O., Akron—June 12, by M. P. Tucker, supt. Water Works, 2 m.g. coagulation basin, at water works plant. $100,000.

FILTER PLANT—PROVIDENCE, R. I.

Following are lowest three bids opened by Water Supply Bd., May 21, for filtration system, Contr. No. 30, (A) Winston & Co., 240 Fair St., Kingston, N. Y., (awarded contract); (B) Wilson & English Constr. Co., 50 Church St., New York City; (C) Whiting-Turner Constr. Co., 404 Stewart Bldg., Baltimore, Md. The unit bids were as follows:

	A	B	C
100 acres clearing	$60.00	$150.00	$168.00
20 acres grubbing	200.000	300.00	502.00
8,000 cu.yd. removal of soil	1.00	1.25	2.30
33,000 cu.yd. earth excavation for aqueduct and appurtenance west of station 93+25	1.00	1.50	1.10
20,000 cu.yd. earth excavation for South Basin Dam, south of Station 14+50	2.00	1.75	2.35
2,000 cu.yd. earth excavation in sheeted trench	2.50	7.00	6.20
80,000 cu.yd. earth excavation for all other purposes not included in items 4, 5 and 6	1.30	.90	1.38
15,000 cu.yd. rock excavation where blasting is permitted	3.00	4.00	4.73
1,000 cu.yd. rock excavation where blasting is not permitted	6.00	10.00	7.00
55,000 cu.yd. refilling and embanking of rolled soil	1.50	1.60	2.20
1,000 cu.yd. refilling and embanking compacted by pneumatic tampers	2.00	2.50	3.00
35,000 cu.yd refilling and embanking, other than soil, compacted by rolling	.80	1.00	1.04
215,000 cu.yd. refilling and embanking, other than soil, in dams	.70	.80	.76
30,000 cu.yd. miscellaneous refilling and embanking not included in items 10 to 13	.70	.70	.85
10,000 cu.yd. soil dressing	1.50	1.00	2.30
10,000 cu.yd. screened gravel and broken stone	2.50	2.50	3.65
20,000 cu.yd. riprap	2.00	1.50	3.60
200 cu.yd. stone paving	7.00	6.00	6.90
8,000 sq.yd. bituminous macadam surfacing	1.20	2.00	3.50
46,000 bbl. portland cement	3.00	3.30	3.47
5,500 cu.yd. concrete in filters and other structures composed principally of reinforced concrete	22.00	27.00	19.20
3,500 cu.yd. concrete in mixer, influent control chamber and in aqueduct east of filters	17.00	22.00	15.35
5,000 cu.yd. concrete in aqueduct west of influent control chamber and in settling basin structures	11.00	14.00	13.25
3,000 cu.yd. concrete in cut-off walls and blankets for foundations of dams	9.00	9.00	8.20
180 cu.yd. concrete in wash water gutters for filters, solution boxes etc.	47.00	40.00	62.00
12,000 cu.yd. concrete masonry not included under other items	12.00	16.00	16.10
68,000 sq.ft. mortar lining of steel pipe	.30	.25	.35
Cast iron pipe and special castings, mainly for areators (lump sum)	55,000.00	60,000.00	58,700.00
Cast iron pipe and special castings in filters and for coagulant pipes (lump sum)	60,000.00	69,000.00	60,300.00
Mortar lining of pipe furnished under item 29 (lump sum)	20,000.00	12,000.00	17,500.00
900,000 lb. steel for reinforcing concrete	.06	.06	.0514
1,300,000 lb. furnishing and laying 94-in. steel pipe and appurtenances for aqueduct	.07	.085	.08
850,000 lb. furnishing and laying 60-in. and 48-in. steel pipe and appurtenances	.075	.09	.09
310,000 lb. furnishing 60-in. steel pipe and appurtenances	.06	.07	.072
Lateral pipes in filters (lump sum)	20,000.00	19,000.00	21,670.00
250,000 lb. miscellaneous steel and iron	.10	.10	.11
300 ton caring for and setting valves, gates, meters and other metal work furnished by the City	60.00	30.00	34.50
1,300 cu.yd. brick masonry	33.00	45.00	46.50
Buildings, except garage, not including portions paid for under other items (lump sum)	34,000.00	150,000.00	44,100.00
Garage, not including portions paid for under other items (lump sum)	6000.00	17,000.00	6,400.00
Furnishing and installing heating system (lump sum)	17,000.00	6,000.00	20,100.00
Furnishing and installing plumbing (lump sum)	3,500.00	3,000.00	3,115.00
Furnishing and installing electric wiring (lump sum)	8,000.00	2,000.00	7,430.00
Furnishing and installing car elevator. (lump sum)	8,500.00	7,000.00	7,810.00
Furnishing and installing bucket elevator and conveyor (lump sum)	4,000.00	3,500.00	3,500.00
Furnishing and installing crane (lump sum)	3,000.00	2,500.00	2,100.00
500 lin.ft. 24-in. vitrified pipe	3.00	2.00	3.50
1,000 lin.ft. 12-in. vitrified pipe	1.00	1.50	1.40
500 lin.ft. 8-in. vitrified pipe	.50	1.00	.70
1,000 lin.ft. 4-in. agricultural tile	.35	.50	.35
3,000 lb. copper	.50	.25	.70
2,000 lin.ft. drilling holes in rock and masonry	1.00	1.00	1.44
1,000 cu.yd. grout	6.00	4.00	6.00
1,000 cu.yd. filter gravel	4.00	8.00	15.00
1,800 cu.yd. filter sand	12.00	12.50	16.30
2,000 lin.ft. stone walls	4.00	2.00	3.45
8 acres grassing	50.00	100.00	230.00
Cleaning up (lump sum)	1,000.00	4,000.00	2,000.00
Extended totals	$1,799,210	$2,118,450	$2,147,440

Mich.—Iron Mountain—June 9, by Bd. Water Comrs., 1 m. g. capacity rein.-con. equalizing reservoir flat slab roof type, 100 ft. square, 13 ft. average depth, 43,000 lb. reinforcing, etc. Hoad, Decker, Shoecraft & Drury, Ann Arbor, engrs.

Mich., Jackson—June 18, furnishing c.i. pipe, fittings, valves and lead, etc. J. E. Whittaker, city mgr.; adv. E. N.-R. June 5.

Ill., Quincy—June 18, by W. R. Gilston, city supt., and Mead & Seastone, engrs., Journal Bldg., Madison, Wis., Clearwater reservoir, rein.-con., 20 ft. diameter, 1 m.g. capacity. Noted Mar. 13.

Wis., Milwaukee—June 11, by Central Bd. Purchases, City Hall, furnishing one 48 in., two 54 in. and four 30 in. gate valves.

Mo., Hannibal—June 6, by Burns & McDonnell Eng. Co., engrs., 402 Interstate Bldg., Kansas City, 676 tons c.i. pipe and specials, switchboard, and 9 motor driven centrifugal pumps as follows: three 2,500 g.p.m. raw water, one 3,150 g.p.m. and one 4,200 g.p.m. filtered water, one 500 g.p.m. wash water and three 500 g.p.m. booster pumps.

Tex., Cisco—Taking bids concrete filter plant and standpipe, 40 x 75 ft. $50,000. Elrod Eng. Co., 3124 Elm St., Dallas, engrs. Noted Apr. 17.

Tex., Dallas—July 24, by City Comn., reservoir at Garza, also viaduct across reservoir for Denton-McKinney Rd. $5,000,000. E. A. Kingsley, city engr. J. C. Nagle and R. A. Thompson, Municipal Bldg., consult. engrs.

Tex., Houston—June 12, by H. L. Washburn, aud. Harris Co. Navigation Dist., Court House, 100,000 gal. water tank, tower, mains, etc., Ship Channel. $20,000. E. A. Tucker, Court House, engr.

Calif., Long Beach—Taking bids 70,000 ft. 30 in., 50,000 ft. 20 in., 32,000 ft. 8 in. and 70,000 ft. 6 in. water pipe. R. D. Van Alstine, city engr.

Calif., Mission Beach — City Trustees taking bids, 27,945 lin.ft. 6 in., 5,470 lin. ft. 10 in., 6,781 lin.ft. 12 in. cement concrete pipe, 865 lin.ft. 8 in. c.i. pipe, 40,186 lin.ft. trench and laying sewers from 4 to 12 ft. deep, 87 concrete manholes, 40 concrete drop manholes, 46 dead ends with cross, 6 flush tanks, 3 pumping stations, etc. F. A. Rhodes, San Diego, engr.

Calif., San Francisco—June 18, by Bd. Pub. Wks., flexible joint c.i. pipe for submarine portions Hetch Hetchy Aqueduct, Bay Crossing Division, Hetch Hetchy Project, for City and San Francisco Co. $200,000. M. M. O'Shaughnessy, city engr. Noted May 15.

Ont., Toronto—June 10, by W. W. Hiltz, mayor, City Hall, portable air compressor Tender 47, and 2 air pumps Tender 48, for waterworks. R. C. Harris, city engr.

Waterworks (Continued)

BIDS RECEIVED

N. Y., Brooklyn — N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Hegeman, Prospect, Flatland, Lott, Bedford, Riverdale, Sheffield Aves., etc., here, from G. V. Cornell, Rosebank, S. I., $11,664. Noted May 22.

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Skillman Ave., Buckley and Packard Sts., here, from S. Galiucci, 38 Railroad Ave., Corona. Noted May 22.

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Chauncey, Calamus and Clermont Sts., etc., here, from Kennedy & Smith Inc., 93 Amity St., Flushing, $6,999. Noted May 22.

N. Y., New York—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Arnow, Adee, Barnes and Paulding Sts., from Melrose Constr. Co., 230 East 162nd St., $5,600; Longfellow, Sheridan and Teller Aves., from Beaver Eng. & Contg. Co., 51 Chambers St., $9,910. Noted May 22.

Calif., Glendale — See "Streets and Roads."

Que., Montreal — Tunnel under Lachine Canal at Wellington St. to carry three 48 in. water conduits, from D. G. Loomis & Sons, St. Patrick St., $274,780. Noted Apr. 10.

CONTRACTS AWARDED

Mass., Brighton (Boston P. O.)—C. J. Garvin, Water Div., Pub. Wks. Dept., City Hall, Boston, laying and relaying mains in Cleveland Circle, Commonwealth Ave., Southerland and Colonial Rds., here, to De Christaforo Bros. Co., Glendover St., Roxbury, $16,913. Noted May 29.

Mass., Roxbury (Boston P. O.) — See "Sewers."

Street Lighting System—Corona, Calif.—Street lighting system, to H. M. Rouse, San Bernardino, approximately $37,450. Noted May 15.

Street Lighting System—Los Angeles, Calif.—Ornamental street lighting system, North Bway. between Pasadena and Lincoln Park Aves., to Newbery Electric Co., 724 South Olive St., $53,817.

Gas Mains — Montreal, Que. — Montreal Light, Heat & Power Co., Craig St. W., will build 29,043 ft. 4 in. c.i. gas mains in 33 streets and avenues $66,039, 12,237 ft. 6 in. c.i. gas mains in 10 streets and avenues $35,573, and 4,955 ft. 8 in. c.i. gas mains in 3 streets $16,803, by day labor. E. S. Stanton, supt. gas distribution. Noted May 29.

Grain Elevators, etc.—Vernon, Calif.—Globe Grain & Milling Co., 907 East 3rd St., Los Angeles, 21 elevators, 21 ft. high and warehouse, all rein.-con., here, to R. Hess, 51st and Alameda Sts., Vernon, $100,000.

Power Development — Island Falls via Cochrane, Ont.—See "Industrial Works."

Car Barns—Ottawa, Ont.—Ottawa Electric Ry. Co., Bank St., 1 story, 200 x 300 ft., brick and steel car barn, plain foundation, Elm St., to J. Sutherland, 510 Rideau St., about $200,000.

Material and Equipment

PROPOSED WORK

Cable—Minneapolis, Minn.—F. S. Gram, city purch. agt., rejected bids for 42,292 lin.ft. cable for electric signal system for Fire Dept. Will readvertise. Noted May 1 under "Unclassified."

BIDS DESIRED

Steel Castings, Cement etc.—New York, N. Y.—June 12, by J. Miller, pres. Manhattan Boro, Municipal Bldg., steel castings to Corporation Yards, 500,000 gal. asphaltic cement, and 8,000 cu.yd. ¾ in. binder stone.

Crane—Pittsburgh, Pa.—Amer. Sheet & Tin Plate Co., Frick Bldg., taking bids 50 ton crane, 10 ton auxiliary, 80 ft. span. M. S. Dennis, purch. agt.

Locomotive Cranes, etc.—Pittsburgh, Pa.—Koppers Co., Union Trust Bldg., taking bids locomotive cranes, shovels and buckets.

Road Oil—Louisville, Ky.—June 7, by Fiscal Court Jefferson Co., 350,000 gal. more or less medium coal tar road oil and 40,000 gal. cold patch oil. To exceed $25,000. M. Drane, Louisville Trust Bldg., co. surv.

Concrete Mixer—Milwaukee, Wis.—Wenzel & Henoch Co., 498 27th St., taking bids 1 bag concrete mixer.

Posts and Brackets—Milwaukee, Wis.—June 11, by Central Bd. Purchases, City Hall, 628 concrete posts and brackets for street lighting system.

Concrete sand, etc.—Minneapolis, Minn.—June 10, by F. S. Gram, city purch. agt., 3,600 cu.yd. concrete sand, 6,500 cu.yd. crushed rock or gravel.

Street Flushers and Sprinklers — New Ulm, Minn.—June 12, 1 to 2 motor street flushers and sprinklers with 1,000 gal. tank; 1 to 6 horse-drawn type sprinklers with 600 gal. steel tank. W. P. Backer, city clk.

Sand—Modesto, Calif.—Modesto Irrigation Dist., C. S. Abbott, secy., in market for 1,000 cu.yd. river sand.

Street Sweeper — Whittier, Calif. — City, P. Gilmore, clk., in market for motor street sweeper.

Cement—Montreal, Que.—L. O. Pion, De-Fleurient St., city purch. agt., in market for 4,600 tons cement for asphalt paving.

Road Oil—Montreal, Que.—June 10 by L. O. Pion, Purchasing Agent, 190,000 gal. road oil.

BIDS RECEIVED

Broken Stone — Brooklyn, N. Y. — E. Riegelmann, boro. pres., Boro. Hall, 4,000 cu.yd. broken stone, etc., from B. Turecamo Contg. Co., 8706 Bay 12th St., $15,618. Noted May 22.

OFFICIAL PROPOSALS

Bids: June 19.

Proposal for Building an Additional Water Supply

Lewisburg, Tenn.

Sealed proposals for furnishing material and constructing an additional water supply for the Town of Lewisburg, Tennessee, will be received by the City Commissioners at the City Hall until 3 o'clock P. M. Thursday, June 19th, 1924.

The work will consist of an impounding dam and pump house, a ten inch force main, a coagulating basin, two 500,000 gallons gravity filters and 150,000 gallons concrete clear well.

Each proposal must be accompanied by a certified check payable to the Town of Lewisburg, Tennessee, to an amount equal to five per cent (5%) of the bid, as a guarantee that the contract will be entered into if awarded. A bond of one hundred per cent (100%) of the contract price will be required. In addition to this bond, the statutory bond providing for the protection of laborers and materialmen, who deal direct with the contractor, will be required.

This bond will be for one-half of the contract price on all contracts of $2,000.00 or under; one half of the first $2,000.00 and thirty-five per cent (35%) for all over the amount on all contracts between $2,000.00 and $5,000.00; and one-half of the first $2,000.00, thirty-five per cent (35%) on the next three thousand ($3,000.00) and twenty-five per cent (25%) on the balance of all contract over $5,000.00. The condition of this bond being to pay for all the material and labor used in the fulfillment of the contract.

Contracts will be awarded to the lowest bidder. Payments will be made on monthly estimates.

Plans and specifications are on file in the office of the City Clerk at Lewisburg, Tennessee, and with Paul H. Norcross, Consulting Engineer, 1404 Candler Building, Atlanta, Ga.

Bidders may obtain copies from the Engineer by enclosing a certified check for Twenty-five ($25.00) Dollars, payable to the Town of Lewisburg, Tennessee. If blue prints are desired, they may be had at the cost of printing. If specifications and blue prints are returned within thirty days after opening bids, the check for $25.00 will be returned.

J. N. McCORD,
J. C. ADAMS,
S. K. WALKER,
City Commissioners.

PAUL H. NORCROSS,
Consulting Engineer,
1404 Candler Building,
Atlanta, Georgia.

Bids: June 17.

Street Paving

Shenandoah, Pa.

Bids will be received by the Borough of Shenandoah for repairing, sheet asphalt streets, with 1 inch binder and 2 inch wearing surface, approximately 800 square yards, bids to be per square yard to include all labor and material necessary.

All bids to be in the hands of the Chairman of Street Committee at 12 o'clock noon June 17, 1924.

The right is reserved to reject any or al bids.

T. R. EDWARDS,
Chairman of Street Committee,
111 N. Jardin St., Shenandoah, Pa.

OFFICIAL PROPOSALS

Bids: June 18.

Completion of Anchorages

DELAWARE RIVER BRIDGE
CONTRACT 15

Philadelphia, Pa.

Sealed proposals will be received by the Delaware River Bridge Joint Commission at Room 806 Widener Building, Philadelphia, Pa., until 1:30 o'clock p.m. Eastern Standard Time, June 18, 1924 when they will be publicly opened and read, for the completion of the anchorages of the bridge over the Delaware River between the City of Philadelphia, Pa., and the City of Camden, New Jersey.

The work will include the construction to solid rock foundation of eight cylindrical piers to support the masonry towers of the anchorages, the construction of concrete masonry, granite facing, steel roadway supports and interior finish and equipment in both anchorages. Concrete masonry forming the first section or core of each anchorage has been constructed under previous contracts. The contract time for the entire work is twenty three months.

A lump sum bid is asked for the entire work together with unit prices to cover additions or deductions in certain items from the quantities shown on the drawings.

Copies of the Contract and Contract drawings may be obtained at the office of the Joint Commission upon deposit of twenty-five dollars, which deposit will be returned upon receipt of bid or the return in good condition of the contract books.

Each proposal must be accompanied by a certified check for the sum of One Hundred Thousand Dollars ($100,000.) payable to the Delaware River Bridge Joint Commission and the Surety's consent must be shown. The bidder or bidders to whom the contracts are awarded will be required to give bond, in the sum of 50 per cent of the amount of the contract.

The right is reserved to reject any or all bids.

GIFFORD PINCHOT,
Chairman.
JOSEPH K. COSTELLO,
Secretary.
DELAWARE RIVER BRIDGE JOINT COMMISSION

Bids: June 16 and 17.

State Highway Work

Harrisburg, Pa.

Pennsylvania Department of Highways, Harrisburg, Pa. Bids will be received June 16, 1924, for the construction of sixteen projects, totaling forty-four miles; also June 17, 1924, for the construction of fifteen projects totaling fifty-four miles, construction to be either bituminous surface on a concrete base or reinforced concrete. Projects situated in the following counties:

Allegheny, Beaver, Berks, Bradford, Bucks, Carbon, Chester, Clarion, Clearfield, Columbia, Elk, Fayette, Forest, Jefferson, Lebanon, Lehigh, Luzerne, Lycoming, Monroe, Montgomery, Schuylkill, Somerset, Tioga, Warren, Washington.

Also for the construction of reinforced concrete bridge situated in Adams County. Full particulars upon application to Paul D. Wright, Secretary of Highways, Harrisburg, Pennsylvania.

OFFICIAL PROPOSALS

Bids: June 11.

Excavating Channel

Albany, N. Y.

Sealed proposals for excavating a channel in the Shinnecock-Peconic Canal and Peconic Bay, County of Suffolk, Long Island, N. Y., will be received by the Salt Water Bays Commission, at the office of the State Engineer, Telephone Building, Albany, N. Y., until 12 o'clock noon, Wednesday, June 11, 1924, when they will be publicly opened and read. Proposals shall be endorsed on the envelope "Proposals for excavating channel in Long Island Bays," and addressed to the Salt Water Bays Commission, care of State Engineer, Telephone Building, Albany, N. Y., and shall be accompanied by a deposit consisting of a certified check drawn upon some legally incorporated bank in this State and made payable at sight to the Salt Water Bays Commission, or money, equal to five per cent (5%) of the amount of the proposal. The contractors to whom the award is made will be required to furnish, for the faithful performance of the contract, a surety company bond in the sum of fifty per cent (50%) and an additional bond, known as the labor bond, in the sum of ten per cent (10%) of the amount of the contract, within ten (10) days after official notice of award of contract. The right is reserved to reject any and all bids. Specifications and estimates may be obtained, and plans may be examined at the office of the State Engineer, Albany, N. Y., and Pier 6, East River, New York City. Blueprint of plans, which consist of one sheet, will be furnished by the State Engineer upon payment of fifteen cents (15c.). Refund will not be made for any blueprints which may be returned.

SALT WATER BAYS COMMISSION
By DWIGHT B. LA DU,
Chairman.

Dated May 22, 1924.

Bids: June 17.

Gate-Valves and Hydrants

CONTRACT 217

New York, N. Y.

Sealed bids will be received by the Board of Water Supply, at its offices, twenty-second floor, Municipal Building, Park Row, Centre and Chambers streets, New York City, until 10 a.m., Eastern Standard time, on Tuesday, June 17, 1924, for Contract 217, for furnishing and delivering gate-valves and hydrants for the Williamsburg conduit of the Catskill aqueduct, all as set forth in the specifications. All deliveries shall be made, with all transportation charges prepaid, at the designated storage yard within the limits of the City of New York.

At the above place and time the bids will be publicly opened and read. Pamphlets containing information for bidders, forms of bid and contract, specifications, contract drawings, etc., can be obtained at the office of the Secretary at the above address, by depositing the sum of ten dollars ($10) in cash or its equivalent for each pamphlet. For further particulars apply to the office of the Chief Engineer at the above address.

GEORGE J. GILLESPIE,
President.
JAMES P. SINNOTT,
PHILIP F. DONOHUE,
Commissioners, Board of Water Supply.
BENJ. F. EINBIGLER, Secretary.

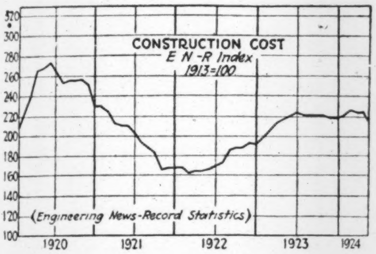
CONSTRUCTION NEWS

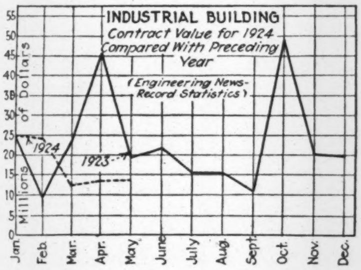
Engineering News-Record, June 12, 1924

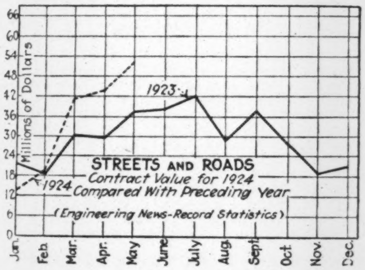
The Construction Barometer

Upward Trend in Construction Still Evident Both as to Money Value of Contracts Let and Number of Jobs Now Out for Bids—Production Slowing Down in Most Other Industries

WITH reports of recessions in trade and industry coming in from every direction, it is interesting to note that during the past week the total value of large contracts awarded showed a substantial increase over the week preceding. The number of large jobs now out for bids, on all classes of work, is also greater. The industries most affected by the depression, are: iron, steel, automotive, coal and textiles. The trend is upward, however, in contract letting on water-works, sewers, streets and roads, Federal Government work and both private and public buildings. Bridge contracts and lettings for excavations, drainage and irrigation projects have been on the wane during the past month.







Engineering News-Record Statistics

Minimum on water-works and excavations, $15,000; other public work, $25,000; industrial buildings, $40,000; commercial buildings, $150,000.

Waterworks

PROPOSED WORK

N. Y., Barneveld—Village Bd. plans new water supply system. $35,000.

N. Y., Victor—Will sell $50,000 bonds June 27, for reservoir, mains, pumps, motors, etc. M. Keating, village clk.; adv. E. N.-R. June 12.

N. Y., Saratoga Springs—Making plans gravity water supply, incl. earthen dam 150,000 cu.yd. excav., embankment, concrete corewall, filtration plant and 10 mi. c.i. pipe. J. P. Wells, Cutler Bldg., Rochester, engr. Noted May 8.

N. J., Pennington—Soon takes bids replacing 8 in. main in South Franklin and Eglantine Sts. $18,000. H. L.. Laning, town engr.

N. C., Edenton—Having plans prepared and soon lets contract extensions to water distribution and sewerage systems. $40,000. Drane & Smith, Charlotte, engrs.

La., Oak Grove—Voted $45,000 bonds for water works and electric light plant.

Tenn., Bristol—Voted $30,000 bonds for waterworks. T. J. Bunnon, city clk.

Ky., Clifton — Sold $15,000 bonds for waterworks extensions.

Ill., Sullivan—Making surveys additional water supply, wells, etc. Holbrook, Warren and Van Praag, Decatur, engrs.

Neb., Beatrice—Election soon to vote on $70,000 bonds for waterworks. Prince & Nixon Eng. Co., 501 Peters Trust Bldg., Omaha, engrs.

Mo., St. Louis—Soon takes bids approximately 12 mi. and 48 and 60 in. steel pressure conduit pipe and $200,000 for maintenance of hurdle dikes at new waterworks Howards Bend, Missouri River. $2,350,000. E. E. Wall, City Hall, city comr.

Tex., Claude—Voted $45,000 bonds complete waterworks. Noted May 15.

Tex., Collinsville—Election soon $20,000 bonds, complete waterworks. Engineer not announced.

Tex., Dallas—Making plans 9 projects for 12- to 16-in. main extensions and 1 artesian well in Oak Cliff. $250,000. E. A. Kingsley, city engr.

Tex., El Paso—Plans enclosed aqueduct to bring water from Elephant Butte dam, to here. E. D. Park, El Paso will submit plant before El Paso Real Estate Bd. about June 15. L. M. Lawson, mgr. of Rio Grande Irrigation Project in southern New Mexico, etc., is also assisting in formulating plans for same. $6,000,000.

Tex., Galveston—Election July 15, $100,000 bonds, storage reservoir. L. McCarthy, comr. finance and revenue.

Tex., Jayton — Making plans complete waterworks. $20,000. Montgomery & Ward, City Natl. Bank Bldg., Wichita Falls, engrs.

Tex., Midland—See "Sewers."

Waterworks (Continued)

Tex., Port Arthur—Attorney General approved $91,500 bonds new waterworks pumping system, etc., $119,500 bonds for main extension, larger mains, laterals both on old streets and new extensions, $69,500 bonds Shreveport Canal conduit. J. P. Logan, mayor.

Tex., Slaton — Voted $60,000 bonds waterworks improvements. H. C. McGee, city secy.

Tex., Whitney—Making plans complete waterworks. $15,000-$20,000. Municipal Eng. Co., Praetorian Bldg., Dallas, engrs.

Wash., Kelso—Voted $250,000 bonds improving water system, incl. filtration system, cost $28,000, 2 m.g. reservoir, installing distribution and other mains. Noted May 1.

Wash., Port Angeles—Election July 12, $625,000 bonds purchase, additions and improvements of plant owned by Northern Pacific Pub. Serv. Corp. $280,000 will be expended on purchasing plant, balance installing of water diverting system at Morse Creek, etc. Noted Nov. 8.

Calif., St. Helena — Plans to purchase one deep well 100 g.p.m. pump to operate against 300 ft.; 15 hp. electric motor; chlorinator plant; 800 ft. 4 in. O. D. casing and fittings. J. Mitchell, city engr.

Que., Shawinigan Falls—Takes bids in June, 1,600 ft. 16 ft. c.i. mains 6- to 12-in. diam. $31,000. J. H. Valiquet, city engr.

Que., Three Rivers—Takes bids in June, rein.-con., brick and steel filtration plant $213,000, water intake $30,000, new pumps $34,000, street connections $11,000, contingent $57,000, also laying 869 ft. 10 in., 6,050 ft. 8 in., and 2,470 ft. 6 in. c.i. mains $33,000, 3,100 ft. 24 in., 3,700 ft. 20 in., 1,610 ft. 18 in. and 220 ft. 12 in. c.i. mains in St. Maurice, St. Julie, Thomas, St. Honore, St. Marie and Niverville Sts. $118,000. C. Gelinas, city engr.

Ont., Saulte Ste. Marie—Plans 3,000 ft. 1.6 in. c.i. mains, etc. $25,000. W. M. Cornell, Water & Light Dept., engr.

BIDS DESIRED

N. Y., Long Island City—June 17, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Varian Pl., Bway., Elmhurst, Lewis, Skillman, Van Gelder, Foster, Continental, Herrick, Roman and Stafford Aves., Manley, Harrow, Ivy, 9th, Carolin, Fleet, Exeter, Ingram, Juno, Jessel and Loubet Sts., here.

N. Y., New York—June 17, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Bronx River Parkway, Gun Hill Rd., Cannon, Hennessy, Carroll and Loring Places, Bway., and grounds of Bellevue Hospital, Barnes, Kingsland, Monticello, Pitman, Paulding, Thierot, Andres, Liebig, Netherlands, Chittenden, 5th, 10th, Delafield, Newton and Sedgwick Aves., East 210th, East 213th, East 223rd, East 208th, West 261st, Murray, East 57th, West 143rd, Allen, Hudson, Reade, Wooster, East 8th, East 42nd, West 40th, Tiffany, East 166th, West 256th, West 260th and West 262nd Sts.

N. Y., St. George—June 17, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Gansvoort Blvd., Cunard Pl., Amelia Court, Arthur, Austin, Cedar, Carlton, Castleton, Hamilton, McFarland, Myrtle, Oakwood, Robinson, Scribner, South, Wilson and Winant Aves., Bishop, Clawson, Delmont, Elmer, Larkin, Nugent and 10th Sts., here.

Md., Baltimore—June 18, by Bd. Awards, trench excavation in eastern, western and southern districts, also 100,000 lead substitute for Water Dept. V. B. Siems, City Hall, water engr.

W. Va., Wheeling — See "Streets and Roads."

Minn., St. Paul — See "Materials and Equipment."

Ariz., Williams—June 24, by city, earth dam and improvements to waterworks. Burns & McDonnell Eng. Co., 415 Marsh-Strong Bldg., Los Angeles, Calif., consult. engrs. Noted May 8.

Tex., Ft. Worth — R. L. Rogers, 112½ West 9th St., taking bids c.i. pipe for main extensions in Berkley Pl. D. L. Lewis, city engr.

Tex., Kaufman—See "Excavation, Drainage, Irrigation."

BIDS RECEIVED

Mass., Waltham (Boston P. O.)—Metropolitan Dist. Comn., Water Div., 1 Ashburton Pl., Boston, about 15,400 ft. 60 in. steel pipe, 200 ft. 16 to 60-in. cast iron pipe and 200 yds. rock excav., from C. and R. Constr. Co., 3 Tremont Row, Boston. $563,230. Noted Apr. 24.

N. Y., New York—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., from Norton Eng. & Contrg. Co., 510 West 149th St., mains in Gildersleeve, Hudson, Ludlow, Olmstead, Pugsley and Waterbury Aves., Barrette, Bolton , Purdy, and East 172nd Sts., $11,300; White Plains Rd., Bryant, Fowler, Gleason, Leland, Noble and Wallace Aves., $8,300; from Melrose Constr. Co., 230 East 162nd St., Morris Lane, Balcom, Brinsmade, Butterick, Calhoun, Emerson, Graff, Harding, Hosmer, Huntington, Lawton, McDowell, Miles, Quincy and Robinson Aves., $12,828. Noted May 29.

Ill., Villa Park—Village, May 26, wells (a) 12 in. cased hold (b) 12 in. uncased (c) 10 in. cased (d) 10 in. uncased, from W .L. Thorne, Desplaines, (a) $11.50 (b) $8 (c) $11 (d) $5; steel tower and tank from Chicago Bridge & Iron Co., 608 South Dearborn St., Chicago, $10,640. Noted May 29.

Md., Baltimore—Trench excav. for Water Dept., from M. L. Quinn, 5308 York Rd., $23,570.

Wis., Kimberly—From Pastoret Constr. Co., Sellwood Bldg., Duluth, Minn., 4,368 ft. 12 in. c.i. pipe $1 per ft., 5,065 ft. 8 in. c.i. pipe $0.68 per ft., 10,799 ft. 6 in. c.i. pipe $0.59 per ft., manholes $65, valves $9, hydrants $10; Blake Constr. Co., 627 South River St., Appleton, $8,343; Wicks Eng. & Constr. Co., 418 Polk Bldg., Des Moines, Ia., water tank and tower, $8,900; Albert & Sons, Neenah, manhole covers, $6.25 each. Noted May 29.

Wis., Racine—F. McElroy, supt. Water Comn., June 2, coagulating basin, from Bondgard & Christensen, 1135 Mound Ave., $79,367; 2,000 ft. 24 in. and 2,100 ft. 30 in. pipe, from A. C. Jensen, 1311 West Blvd., $14,968; venturi meter, from Iron Fdry., 9 Codding St., Providence, R. I., $1400. Noted May 1.

Okla., Oklahoma City—Raising embankment around 2 sides of reservoir and riprapping slopes, from Maney Bros., Empire Bldg., $72,940. Engrs. est. $90,000. Noted May 8.

CONTRACTS AWARDED

N. Y., Brooklyn—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Hegeman, Prospect, Flatland, Lott, Bedford, Riverdale and Sheffield Aves., etc., to G. V. Cornell, Rosebank, S. I., $11,634. Noted June 5.

N. Y., Long Island City—N. J. Hayes, comr. Water Supply Gas & Electricity, Municipal Bldg., New York, mains in Skillman Ave., Buckley and Packard Sts., to S. Gallucci, 38 Railroad Ave., Corona; in Chauncey, Calamus, Clermont Sts., etc., to Kennedy & Smith Inc., 93 Amity St., Flushing, $6,999. Noted June 5.

N. Y., New York—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Arnow, Adee, Barnes and Paulding Sts., to Melrose Constr. Co., 230 East 162nd St., $5,600; in Longfellow, Sheridan and Teller Aves., to Beaver Eng. & Contg. Co., 51 Chambers St., $9,910. Noted June 5.

La., New Iberia—L. F. Villermin, city clk., 400 hp. Diesel oil engine, to McIntosh & Seymour, New Iberia, $56,050; electrical equipment, to Westinghouse Electric Mfg. Co., Maison Blanche Bldg., New Orleans, $16,426, pumps, to L. S. Vallely & Co., Whitney Annex, New Orleans, $7,275, general construction, to J. B. McCrary & Co., New Iberia, $56,000. Noted May 15.

Ky., Owensboro—Laying about 6,000 ft. mains, to E. M. Kerlin, Vincennes, Ind., about $20,000. Noted Mar. 31.

Minn., Minneapolis—For 152 tons castings for filtration plant, to Minneapolis Steel & Mchy. Co., 2854 Minnehaha Ave., $117.50 per ton. Noted May 29.

Minn., Rochester — For 2 motor driven pumps, to R. B. Whitacre & Co., 205 South Robert St., St. Paul, $5,000; 1 pump, to Commonwealth Electric Co., 417 Bway., St. Paul, $9,000. Noted Apr. 17.

Minn., Red Wing—Waterworks improvements, 1 m.g. rein.-con. reservoir, to H. E. Rhodes Constr. Co., Guthrie Center, Ia., $19,638; excav., to C. W. Johnson, Red Wing, $5,000; city will build pump house by day labor. Noted May 8.

Minn., St. Paul—See "Material and equipment."

Ark., Little Rock — National Guard of Arkansas, 50,000 gal. steel water tank on 75 ft. tower at Camp Pike, to Pittsburgh-Des Moines Co., Curry Bldg., Pittsburgh, Pa., $32,000; constructing rifle range, to G. E. Wycoff, Little Rock, $8,500. Noted Feb. 21.

Ont., Grimsby — T. Allan, clk. North Grimsby Twp., extending mains, 8,000 ft. 6 in. c.i. pipe, to Gartshore-Thompson Pipe & Fdry. Co., Hamilton, trenching, laying and jointing pipe, to Elmira Plumbing & Constr. Co., Elmira, specials, to Crane Ltd., Teraulay St., Toronto. Engrs. est. $30,000. Noted Mar. 27.

Ont., Toronto—To Grant Contg. OFFICIAL PROPOSALS

Bids: July 1.

Bridge

Norristown, Pa.

Sealed proposals will be received at the office of the County Controller, Court House, Norristown, Penna., on July 1, 1924, at 10 o'clock Standard Time and opened at 11 o'clock Standard Time for furnishing tools, machinery, labor and materials necessary for the construction complete of a reinforced concrete bridge over the Schuylkill River on DeKalb Street, between Norristown and Bridgeport, Montgomery County, Penna., in full accordance with plans and specifications on file in the office of the County Commissioners.

The bridge consists of seven spans 115 ft. each and a total width of 60 ft.

All proposals must be for the work complete in full accordance with plans and specifications and must be made on the form of proposal attached to and forming a part of the specifications.

Copies of the plans and specifications may be obtained in the office of the Consulting Engineer, J. B. Long, 59-61 Boyer Arcade, Norristown, Penna., on payment of five dollars per set.

Each bidder must accompany his proposal with a certified check for $15,000.00 made payable to the Commissioners of Montgomery County, Penna., as a guarantee of good faith and to protect the County from any loss by failure to comply with the terms of the proposal. This check shall be handed to the Chief Clerk to the County Commissioners at least one hour before the time set for opening the bids.

The right is reserved to reject any or all bids.

WM. C. IRVIN,
County Controller.

Bids: June 30.

Paving, Sewers, Water Pipe, etc.

Wheeling, W. Va.

Sealed proposals, for the furnishing of all labor and material necessary in the construction of the improvements, listed below, at Oakmont, Tenth Ward, City of Wheeling, will be received by the Board of Directors of the Oakmont Improvement Company at its offices, 703 National Bank Building, Wheeling, W. Va., until 12 o'clock noon, June 30, 1924.

16,850 Sq. yards 7" reinforced concrete pavement.
10,000 Linear feet integral concrete curb.
35,700 Sq. feet concrete sidewalk.
1,300 Linear feet 6" vitrified tile sewer.
3,400 Linear feet 8" vitrified tile sewer.
1,600 Linear feet 10" vitrified tile sewer.
730 Linear feet 12" vitrified tile sewer.
1,100 Linear feet 24" vitrified tile sewer.
480 Linear feet 30" vitrified tile sewer.
32 Sewer manholes.
29 Drop inlets.
7,000 Linear feet 6" cast iron water pipe.
6,820 Linear feet 4" wrought iron gas pipe.
610 Linear feet 6" wrought iron gas pipe.

Certified check, made payable to the Oakmont Improvement Company, for five (5%) per cent of the amount bid, must accompany each proposal.

Plans and specifications are on file at the office of the Company.

Plans and specifications will be furnished at the cost of blue printing. Bidding blanks will be furnished free of charge.

OAKMONT IMPROVEMENT COMPANY
C. H. DOWLER,
President.

CONRAD & PUGH, Engineers.
Wheeling, W. Va.

Bids: June 18.

State Hospital Work

Utica, N. Y.

Sealed proposals for Heating Work—Repairs to Heating System (Main Building) Utica State Hospital, Utica, N. Y., will be received by the State Hospital Commission, Capitol, Albany, N. Y., until 2 o'clock P.M. (Standard Time) on Wednesday, June 18, 1924, when they will be publicly opened and read. Proposals shall be enclosed in an envelope furnished by the State Architect, sealed and addressed, and shall be accompanied by a deposit consisting of a certified check drawn upon some legally incorporated bank in this State and made payable to the State of New York, or money, equal to five per cent (5%) of the amount of the proposal. The contractor to whom the award is made will be required to furnish surety company bond in the sum of fifty per cent (50%) of the amount of contract within thirty (30) days after official notice of award of contract and in accordance with the terms of Specification No. 4309. The right is reserved to reject any or all bids. Drawings and specifications may be examined at the Utica State Hospital, Utica, N. Y., at the New York Office of the Department of Architecture, 18th Floor, Fuller Building, Broadway & 23rd St., and at the Department of Architecture, Capitol, Albany, N. Y. Drawings, specifications and blank forms of proposal may be obtained at the Department of Architecture, Capitol, Albany, N. Y., upon reasonable notice to and in the discretion of the State Architect, Sullivan W. Jones, Capitol, Albany, N. Y.

Dated: June 3, 1924.

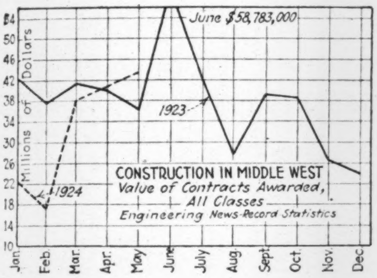
CONSTRUCTION NEWS

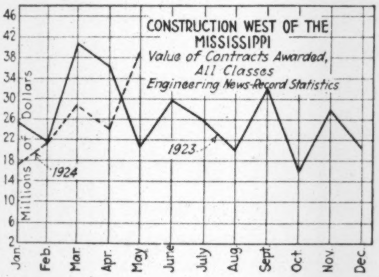
Engineering News-Record, June 19, 1924

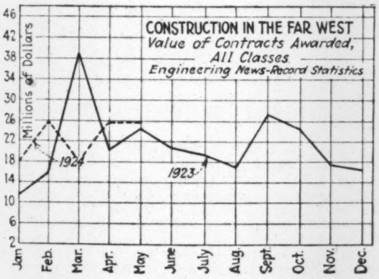
The Construction Barometer

Decline in Contract Letting During Past Week—Production of Building Materials, Except Steel, Steadily Increasing—Improvement in Demand Imminent

CONTRACT letting in both private and public work showed an appreciable decline during the week ended June 12 as compared with the week preceding. Public building awards, of $150,000 and over, increased in number but decreased in average value per contract during the week. A comparison of May contracts with those of the month preceding, however, showed strong gains in all sections of the country except the group consisting of the following states: Idaho, Utah, Nevada, Arizona, Washington, Oregon and California. Production of all building materials except steel, is steadily increasing as the season advances. Consumers' stocks of other basic materials are comparatively small; a resumption of more active production schedules is therefore expected in the not too distant future. With construction cost 21 per cent below the 1920 peak and credit conditions still favorable, a depression equalling in severity that of 1920-21 is not anticipated at the present time.







Engineering News-Record Statistics

Minimum on water-works and excavations, $15,000; other public work, $25,000; industrial buildings, $40,000; commercial buildings, $150,000.

VALUE OF LARGE CONTRACTS LET IN THE UNITED STATES

Road Oil—Nashville, Tenn.—For 250,000 to 500,000 gal. road oil, to Southern Oil & Tar Co., Clay and Fulton Sts., Louisville, Ky., $0.1775 per gal.

Road Oil—St. Paul, Minn.—State Hy. Dept., 1246 University Ave., 110,000 gal. road oil, to Standard Oil Co. of Indiana, 1937 4th St. S. E., Minneapolis, $0.0599 per gal. Noted May 1.

Asphalt, Cement, etc.—Brantford, Ont.—Furnishing asphalt and road oil to Imperial Oil Co., Ltd., Imperial Oil Bldg., Toronto, $24 ton and $8.45 per gal. respectively; cement to S. Rogers Co., 85 Bay St., Toronto, $3.32 per bbl. less $0.20 each for sacks, limestone dust to Bolander Bros., Brantford, $8.60 per ton.

Cement and Steel—Toronto, Ont.—Dept. Provincial Highways, Parliament Bldg., 100,000 bbl. cement to Canada Cement Co., Canada Cement Bldg., Montreal, Que., $350,000, 100,000 bbl., to A. Rogers Co., 85 Bay St., $350,000, 50,000 bbl., to Hanover Cement Co., Hanover, $175,000; Steel reinforcing to Trussed Concrete Steel Co., Ltd., Walkerville, $50,000.

Sand, Cement, etc. — Toronto, Ont. — Roger Miller & Son, Ltd., Harbor Comn. Bldg., furnishing sand and crushed stone, to Rogers Supply Co., 357 Bay St.; cement to J. Maloney, Ltd., 343 Dufferin St., and F. Ryan, 1319 Bloor St. W.; super cement to Super Cement Co., 86 Adelaide St. E.; and rubble, to F. Ryan, 1319 Bloor St. W.

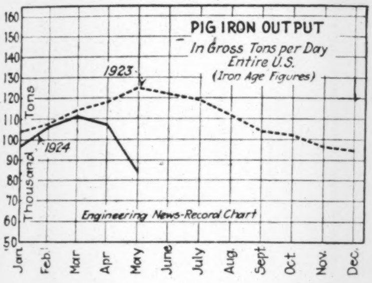
CONSTRUCTION NEWS

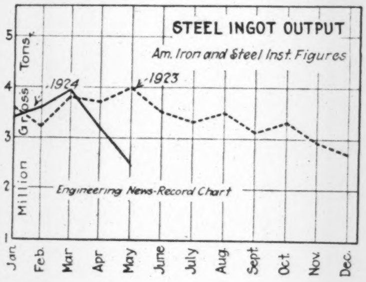
Engineering News-Record, June 26, 1924

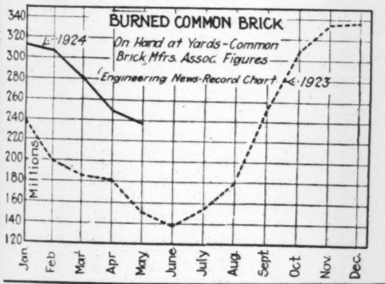
The Construction Barometer

Output and Demand Increased in Lumber, Cement, Brick and Other Building Materials—Iron and Steel Slower—Decline in Contract Letting During Past Three Weeks

A SLIGHT gain in private construction, particularly buildings, during the week ended June 19, was not sufficiently heavy to break the gradual downward trend in contract letting evident since the first of the month. New York City, however, offers an exception to other sections of the country in its consistent gains in volume of building permits. The present depression in iron and steel production and demand is depicted in the accompanying charts. In contrast with the declines in these basic materials is shown the increased demand for brick and steady gains in cement and lumber output. Demand and production of other building materials such as, lime, plaster, glass, hardware and concreting materials are also on the upgrade. Prices have remained fairly steady during the past three weeks with the exception of slight weakenings in lumber and steel.







Engineering News-Record Statistics

Minimum on water-works and excavations, $15,000; other public work, $25,000; industrial buildings, $40,000; commercial buildings, $150,000.

VALUE OF LARGE CONTRACTS LET IN THE UNITED STATES

Week Ended	Public Work	Private Work	Total Contracts
June 5	$27,725,000	$19,189,000	$46,914,000

Waterworks

PROPOSED WORK

N. H., Berlin—Berlin Water Co., having preliminary plans prepared filtration plant. To exceed $40,000. Weston & Sampson, 14 Beacon St., Boston, Mass., archts.

N. Y., Saranac Lake—Election soon to vote on 22,500 bonds extending water supply system. D. S. Foster, village pres.

N. J., East Paterson — Making plans water and sewer supply systems. H. J. Harder, 129 Market St., Paterson, engr.

Va., Strasburg—See "Sewers."

Ky., Bowling Green—City retained J. W. Hill & Sons, engrs., 45-46 Bodmann Bldg., Cincinnati, O., to investigate better fire protection for High Level Dist. and improvement to water system. $45,000.

Ky., Paintsville—Takes bids about July 20, filtration plant, high service reservoir, pumping station, etc., $70,000. J. N. Chester Engineers., Union Bank Bldg., Pittsburgh, Pa., engrs. Noted May 29.

O., Westerville — July 17, by Village Comn., at office R. Biehl, city mgr., pumping station, etc.; adv. E. N.-R. June 26.

Mich., Flat Rock—Had plans prepared distribution system, 2,440 lin. ft. 8 in. and 18,240 lin.ft. 6 in. c.i. pipe. L. D. Beckley, 811 Owen Bldg., Detroit, engr.

Minn., Hibbing—Plans about 9,000 lin. ft. main extensions between Brooklyn and Kittzville Sts. $20,000. J. H. Murphy, city clk.

Mo., Morehouse — Making preliminary plans waterworks and distribution system, etc. $50,000. F. L. Wilcox, Chemical Bldg., St. Louis, engr.

Ark., Gurdon—Making preliminary plans waterworks, distribution system, and sanitary sewers. $100,000. W. H. Trevillion, mayor.

Tex., Crawford — Election soon $60,000 bonds extensions and improvements to present waterworks and electric systems.

Tex., Dallas—See "Streets and Roads."

Tex., Lufkin—Election soon $55,000 bonds improving present system, extending mains, larger pumping house and new pumping equipment. L. Dunn, city secy.

Tex., San Antonio—Making plans mains and laterals in Peach St. from Goliad St. to river, $90,000; Highland Park from Highland Park to creek at Presa and School Sts., $90,000; from Agrita and San Pedro Aves. to San Pedro Creek, $45,000; South Medina St. from Commerce to Vera Cruz Sts., $30,000; from Ave. D to San Antonio River, 25,000. I. Ewig, city engr.

Tex., Waco—See "Sewers."

Okla., Muskogee — Making surveys new rapid sand mechanical filtration plant. $100,000. J. R. March, City Hall, engr.

Okla., Texola—Voted $47,000 bonds new

Waterworks (Continued)

water system and electric light plant. Gant Baker Co., 1116 West Main St., Oklahoma City, engrs. Noted Apr. 17.

Que., Montreal — Executive Com. soon takes bids mains in 18 streets. $90,262.

Que., Valleyfield—Plans 2 bed filtration plant (rapid type). $90,000. A. Sullivan, town engr.

Ont., Belleville—Plans to install 3½ to 4 m.g. three stage against approximately 300 ft. head centrifugal gasoline driven pump. C. D. Campbell, city engr.

Ont., Ft. William—Soon takes bids 18,000 ft. 24 in. c.i. mains. $125,000. C. B. Symes, city engr.

Ont., Hamilton—Plans 12 in. mains in King St. and Kenilworth Ave. $36,000. Prices wanted on material. W. L. McFaul, city engr.

Ont., North Bay—Soon takes bids extending mains, 1,800 gal. pump, etc. $40,000. F. G. Mackie, town engr.

Ont., Oakville—Plans 20,000 ft. 6 in. c.i. mains, hydrants, valves, etc. $80,000. R. Smith, city engr.

Ont., Oshawa—Plans to install 1,200 gal. 3 stage electric pump in pumping station. W. C. Smith, city engr.

Ont., Sudbury—Making plans 10,000 ft. 6 in. c.i. mains, hydrants, etc. 30,000. F. C. Lane, Town Hall, engr.

BIDS DESIRED

N. Y., Brooklyn — June 27, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Foster, Lexington and Willoughby Aves., here.

N. Y., New York — June 30, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in McDonough Pl., Williamsbridge Rd., Crotona Parkway, East 172nd, McClellan, Whittier, Worthen, East 162nd and West 174th Sts., Compton, Cornell, Gillespie, Haight, Hobart, Lurting, Manor, Pugsley, Throgmorton, Waterbury, Anthony, College, Fowler, Mt. Eden and Randall Aves.

N. Y., New York — July 1, by N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., mains in Brandt and Timpson Places, Jerome, Netherland, Oxford, Palisade, Sheridan, Sylvan, Townsend and Walton Aves., Avenue, John, McClellan, East 174th, East 182nd, West 232nd, West 255th and West 256th Sts.

N. Y., Victor — July 7, by Village Trustees, additional water supply system, etc. Hopkins & Field, 349 Cutler Bldg., Rochester, engrs.; adv. E. N.-R. June 26.

N. J., Park Ridge — July 7, by Mayor and Boro Council, drilling artesian well, furnishing and installing pumping machinery and constructing pumping station. H. J. Harder, 129 Market St., Paterson, engr.

La., Shreveport — July 10, extending waterworks and sewerage systems, 2 mi. pipe, 3 mi. water conduit, 7,000 cu.yd. concrete. J. N. Chester Co., Union Bank Bldg., Pittsburgh, Pa., engrs.

Ind., Evansville—June 27, by Bd. City Trustees, 8,000 ft., 2 in. and 15,000 ft. 1 in. wrought iron galvanized water pipe. W. A. Bosse, secy.

S. D., Sioux Falls—July 7, by W. C. Leyse, city aud., improving waterworks, raise side walls, new fireproof roof, trackage for crane, 73 x 95 ft. waterworks building, 38 ft. high. $30,000. J. Schwartz, 404 Minnehehe Blk., archt.

Tex., Mart—July 1, by T. H. Lumpkin, mayor, 4 mi. pipe, earth dam, concrete spillway. Koch & Fowler, Central Bank Bldg., Dallas, engrs. Noted Apr. 17.

Tex., Wortham—Taking bids filter plant. $15,000. Koch & Fowler, Central Bank Bldg., Dallas, engrs.

Wash., Tacoma — June 7, by Bd. Pub. Wks., replacing parts of Green River gravity pipe line, 2,500 ft. 60 in. and 1,100 ft. 48 in. c.i. pipe, from Steel Tank & Gravity Co., Berkeley, Calif., $41,689.

Ont., Windsor—July 17, by Essex Border Utilities Comn., Heintzman Bldg., 10,000 ft. 24 and 36 in. steel or rein.-con. pipe line. J. C. Keith, ch. engr. Gore, Nasmith & Storrie, 625 Confederation Life Bldg., Toronto, consult. engrs.; adv. E. N.-R. June 26.

BIDS RECEIVED

Mass., East Boston (Boston P. O.)—Dept. Pub. Wks., City Hall, Boston, mains and sewers in Ashley St., here, from A. Boniffieldi Co., 52 Powder House Blvd., Somerville, $26,969. Noted June 5.

New York—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, gate, valves, hydrants, etc., for Williamsburg Conduit of Catskill aqueduct, Contr. 217, from Michigan Valve & Fdry. Co., 3631 Park St., Detroit, Mich., $153,280. Noted June 5.

O., Cleveland—Cleveland Water Dept., filtration equipment for Baldwin Filtration Plant, Contr. 51, from M. L. Bayard & Co. Inc., 20th St. and Indiana Ave., Phila., Pa., $291,525. Noted May 15.

O., Kent—M. P. Tucker, supt. Water Wks., Akron, 2 m.g. extention to coagulation basins, Contr. 235, here, from H. C. Felver, 7016 Euclid Ave., Cleveland, $84,885. Noted June 5.

Colo., Denver—Bd. Water Comrs. City and Denver Co., 1509 Cleveland Pl., intake from Marsten Lake to filter plant, Contr. B, from J. E. Young Constr. Service, Denver, $389,851. Noted May 15.

Calif., Yuba City — Reclamation Dist. 1660, Sacramento, rein.-con. pumping station, discharge conduit, six 24 in. pumps and motors, starters, valves and pressure systems, near here, general contract. from Davison & Nicholsen, 324 West Lafayette St., Stockton, approximately $30,000; electric work, from Butte Electric Equipment Co., 530 Folsom St., San Francisco, approximately $3,000; installing equipment, from Byron-Jackson Co., 55 New Montgomery St., San Francisco.

CONTRACTS AWARDED

N. Y., Brooklyn—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Fort Hamilton Parkway, Delamere Pl., Howard, Sutter, 9th, 15th, 16th, M, N and O Aves., 52nd, 54th 56th, 70th, 81st, East 8th, East 9th, East 27th, East 46th, East 52nd, East 54, East 55th,, East 56th, East 98th, West 1st and West 23rd Sts., to W. Norton, 510 West 149th St., $12,740. Noted June 19.

N. Y., Long Island City—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., New York, mains in Manley, Elmhurst and Lewis Sts., to S. Gallucci, 33 Railroad Ave., Corona, $5,795, mains in Foster, Skillman and Carolin Aves., to Paladino Contg. Co., 437 East 120th St., New York, 9,684. Noted June 12.

N. Y., New York—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., to C. De Blasio, 339 7th Ave., Mt. Vernon, mains in Delafield, Newton and Sedgewick Aves., $16,685, in Barnes, Kingsland, and Monticello Aves. $7,490; to Draganetti Constr. Co., 1123 Clinton Ave., mains in Andrews, Liebig and Netherland Aves., $8,890; to Beaver Eng. & Constr. Co., 57 Chambers St., in Chittenden and 5th Aves., $16,100, transferring and rearranging connections in 10th Ave., Allen and Hudson Sts., $11,438. Noted June 12.

N. Y., New York—N. J. Hayes, comr. Water Supply, Gas & Electricity, Municipal Bldg., to Norton Eng. & Contg. Co., 510 West 149th St., mains in Gildersleeve, Hudson, Ludlow, Olmstead, Pugsley and Waterbury Aves., Barrette, Belton, Purdy, and East 172nd Sts., $11,300; White Plains Rd., Bryant, Bowler, Gleason, Leland, Noble and Wallace Aves., $8,300; to Melrose Constr. Co., 230 East 162nd St., Morris Lane, Balcom, Brinsmade, Butterick, Calhoun, Emerson, Graff, Harding, Hosmer, Huntington, Lawton, McDowell, Miles, Quincy and Robinson Aves., $12,828. Noted June 12.

N. Y., St. George—N. J. Hayes, comr. Water Supply, Gas & Electriicty, Municipal Bldg., New York, mains in Austin, Cedar and Carlton Aves., etc., to Knight & Demicco Inc., 448 East Tremont Ave., New York, $27,400. Noted June 12.

Pa., Phila.—Bureau Waterworks, 16 in. main in Margaret St., Contr. 673, to J. J. McHugh, 1617 Race St., $32,358; 8 soot blowers, Contr. 678, to Vulcan Soot Blower Co., 1104 Commonwealth Bldg., $3,952; 12,220 ft. c.i. laterals, Contr. 684, to M. Ware Cast Iron Pipe Co., 209 Crozier Bldg., $25,418; 500 kw. generators, Contr. 685, to Genl. Electric Co., Witherspoon Bldg., $22,738. Noted June 19.

Md., Baltimore—Trench excav. for Water Dept., to M. L. Quinn, 5308 York Rd., $23,570. Noted June 12.

O., Columbus—See "Streets and Roads."

O., Toledo—Lucas Co., (**e. e. means engrs. est.**), to S. L. Cothrel, Jefferson Ave., mains in Water Supply Line 69, $38,905 e. e. $42,278, 74, $23,406 e. e. $26,490, 80, $17,093 e. e. $18,391, 81, $16,076 e. e. $17,084; to J. L. Skeldon, Eng. Co., Nicholas Bldg., in 50, $18,388 e. e. $20,732, 73, $5,948 e. e. $6,703. Noted May 29.

Mich., Detroit — Bd. Water Comrs., to U. S. Cast Iron Pipe Co., East Burlington Ave., Burlington, N. J., 2,000 tons 48 in. pipe $50.95 per ton, 550 tons 36 in. and 250 tons 30 in., $51.95; to Amer. Cast Iron Pipe Co., Acipco St., Birmingham, Ala., 1,500 tons 24 in. pipe $51.55; to Lynchburg Fdry. Co., Peoples Natl. Bank Bldg., Lynchburg Fdry. Co., Peoples Natl. Bank Bldg., Lynchburg, Va., 1,005 tons 24 in. pipe $51.55, all f.o.b. Detroit.

Mich., Detroit—Bd. Water Comrs., G. H. Fenkell, genl. mgr., will lay 4,053 ft. 8 in. c.i. mains in Bella Vista, Fenelon, Gratiot and Washburn Aves., also 6,598 ft. 6 in. c.i. mains in Pinehurst Blvd., Ellsworth, Mendota, Crudder and Welland Aves., by day labor.

Wis., Racine—Racine Co., artesian well, 1,600 ft .deep, at county asylum, to W. H. Gray & Bro., 810 North Clark St., Chicago, Ill., at $4.50 per ft.

Minn., Minneapolis—Two 1 ton trucks for water dept., to W. H. Kuhlmann & Co., 605 Bway., 545 each. Noted May 22.

Minn., Rochester—Constructing 2,000 gal. concrete tank on 90 ft. tower, to Bland Eng. Co., L and Kennedy Sts. N. E., Minneapolis, $33,100. Noted Feb. 7.

Minn., Waconia—To Bruce-Bickelhaupt Des Moines, Ia., mains and pumping equipment, $30,216; to Chicago Bridge & Iron Works, 608 South Dearborn St., Chicago, Ill., tank and tower, $7,000. Noted May 29.

Mo., Hannibal—For 676 tons c.i. pipe and specials, to Natl. Cast Iron Pipe Co., Tarrant City, Birmingham, Ala.; 9 motor driven centrifugal pumps and switchboards, etc., to Dayton-Dowd Pump Co., Quincy, Ill.; general contract river station, force line and distribution system, to Merkle Mchy. & Contg. Co., 1733 Walnut St., Kansas City. Noted June 5.

Tex., Marshall — To Chicago Bridge & Iron Wks., Praetorian Bldg., Dallas, 300,000 gal. steel tank and tower $10,800; to Eddy Valve Co., Praetorian Bldg., Dallas, 25 hydrants $1,139; to N. O. Nelson, 915 McKinney St., Dallas, 55 valves and cocks $994, curb cocks $1,394, corporation cocks $1,029; to Texarkana Pipe Wks., Texarkana, sewer pipe $5,254; to Natl. Cast Iron Pipe Co., Great Southwestern Life Bldg., Dallas, c.i. pipe 281 tons 10 in. $16,790, 177 tons 8 in. $10,753, 41 tons 6 in. $2,491, 17 tons fittings $3,074. Noted May 15.

Colo., Denver—Bd. Water Comrs. City and Denver Co., 1509 Cleveland Pl., 64 m.g. rapid filter on north side Marston Lake, Contr. A, to Dutton & Kendall, 2104 Bway., approximately $1,250,000. Noted May 15.

Wash., Kalama—New water system, 5,000 ft. new gravity pipe line, to Cascade Pipe & Flume Co., 3839 West Florida St., $75,000. Noted Mar. 20.

Sewers

PROPOSED WORK

N. Y., Lackawanna — Common Council plans additions and improvements to disposal plant. $50,000-$60,000.

N. Y., Saranac Lake—Election soon to vote on $30,000 bonds extending storm and sanitary sewers. D. S. Foster, village pres.

Va., Strasburg — Plans election $40,000 bonds extending sewers and water mains. C. W. Heater, mayor.

W. Va., Princeton — See "Streets and Roads."

Mich., Port Huron—Had plans prepared 1¾ mi. trunk sewers 30-72 in. diam., concrete and vitr. pipe at depths from 10- to 20-ft., also 1½ mi. lateral sewers. 10- to 24-in. vitr., or concrete pipe. E. R. Whitmore, city engr.

Mont., Shelby—See "Streets and Roads."

Mo., Higginsville — Making preliminary plans new waterworks, distribution system and sewers in various streets. $90,000. E. T. Archer & Co., 609 New England Bldg., Kansas City, engrs.

Ark., Gurdon—See "Waterworks."

Tex., Dallas—See "Streets and Roads."

Tex., Houston — Voted $150,000 bonds storm and $350,000 bonds sanitary sewers. J. C. McVea, city engr. Noted May 22.

Tex., Lufkin — Election soon $70,000 bonds, extensions to sewerage system, mains, laterals, etc. L. Dunn, city secy.

Tex., Marshall—See "Unclassified."

Tex., Waco — Making plans disposal plants, incl. 2 pumping plants, grit chambers, 8 Imhoff tanks, 4 double sludge tanks, sprinklers, c.i. pipe, vitr. pipe, etc. $350,000. Terrell Bartlett Engrs., Calcasieu Bldg., San Antonio, engrs.

Calif., Alhambra—Defeated $30,000 bonds storm drains, etc. T. B. Downer, city engr. Noted June 5.

Calif., Compton—See Streets and Roads.

Calif., Los Angeles—See Streets and Roads.

Ont., Guelph—Plans 16,500 ft. 9 in. or more vitr. sewers, etc. $65,000. N. S. Nicklin, city engr.

Ont., Merritton—Plans 10,000 to 15,000 ft. 9 in. or more vitr. tile sewers. $100,000. R. Clark, city clk.

Ont., Oshawa—Making plans 20,000 ft. 9 and 15 in. vitr. storm and sanitary sewers. $45,000. W. C. Smith, city engr.

BIDS DESIRED

Massachusetts—See "Waterworks."

Mass., Newton—June 30, by G. E. Stuart, Street Commissioner, City Hall, West **Newton**, rein.-con. culvert for Newtonville **Drain**, Adams St. and Tarleton Rd. **$250,000.**

Sewers (Continued)

New Jersey—July 14, by Mayor and Boro Councils of Bergenfield and Dumont, Council Chamber, Dumont, sewage treatment works and appurtenances. T. F. Bowe, 110 William St., New York City, consult. engr.; adv. E. N.-R. June 26.

N. J., Dumont—July 14, by Mayor and Boro. Council, sewerage system. T. F. Bowe, 110 William St., New York City, consult. engr.; adv. E. N.-R. June 26.

N. J., Hasbrouck Heights (branch of Hackensack)—July 21, by Mayor and Boro. Council, Municipal Hall, sewers and disposal works. City Wastes Disposal Co., 45 7th Ave., New York City, engrs.; adv. E. N.-R. June 26.

Pa., Huntingdon—July 1, by Boro Council, one course rein.-con. paving and curbing 2,500 lin.ft. Moore, Mifflin, 17th and 18th Sts., 24, 27 and 35 ft. $30,000. J. W. Oates, Huntingdon, engr.

Pa., Phila.—July 2, by G. H. Biles, dir. Pub. Wks., outfall pier of Northeast Sewage Treatment Wks., Contr. 1, pier, incl. buildings, bulkhead and sheet piling fence, Contr. 2, mechanical equipment, Contr. 3, electrical equipment, Contr. 4, plumbing equipment, Contr. 5, heating equipment.

W. Va., Fairmont—July 18, by L. N. Satterfield, clk. Marion Co., grading and paving 5 mi. Buffalo Rd., 1 mi. Warrior Fork Rd., 2.7 mi. Bartholomew Fork Rd., Projects 1, 2 and 3, 1.2 mi. Whetstone Rd., Project 4, 5 mi. Whetstone Rd., Project 5, 2.4 mi. Dents Run Rd., Project 6, 1.4 mi. Campbells Run Rd., 1 mi. State Fork Rd., 0.5 mi. Mud Liex Run Rd., Projects 7, 8 and 12, 1.4 mi. Flat Run Rd., Project 9, 0.5 mi. Salt Lick Run Rd., 3.3 mi. Mannington-Clarksburg Turn pike, Projects 10 and 11, all in Mannington Dist. B. H. Palmer, co. engr. Noted Apr. 1.

La., Shreveport—See "Waterworks."

Ky., Poor Fork—See "Streets and Roads."

Mich., Grand Rapids—June 30, by F. H. Locke, city mgr., City Hall, 1st St. Relief Sewer, 3,700 ft. 10 ft. 6 in. by 8 ft. 5 in. special section rein.-con. sewer in open cut, also 1,550 ft. 60 in. circular sewer pre-cast rein.-con. pipe, rein.-con. in open cut, or concrete, segment block or brick in tunnel, etc. C. A. Paige, city engr.

Mich., Jackson—July 9, by City Clerk, rein.-con., brick and steel sewage pumping station. J. E. Whittaker, city mgr.; adv. E. N.-R. June 26.

Wis., Beloit—July 2, by Bd. Pub. Wks., 5,550 ft. 8 and 24 in. sanitary sewers in Public Ave., Broad and Pleasant Sts. Contr. 4; 3,765 ft. 24- to 60-in. storm sewers in Pleasant St., Public and East Grand Aves., Contr. 5 $80,000-$90,000. Former bids rejected. G. E. Helbink, City Hall, engr.

Ark., Pine Bluff — See "Streets and Roads."

Okla., Tulsa—July 31, by City, sanitary out-fall sewers and 2 disposal plants. $450,000. C. Schultz, city engr.; adv. E. N.-R. June 26.

BIDS RECEIVED

Massachusetts—Metropolitan Dist. Comn. 1 Ashburton Pl., Boston, in Mill Brook Valley sewer, Div. North Metropolitan sewer, in Medford, from General Contg. Co., Bath, Me., $117,356.

N. Y., Brooklyn—E. Riegelmann, boro pres., Boro Hall, **(e. e. means engineers estimate)**, from B. Peconi & Son, Inc., 570 18th St., sewers in 55th St. 89% (e. e. $5,586), East 43rd St. 89% (e. e. $2,186); from Nazzerro & Querriero, West 9th St. 83.39% (e. e. $4,908), East 34th St. 92.82% (e. e. $4,782), East 27th St. 83.98% (e. e. $4,574), 77th St. 93.41% (e. e. $1,279); from Tomassetti & Co., Inc., 1133 60th St., Minna St. 86.86% (e. e. $3,573); from C. CONTRACTS AWARDED

Me., Bar Harbor—Compass Station—Spec. 4966—Bureau Yards & Docks, Navy Dept., Wash., D. C., compass station, here, to A. B. & J. R. Hodgkins, 42 Greeley Ave., $3,486. Noted June 5.

Pa., Hog Island—Compass Station—Spec. 4976—Bureau Yards & Docks, Navy Dept., Wash., D. C., repairs to quarters compass station and wharf at Naval Radio Sta., to W. L. Morrison Constr. Co., 613 15th St. N. W., Wash., D. C., $1,389 (60 days).

D. C., Wash.—Road and Gutters—Spec. 4986—Bureau Yards & Docks, Navy Dept., Wash., D. C., repairs to roads and gutters at Naval Hospital here to R. E. Boiseau, 5905 Blair Rd., $11,784. Noted June 5.

Fla., Jacksonville—Bulkhead and Pier—U. S. Engineer Office, War Dept., Wash., D. C., bulkhead and pier to C. E. Hillyer, Blum Bldg., $15,800. Noted May 1.

Ala., Florence—Steel Rods, Pipe, Buckets, etc.—U. S. Engineer Office, Florence, 14,520 ft. steel rods, 1 in. diam., to Atlantic Steel Co., South Ry. Belt Line, Atlanta, Ga., $1,575; 20 lengths black, wrought steel and flanged pipe, to Crane Co., 2 South 20th St., Birmingham, $3,900; 10 concrete buckets, to Insley Mfg. Co., Birmingham, 1,915; Items 1-24 inclusive, to Gulf States Steel Co., B. M. Bldg., Birmingham, $7,925; Items 25 and 26 to Tennessee Coal, Iron & R.R. Co., B. M. Bldg., Birmingham, $37; 40,000 sleeve nuts, to Nashville Machine & Supply Co., 123 3rd Ave. N., Nashville, Tenn., $2,848.

Ky., Louisville—Pumps—U. S. Engineer, P. O. Box 72, three 15 in. rope driven centrifugal water pumps, to Kingsford Fdry. & Machine Wks., 264 West 2nd St., Oswego, N. Y., $2,340. Noted May 22.

Ky., Louisville—Truck—U. S. Engineer, P. O. Box 72, one steel dump body truck, to Graham Bros. Truck Co., Evansville, Ind., $2,065. Noted May 29.

Mich., Hastings—Post Office—Treas. Dept. at office Supervising Archt., Wash., D. C., post office here to A. M. Lundberg, Times Bldg., St. Louis, Mo., $64,089. Noted Apr. 24.

Ill., Chicago—Derrick Boat—U. S. Engineer, Office, War Dept., Wash., D. C., steel derrick boat to Sturgeon Bay Dry Dock Co., Sturgeon Bay, Wis., $56,000. Noted May 22.

Ill., Chicago—Dredging—U. S. Engineer Office, 537 South Dearborn St., dredging in North Bend Branch Chicago River, 100,000 cu.yd., to Great Lakes Dredge & Dock Co., 103 South Michigan Ave., $33,000. Noted June 12.

Federal Government Work (Continued)

Ill., **Chicago**—Steel Barage—U. S. Engineer Office, War Dept., Wash., D. C., one 80 ft. steel barge to Midwest Boat & Barge Co., Grafton, Ill., $10,731. Noted May 22.

Calif., San Diego—Building, etc.—Spec. 4933—Bureau Yards & Docks, Navy Dept., Wash., D. C., buildings, roads and service connections, etc. at Naval Operating Base here to W. E. Kier Constr. Co., 813 1st Natl. Bank Bldg., $541,000.

FEDERAL POWER COMMISSION

Applications for Licenses and Permits

Applications

495—Pike Rapids Power Co., Duluth, Minn.—Wants preliminary permit for power dam in Mississippi River 4,000 ft. above mouth of Christy Brook.

496—Prairie River Power Co., St. Paul, Minn.—Wants preliminary permit for 21 ft. dam and power plant in Mississippi River near Aitkin, Aitkin Co.

497—Gauley Power Co., Union Bldg., Charleston, W. Va.—Wants preliminary permit for 2 power dams on Gauley River and 3 power dams on Meadow River, in Nicholas, Fayette and Greenbrier Counties.

498—Pub. Service Co. of Oklahoma, 301 World Bldg., Tulsa, Okla.—Wants preliminary permit for 40 ft. dam and power plant in Grand River, Delaware Co.

499—S. E. Kieffer, 57 Post St., San Francisco, Calif.—Wants preliminary permit for diverting Mokelumne River into Jackson Creek in Amador and Calaveras Counties.

500—Northwestern Power & Mfg. Co., 394 Dupont Bldg., Wilmington, Del.—Wants preliminary permit for diversion dam and power canal extending 3½ mi. in Elwana River, near Port Angeles, Clallam Co., Wash.

Unclassified

PROPOSED WORK

Playground—East Boston (Boston P. O.), Mass.—Park Dept., 33 Beacon St., Boston, plans playground, Condon, East Eagle and Glendon Sts., here. $82,000. J. B. Shea, chn. com.

Playground—Readville (Boston P. O.), Mass.—Park Dept., 33 Beacon St., Boston, plans playground, Sturgis and Bullard Sts., here. $30,000. J. B. Shea, chn. com.

Playground — Roxbury (Boston P. O.), Mass.—Park Dept., 33 Beacon St., Boston, plans playground, Heath St., adjoining Jefferson School. $85,000. J. B. Shea, chn. com.

Coal Loading Dock—Huntington, W. Va.—Philadelphia & Cleveland Coal Co., plans coal loading dock on Ohio River. $25,000. Graham, Scott & Wiswell, 1st Natl. Bank Bldg., engrs.

Transmission Line—Alabama—Alabama Power Co., B. M. Bldg., Birmingham, plans 44,000 volt transmission line from Decatur to Hapgood, near Muscle Shoals.

Subway—Nevada, Mo.—Voted $100,000 bonds subway under track Missouri Pacific, and Missouri-Kansas-Texas Railroads. Total $200,000. Railroads to pay half cost. Noted May 22.

Electric System — Tex., Crawford — See "Waterworks."

Health Resort—Marshall, Tex.—D. C. Driskell, Fuqua, plans walks, drives, sewers, miscellaneous improvements to develop Roseborough Springs into health resort. $100,000. Engineer not announced.

Subway—Long Beach, Calif.—Plans subway under Pacific Electric tracks at Pacific Ave. $170,000 or more. Cost to be borne by city and railroad. C. H. Windham, city mgr.

Ornamental Stret Lighting System—Los Angeles, Calif.—See "Streets and Roads."

Athletic Field—San Francisco, Calif.—San Francisco Baseball Club, 15th and Valencia Sts., G. A. Putnam, secy., plans bowl type athletic field with 2 deck grand stand, parking space for 25,000 autos, etc. $1,000,000. Engineer and architect not selected.

Breakwater—Port Arthur, Ont.—Dept. Pub. Wks., Parliament Bldgs., Ottawa, having plans prepared concrete and timber extension to breakwater, here. $250,000. K. M. Cameron, ch. engr.

Subway and Grade Separation—Toronto, Ont.—City, Canadian Natl. Ry., Union St., (A. F. Stewart, ch. engr.) and Canadian Pacific Ry., Windsor St., Montreal, Que., (J. M. Fairbairn, ch. engr.) plan concrete subways carrying to 6 tracks, 66 ft. wide, structural steel columns and decks, concrete abutments, piers, etc., on Canadian Natl. lines in western section of city, 2 on Bloor St., 2 on Royce Ave., 2 on St. Clair Ave., 1 on Junction Rd., and 1 on Davenport Rd., track elevation, grade separations and subways on Canadian Pacific lines at Dufferin St., Osler, Symmington, Lansdowne and Bartlett Aves. $5,000,000. R. C. Harris, city engr.

Power Development—Ulverton, Que.—Canada Paper Co. Ltd., 70 McGill St., Montreal, plans power development, here, incl. concrete dam and electric generator station. $500,000. Engineer's name withheld.

BIDS DESIRED

Bagging Garners, etc.—Brooklyn, N. Y.—July 18, by R. K. Fuller, comr. Canals & Waterways, Albany, furnishing and installing bagging garners, marine leg pushers and hoists, etc., in grain elevator, at Gowanas Bay, here, Contr. 81-C; adv. E. N.-R. June 26.

Plumbing System—Mt. Pleasant, N. Y.—July 7, at office F. L. Merritt, clk. Bd. Supervs. Westchester Co., Court House, White Pains, plumbing system in nurses home and employees dormitory, at Grasslands Hospital, here. Walker & Gillette, 128 East 37th St., New York City, archts.; adv. E. N.-R. June 26.

Heating and Plumbing—Oswego, N. Y.—July 18, by R. K. Fuller, comr. Canals & Waterways, Albany, heating system Contr. 82-H, and plumbing system Contr. 82-P, in Administration Building on terminal pier, here; adv. E. N.-R. June 26.

Dock, etc.—Waterford, N. Y.—July 18, by R. K. Fuller, comr. Canals & Waterways, Albany, dry dock and approach channel here; adv. E. N.-R. June 26.

Plumbing System—White Plains, N. Y.—June 30, at office F. L. Merritt, clk. Bd. Supervs. Westchester Co., Court House, White Plains, additional plumbing in County Jail; adv. E. N.-R. June 26.

Retaining Wall—Johnstown, Pa.—July 1, by City Council, 1,000 ft., rein.-con. retaining wall, 10 ft. high, along Stoneycreek River. $25,000. H. L. Wilson, city engr.

Levee—Memphis, Tenn.—July 8, by Mississippi River Comn., 1st and 2nd Dists., 1006 McCall Bldg., 5,315,000 cu.yd. earth work in Upper and Lower St. Francis, Reelfoot and White River Levee Dists.; adv. E. N.-R. June 26.

Concrete Mixers — Detroit, Mich. — T. Frank, 4430 Oleon St., in market for concrete mixers.

Tunnel—Seattle, Wash.—July 1, by Bd. Pub. Wks., completing 1st Ave., S., tunnel under Duwamish River. No bids in excess of $600,000 considered. Former bids rejected. J. D. Blackwell, city engr. Noted May 29.

Revetment Walls—Kincardine, Ont.—July 2, by N. Desjardins, acting secy. Dept. Pub. Wks., Ottawa, rebuilding West, South and East revetment walls, 660 ft., in inner harbor, also repairing wharf, here. $30,000.

BIDS RECEIVED

Fill — Plattsburgh, N. Y. — Plattsburgh Centenary Comn., filling in Thomas McDonough Monument, about 20,000 cu.yd., from T. J. Murtagh, Plattsburgh, $1.49 per cu.yd.

Heating and Ventilating Apparatus—St. George, N. Y.—Bd. Educ., 500 Park Ave., New York, heating and ventilating apparatus in addition to P. S. 16, Daniel Low Terrace, here, from Walker & Chambers, $57,565. Noted June 12.

CONTRACTS AWARDED

Elimination of Grade Crossings—Jamestown, N. Y. — Erie R.R., 50 Church St., eliminating grade crossings at Foote Ave., Main and Institute Sts., to A. McMullen Co., 50 Church St., New York City, about $500,000.

Ferryboats—New York, N. Y.—Dept. Plants & Structures, Municipal Bldg., 6 steel screw ferryboats, 3 to Staten Island Shipbuilding Co., Mariners Harbor, Staten Island, and 3 to Tebo Yacht Basin Corp., 25 Bway. This corrects report in June 5 issue.

Heating, etc.—Upper Darby, Pa.—See "Buildings."

Heating, etc. — Sarasota, Fla. — See "Buildings."

Subway—Cincinnati, O.—Rapid Transit Comrs., City Hall, about 5.3 mi. rapid transit line incl. 1,600 ft. subway, to Hickey Bros., 4200 Spring Grove Ave., $1,089,147. Engrs. est. $1,000,000. Noted June 12.

Stock Yards — Cudahy, Wis. — Cudahy Bros. Co., will build 700 ft. timber stock yard, by day labor. $100,000. W. A. Hayes, c/o owner, engr.

Frame Riding Device — Dallas, Tex. — Wortham Riding Device Co., Fair Park, frame riding device, to J. E. Pearce, P. O. Box 1481, $60,000.

Power Development—Copco, Calif.—California-Oregon Power Co., Klamath Falls, Ore., will take water from the foot of dam, here, and by 2 mi. tunnel turn it back into Klamath River, with 160 ft. drop, to develop 37,000 additional hp. by company forces. $4,000,000. P. B. McKee, ch. engr.

Street Lighting System—Los Angeles, Calif.—Street lighting system in Whittier Blvd., to Electric Lighting Supply Co., 214 West 3rd St., $71,908; Central Ave., to C. W. Sparks, Henne Bldg., $83,632; Santa Monica Blvd., to R. A. Wattson, 4907 Melrose Ave., $66,715. Noted June 19.

Seawall — California — See "Streets and Roads."

Power Lines—Ontario—Ontario Hydro Power Comn., Toronto, extending power lines from Erieau to High Banks, to Chatham Hydro Dept., under supervision of A. Jackson, Chatham, supt. $40,000 plus percentage basis.

Material and Equipment

PROPOSED WORK

Asphalt Road Oil—Brooklyn, N. Y.—E. Riegelmann, boro pres., Boro Hall, received no bids June 4, 75,000 gal. asphalt road oil.

Paving Materials—St. Paul, Minn.—H. W. Austin, city purch. agt., returned bids June 3 to makers for 1,795 sq.yd. 3 in. vertical fibre brick, 1,440 bbl. Portland cement, 284 tons asphalt, etc., for Hamline Ave., Arcade and East Sts. Work will be done by contract. Noted May 29.

Motor Equipment — Stockton, Calif. — Plans election to vote on $26,300 bonds for motor equipment for street department. W. B. Hogan, city engr.

BIDS DESIRED

Trucks—Long Island City, N. Y.—June 30, by M. E. Connolly, pres. Queens Boro, Queens Subway Bldg., motor trucks and equipment to Street Cleaning Dept. $150,000.

Tractor — Green Island (Troy P. O.), N. Y.—Bd. Village Trustees in market for one 5 ton tractor.

Inorganic Dust—New York, N. Y.—June 30, by J. Miller, pres. Manhattan Boro., Municipal Bldg., 3,000 tons inorganic dust.

Steam Shovel — Shawnee, O. — Ironclay Brick Co., 63 Ruggery Bldg., Columbus, taking bids 1 ton steam shovel for removing overburden and mining clay, at plant, here. J. M. Adams, pres.

Paving Blocks — Minneapolis, Minn. — July 1, by E. S. Gram, city purch. agt., 2,100 sq.yd. granite paving blocks. N. W. Elsberg, city engr.

Asphalt, etc. — Houston, Tex. — Taking bids 5,000 gal. asphalt and 1,200 cu.yd. shell. J. C. McVea, city engr.

Road Roller—Mineral Wells, Tex.—McClung Constr. Co., taking bids 10 ton road roller, steam or gasoline, also small air compressor.

Dump Cars, Concrete Mixers, etc.—Oakland, Calif.—Key System Transit Co., 22nd and Grove Sts., in market for dump cars, concrete mixers, etc. To exceed $25,000.

Road Roller and Truck—Riverside, Calif.—Riverside Co., W. L. Carlson, purch. agt., in market for 12 ton road roller and ¾ ton truck, both gasoline motor driven.

Tractor—Santa Ana, Calif.—City in market for C. L. Best model L tractor. About $3,500.

CONTRACTS AWARDED

Asphalt Sand, etc.—Brooklyn, N. Y.—E. Riegelmann, boro pres., Boro Hall, 7,000 cu.yd. asphalt sand, to Z. Mahoney, 557 46th St., $9,520. Noted May 29.

Castings, Asphaltic Cement, etc.—New York, N. Y.—J. Miller, pres. Manhattan Boro. Municipal Bldg., steel castings to Erie Forge & Steel Co., 50 Church St., $4,455; 6,000 gal. asphaltic cement to Warner Quinlan Co., 79 Wall St., $28,650; 8,000 cu.yd. binder stone, to Calvin Tomkins Co., 30 Church St., $15,440. Noted June 19.

Trucks—Minneapolis, Minn.—Six 1 ton Ford trucks, to W. H. Kuhlmann & Co., 605 West Bway., $968 each; one Kissel truck, to O. M. Nelson Co., 1317 Harmon Pl., $2,990; two Graham Brothers Trucks, to H. E. Mack Co., 1229 Harmon Pl., $1,946 each, all for Garbage Dept. Noted May 29.

Paving Material—Minneapolis, Minn.—To Landers - Morrison - Christenson Co., 800 Builders Exch., 6,500 cu.yd. gravel or crushed rock at $1.90 per cu.yd., 3,600 cu. yd. concrete sand, $0.65. Noted June 5.

Road Oil—St. Paul, Minn.—To Minnesota Road Equipment Co., 4536 Dupont Ave., Minneapolis, 700,000 gal. road oil for Dept. Pub. Wks., at $0.0579 per gal., and 10,000 gal. for Dept. Parks, Playgrounds & Pub. Buildings, $0.063 per gal. Noted Apr. 7.

Pipe—Dallas, Tex.—To Amer. Cast Iron Pipe Co., Praetorian Bldg., for B. B. & S. c.i. pipe, 110 tons 16 in. 12 ft. at $59 per ton, 50 tons 4 in. 12 ft., $63.

Service and Lighting Equipment — Toronto, Ont. — Toronto Electric Comrs., Bd. Trade Bldg., will purchase and erect service and street lighting equipment by day labor. $680,000. Private plans.

Plans and Specifications for inspection by distant bidders may be filed at any of the Engineering News-Record offices without charge.

THESE ARE OFFICIAL NOTICES THAT BIDS ARE WANTED FROM BIDDERS EVERYWHERE

E.N.-R.

OFFICIAL PROPOSALS

Bids: July 15.

Construction of National Park Boulevard

Woodbury, N. J.

Notice is hereby given that sealed bids will be received by the Board of Chosen Freeholders of the County of Gloucester for the construction of National Park Boulevard in the Borough of National Park and Township of West Deptford in the County of Gloucester with a concrete pavement; estimated amount of concrete pavement required is thirty-four thousand two hundred twenty-four (34,224) square yards, and opened and read in public at Court House, Woodbury, N. J., on Tuesday, July 15th, 1924, at 10.00 o'clock A.M., Eastern Standard Time.

Drawings, specifications and forms of bid, contract and bond for the proposed work, prepared by William C. Cattell, County Engineer, have been filed in the office of the said engineer at Merritt Building, Woodbury, N. J., and may be inspected by prospective bidders during business hours. Bidders will be furnished with a copy of the specifications and blue prints of the drawings by the engineer on proper notice and payment of cost of preparation. Bids must be made on the standard proposal forms in the manner designated therein and required by the specifications, must be enclosed in sealed envelopes, bearing the name and address of bidder and name of road on the outside, addressed to The Board of Chosen Freeholders of the County of Gloucester and must be accompanied by a certified check for not less than ten (10) per cent of the amount bid, provided said check shall not be less than $500.00 nor more than $20,000.00 and be delivered at the place and on the hour above named. The standard proposal forms is attached to the specifications, copies of which will be furnished on application to engineer.

By order of The Board of Chosen Freeholders of the County of Gloucester.

CHESTER N. STEELMAN,
Clerk.

WILLIAM C. CATTELL,
County Engineer.

Bids: July 10.

Sewer Connections

Dover, N. J.

The Board of Aldermen of the Town of Dover, N. J., will receive, at a meeting to be held on the 10th day of July, at 2 p.m., at the Council Chambers in the Municipal Building, North Sussex Street, Dover, N. J., sealed proposals for furnishing materials and doing all work required for the construction of 5 inch house connections.

Specifications and forms of proposals may be obtained at the office of the Clerk of the Town of Dover, Municipal Building.

Each bid must be accompanied by a certified check for not less than 10% of the amount of the bid, payable to the order of the Town of Dover.

The Mayor and Board of Aldermen of the Town of Dover reserve the right to reject any and all proposals and to waive any informality in the proposals received and to accept any proposal which they deem to be most favorable to the interests of the Town.

WILLIAM H. HOSKING,
Mayor.

JOSEPH V. BAKER,
Town Clerk.
Dated June 19, 1924.

Bids: July 11.

Highway Work

DEPARTMENT OF PUBLIC WORKS
BUREAU OF HIGHWAYS

Albany, N. Y.

Sealed proposals will be received by the undersigned at their office, No. 55 Lancaster Street, Albany, N. Y., at one o'clock p.m. advanced standard time which is twelve o'clock noon eastern standard time, on Friday, July 11, 1924, for the construction, completion and reconstruction of highways in the following counties:

CATTARAUGUS....(One highway: 3.87)
CAYUGA ....(One contract: 4.78)
CHAUTAUQUA......(One highway: 3.87)
CHENANGO.........(One highway: 4.86)
COLUMBIA.........(One highway: 4.25)
DUTCHESS.........(One contract: 2.82)
ERIE..............(One contract: 3.94)
GENESEE..........(One contract: 2.80)
GREENE...........(One contract: 0.93)
LEWIS.............(One contract: 0.77)
MADISON..........(One contract: 5.87)
MONROE...........(One highway: 0.85)
MONTGOMERY..Completion...(One highway: 3.00)
ONEIDA............(One contract: 3.86)
ORANGE...........(One contract: 2.53)
ST. LAWRENCE..Completion..(One highway: 10.14)
SARATOGA........(One highway: 6.44)
SENECA.....(Two contracts: 4.78 & 2.14 and One highway: 6.23)
SUFFOLK........(One contract: 3.02 and One highway: 9.39)

Maps, plans, specifications and estimates may be seen and proposal forms obtained at the office of the Bureau in Albany, N. Y., and also at the office of the division engineers in whose division the roads are located which are to be constructed, completed and reconstructed. The addresses of the division engineers and the counties in which they are in charge will be furnished upon request.

The especial attention of bidders is called to "General Information for Bidders" in the itemized proposal, specifications and contract agreement.

A. W. BRANDT,
Commissioner of Highways.

Bids: July 8.

Street Improvement

Jackson, Tenn.

Sealed proposals will be received by the undersigned until 10 o'clock A.M., on Tuesday, July 8th, 1924, for the improvement of certain streets in the City of Jackson, Tenn., in accordance with plans, profiles, and specifications prepared and on file in the office of the City Commissioners, approximating 102,600 square yards of pavement, 42,800 lineal feet of concrete curb and gutter, 3,500 lineal feet of storm sewers with necessary inlets and manholes. Bids are requested on sheet asphalt on concrete base, 3 inch vertical fiber brick, on concrete base, 6 inch one course concrete pavement. Bids on other types may be submitted also. Each bid must be accompanied by a certified check or bidder's bond in the amount of ten per cent of the cost of the entire work, computed on the basis of the bids submitted. The right is reserved to reject any or all bids. At 10 o'clock A.M. on said date all bids will be opened and publicly read. A deposit of $5.00 is required for each set of specifications, returnable when bid is submitted, or upon return of specifications.

C. E. GRIFFIN,
Com'r. of Public Utilities.
E. R. DIKE,
City Engineer.

OFFICIAL PROPOSALS

Bids: July 23.

Bridges

Miami, Fla.

Sealed Proposals will be received until 12:00 noon, Wednesday, July 23, 1924, at the office of The Bay Biscayne Improvement Company, 105-107 Northeast Second Avenue, Miami, Florida, for the construction of twelve Reinforced Concrete Bridges and two double-leaf Bascule type Steel Draw Bridges, with a total length of 4,236 feet, across Biscayne Bay between the cities of Miami and Miami Beach, Dade County, Florida, and known as "The Venetian Way."

Plans and Specifications may be seen at the office of the Engineering News-Record, after June 30th, or obtained from the Engineer for the sum of $25.00, $15.00 of which will be refunded upon the return of the plans in good condition.

Bids may be submitted upon one or more of the structures, or upon the Concrete or Steel portions of the Bridges with Draw openings, or upon the entire work.

Payments will be made in cash, on the tenth of each month, for eighty per cent of the value of the work done during the preceding calendar month, upon certificates of the Engineer.

All bids must be accompanied by a certified check or bidder's bond, made payable to the Bay Biscayne Improvement Co., for an amount equal to two (2%) per cent of the total amount of bid.

The Bay Biscayne Improvement Company reserves the right to reject any and all bids, to accept any part of any bid, waive all formalities, or to accept the bid which it deems the most favorable to the Company.

The Bay Biscayne Improvement Company.
By F. C. B. LE GRO,
Vice President.

HARVEY STANLEY,
Consulting Engineer,
Fort Lauderdale, Florida.
Dated June 14, 1924.

Bids: July 7.

Garbage Incinerators and Chimney

Ambridge, Pa.
May 26, 1924.

Sealed proposals for the construction of Garbage Incinerators and Chimney will be received at the office of the Borough Manager of the Borough of Ambridge, Penna., until 6:30 p.m., July 7th, 1924 (Eastern Standard Time).

The plant is to consist of two units each having a capacity of ten (10) tons of garbage and rubbish per eight hours. Bidder is to submit plans, specifications, and guarantees of the incinerators and chimney which he proposes to install, which is to be in accordance with general specifications prepared by the Borough of Ambridge.

A copy of the specifications may be obtained at the office of the Borough Manager.

Each bid must be accompanied by a certified check, made payable to the Treasurer of the Borough of Ambridge, in the amount of Five Hundred ($500.00) Dollars.

The Borough of Ambridge reserves the right to reject any or all bids.

Borough of Ambridge.
By A. W. JOHNS,
Borough Manager.

More Historical Sketches of Construction Machinery

In the issue following *Engineering News-Record's* Fiftieth Anniversary Number of April 17 there appeared the first of a series of articles on "Construction Equipment—Past and Present." The initial subject dealt with was the rock drill and succeeding articles presented historical sketches of the power shovel, the concrete mixer, the hoisting engine and engineering and surveying instruments.

It has been decided to carry this series of historical articles into additional fields which, according to present plans, will include the road grader, the clamshell and orangepeel buckets, the trench excavator, the belt conveyor, the bucket loader, and other standard forms of contractors' equipment.

In an early issue of this journal the historical series will be resumed with some facts about a widely-used engineering tool—**The Road Grader.** This machine dates back to the seventies when Samuel Pennock designed and patented the first grader. Subsequent improvements have included the reversible feature common to all modern graders, 12-ft. instead of 7- or 8-ft. blades, offset hitches, sliding frames, leaning wheels, back-sloper attachments, elevating machinery for handling the excavated earth, and strengthened parts for tractor instead of team haulage.

Every contractor and every engineer will find it worth while to know something about the origin and development of the equipment he uses. To-day's standard improved types present an instructive contrast to the primitive forms of machine used by previous generations of constructors.

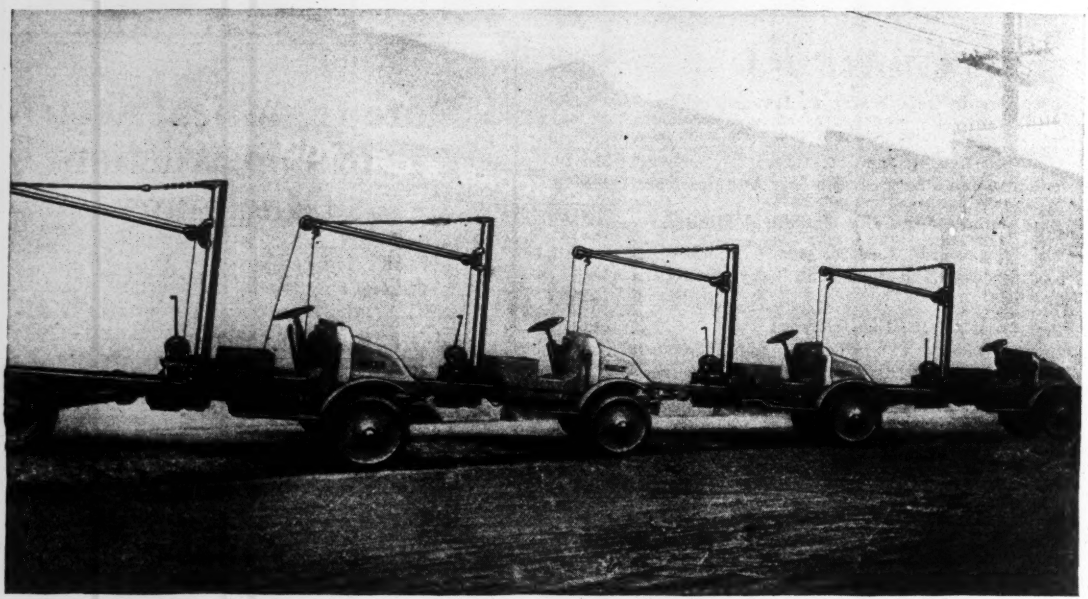
MEAD-MORRISON



PART OF A TRUCK FLEET RECENTLY SHIPPED TO JAPAN—EQUIPPED WITH MEAD-MORRISON WINCHES AND CRANES

Cheaper Than Japanese Labor—

Mead-Morrison Winches and Cranes

EVEN in Japan, where labor is at its cheapest, the time and money saving advantages of Mead-Morrison Winches and Cranes are apparent. How much greater is the economy of this equipment in the United States, where labor costs are high?

With a Mead-Morrison Crane and Winch on your truck, you can handle a heavy loading or unloading job with a crew of two or three men. The crane operates on the truck engine's idling power—raises, swings and lowers loads rapidly and surely. The crane mast is easily dismounted, leaving the winch available independently for hoisting or hauling.

Write for full information.

The Most Economical Concrete Roof Construction

Hy-Rib used in this roof construction insures the lightest, most economical concrete roof with a big saving in labor.

Truscon ¾-in. Hy-Rib for roofs gives the most economical, properly waterproofed, concrete roof construction on the market.

Truscon ¾-in. Hy-Rib is more than a metal lath. It is a concrete reinforcement for roofs, tanks, arches and floors. It saves forms. For arched floors, balconies and other construction, where elaborate and expensive wood forms are usually required, ¾-in. Hy-Rib can be used with a big saving in material and labor.

Its economy is due to the fact that Hy-Rib is easily handled and quickly placed. It is a permanent fireproof construction, universally adaptable for practically any type of flat slab or arched floor construction.

The varieties of its uses with concrete are unlimited. The character of its uses varies with each job. Let the Truscon Engineers co-operate with you in designing your next building. No obligation on your part.

TRUSCON HY-RIB

Maximum Economy from These Automatic CP Compressors

INTERMITTENT loads are efficiently handled by these electrically-driven automatic CP Compressors. They start and stop automatically within predetermined pressure limits; they never idle or run partially unloaded. Electric current, lubricating oil and circulating water are simply and positively controlled by air demands thus effecting maximum economy.

This automatic control can be applied to single or two-stage compressors in capacities of 15 to 1200 cu. ft. per min. and for pressures up to 300 lbs. per sq. in. Automatic CP Compressors should be used whenever and wherever there is an intermittent demand for air power.

In the interests of economy for those plants using a large volume of compressed air part of the time and intermittently the remainder of the day it is well to use Automatic CP Compressors, electrically-driven and provided with a simple control for changing from constant use to intermittent service.

Any of the following branches will give you complete information about the Automatic CP Compressor—*the Compressor that operates only when needed.*

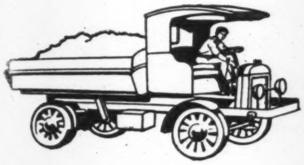
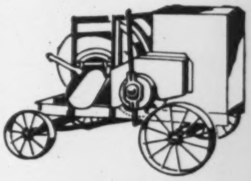
CHICAGO PNEUMATIC

Depend upon that Name



If your truck drivers had to
shift gears 15 or 20 times a minute—

If your concrete mixer operator had to
throw clutches 15 or 20 times a minute—

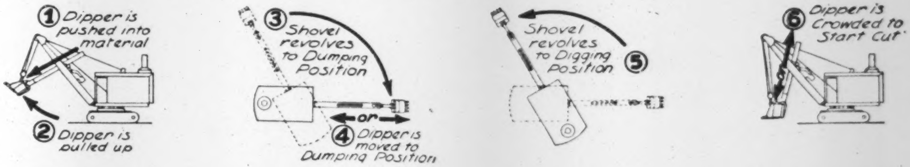


What kind of power would you use?

The answer to this question is easy. You would use steam power, to speed up your work by getting flexibility, and ease of operation, through direct throttle control of each operation.

There are some contractors who think that the same satisfaction can be secured from gasoline power when used on a power shovel, as they get from gas drive on a truck or concrete mixer—overlooking the entirely different problem of shovel work.

Here is a sketch which gives a clear idea of the problem:



① Dipper is pushed into material
② Dipper is pulled up
③ Shovel revolves to Dumping Position
or
④ Dipper is moved to Dumping Position
Shovel revolves to Digging Position ⑤
⑥ Dipper is Crowded to Start Cut

EVERY TIME the shovel's dipper picks up and dumps a load of material, there are six or more *separate applications of power in different directions.* (More than six, when it is hard digging and the dipper must make two or more bites in order to fill).

Yet when independent sets of steam engines are used for the hoisting, crowding and swinging— the shovel can perform this complete digging cycle smoothly and easily *in 10 to 20 seconds.*

That's why you hear of so many contractors getting 600 to 700 cubic yards a day, or even more, from steam ERIES digging in a fairly high bank with plenty of cars or trucks to haul the material away.

Up to the present date, there is no other type of power which can even approach steam for general shovel work. The *flexibility* of steam is of the greatest importance for taking loads which are continually jumping from zero to 150% overload or more. The cushion effect of the steam is a valuable factor in protecting the machine which is facing these conditions.

The ERIE'S ease of operation, and *reliability*, far more than offset any minor convenience of feeding the shovel gasoline instead of coal and water. Its extra output — greater earning power — makes any possible fuel saving triflingly small by comparison. Don't "Save at the Bung and Waste at the Spigot."

Unless you are working in an arid section where water is almost impossible to get— or working where gasoline costs almost nothing, and coal or fuel oil are extremely high — or are digging easy material with only intermittent requirements—

A steam ERIE is the machine to use. It will give you *output.* In June, 1924, there is nothing else that will tackle real digging like a steam ERIE does.

That is the reason why contractors are buying far more steam ERIES than any other $\frac{3}{4}$-yd. excavating machine —

And also, that's why it pays to get definite figures on outputs which have been regularly obtained, before you buy excavating plant for any job.

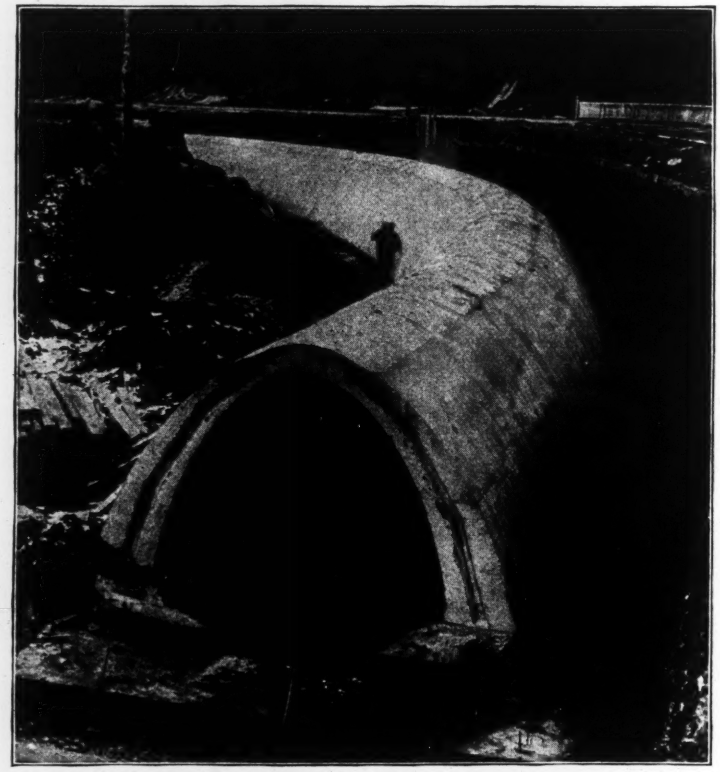
"ASBESTONE"

"Enduring as the Pyramids"



End section of arch, New Water Supply at Washington, D.C. This job consists of nine miles of horseshoe shaped cross sections of reinforced Concrete. It has a large number of sharp and difficult curves. The work is being done by the Arundel Corporation under the supervision of L. H. Beach, Maj. Gen. and Chief of Engrs. U. S. War Dept.; J. A. O'Connor, Maj. Corps of Engrs. U. S. A.; and E. D. Hardy, Asst. Engr. U. S. Engr. Office.

Another Example of Quality Control in the Field

Government engineers, too, are applying laboratory principles to control the quality of Concrete.

On the New Water Supply Conduit at Washington, D. C., they are carefully grading the aggregates. They keep constant check on the water content. They maintain a minimum time for mixing.

The strength assumed for the Concrete was 2000 pounds. The minimum strength maintained day after day—as shown by hundreds of tests made by the U. S. Bureau of Standards—is 2500 pounds.

Have you seen previous advertisements of this series, telling about some of the many other jobs where modern field methods of control are directly helping to assure Concrete of uniformly greater strength? Proofs of these advertisements will be sent you on request. Address the nearest office listed below.

ONE HUNDRED YEARS OF PORTLAND CEMENT 1824 1924

Our Booklets are sent free only in the United States, Canada and Cuba

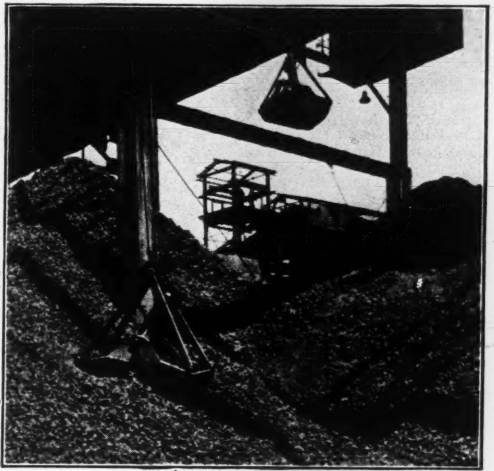
14 years ago, Back in 1910

When Princeton's President became Governor of New Jersey

These 2 Veteran WILLIAMS Buckets went on duty at Providence

Two more "Honor Roll Veteran" Williams Buckets

In all these years, the two Williams "Standard" Buckets that went to the Providence Gas Company back in 1910, have been giving the same satisfactory service.



For 14 years these two "veterans" have been handling coke, often frozen. Working today just as they did when new — and "the cost of upkeep has been unusually low with both buckets," write the owners.

Because of the splendid record made by these two veterans, the Providence Gas Company now uses 8 Williams Buckets all told.

You Will Get the Same Good Results with WILLIAMS Buckets

There is no need to "take a chance" when buying a bucket. Use the Williams, and you are sure of dependable service year after year.

Every Williams Bucket carries this unique guarantee: *"All parts guaranteed against breakage, as long as the bucket is used on the kinds of work we recommend it for."*

There's a WILLIAMS Designed to Handle Your Work

Probably one of the 12 regular types of WILLIAMS Buckets will give the results you want. Sold with a definite guarantee to do your work.

Write for interesting photos, which show the results being obtained by the use of WILLIAMS Buckets. Tell us your particular requirements.

G. H. WILLIAMS COMPANY, 601 Haybarger Lane, Erie, Pa.

WILLIAMS

QUICK-ACTING CLAMSHELLS

All Parts Guaranteed Against Breakage

Dependable service, with low upkeep cost, because of these construction features:

All steel — no cast iron sheaves or other iron parts.
All moving parts are bronze bushed — and easy to get at.
Sheaves turn on oversized pins, extra large diameter, and are held in perfect alignment by the triangular arrangement of the corner bars.
Practically no wear at the hinge pin — since the outer shell lugs are pinned to the main shaft, instead of turning on it.
Roller rope guards, used as line guides at the head of the bucket, prevent fraying of the cable.
All sheaves are in line, on every Williams — no "side leads" to cause rapid wear of cable.

The "Standard" gives good results on any equipment with two drums for bucket operation, such as guy and stiff leg derricks, locomotive cranes and overhead cranes.

It operates with three parts of closing line, and the short cable overhaul speeds up opening and closing. The leverage of the Williams Power Arm gives plenty of closing power for a quick bite into coal, gravel, etc.

No material is spilled between the lips, as the large one-piece hinge bearing holds the scoops in perfect line, even after years of service.

The "Standard" carries the regular Williams guarantee.

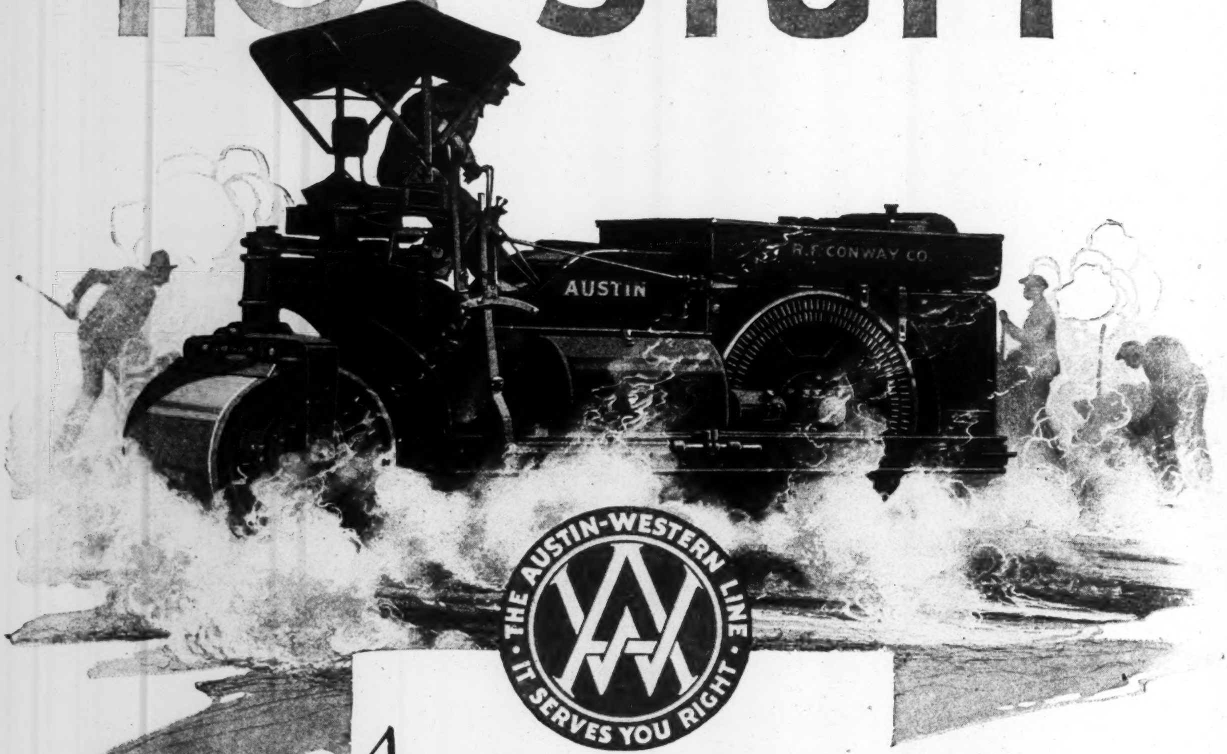
PICK A PARSONS *and* QUIT PICKING

"HOT STUFF"



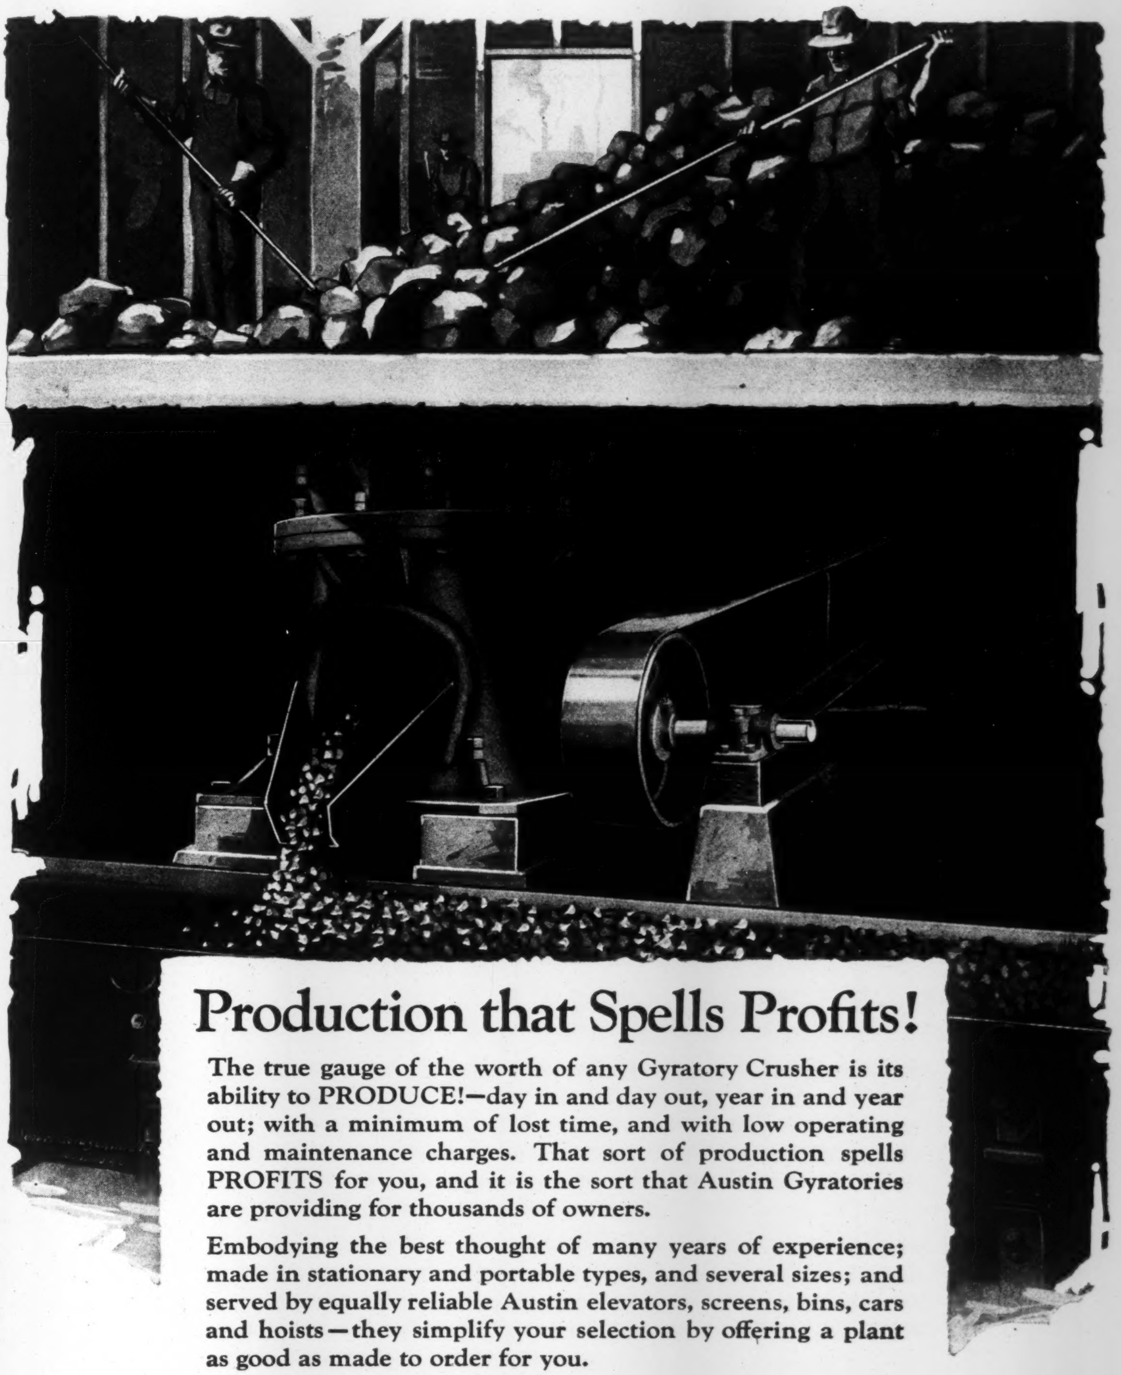
A rush job on one of the World's busiest thorofares—Chicago's famous Michigan Boulevard—a job calling for work of the finest kind, done in the shortest possible time. The R. F. Conway Company landed it, and this Austin Motor Tandem Roller of theirs played no small part in completing it on schedule.

"Hot stuff" puts a tandem roller to the severest test, and that is where the motor driven Austin shines the brightest in comparison with those of the steam driven type. Check over a few of the features that have made Austins such lasting sources of satisfaction and profit to the Conway Company and many others among our more exacting paving contractors, and the answer is plain: No time lost getting up steam and taking on coal and water; no falling coals to injure the pavement; steadier running because of the low center of gravity; and easier steering and handling.

WHY TAKE LESS IN A TANDEM?

THE AUSTIN-WESTERN ROAD MACHINERY CO.

CHICAGO



Production that Spells Profits!

The true gauge of the worth of any Gyratory Crusher is its ability to PRODUCE!—day in and day out, year in and year out; with a minimum of lost time, and with low operating and maintenance charges. That sort of production spells PROFITS for you, and it is the sort that Austin Gyratories are providing for thousands of owners.

Embodying the best thought of many years of experience; made in stationary and portable types, and several sizes; and served by equally reliable Austin elevators, screens, bins, cars and hoists—they simplify your selection by offering a plant as good as made to order for you.

Special catalogs and bulletins describe the various types in detail. Tell us your needs, and we will send you full information.

AUSTIN MANUFACTURING CO.

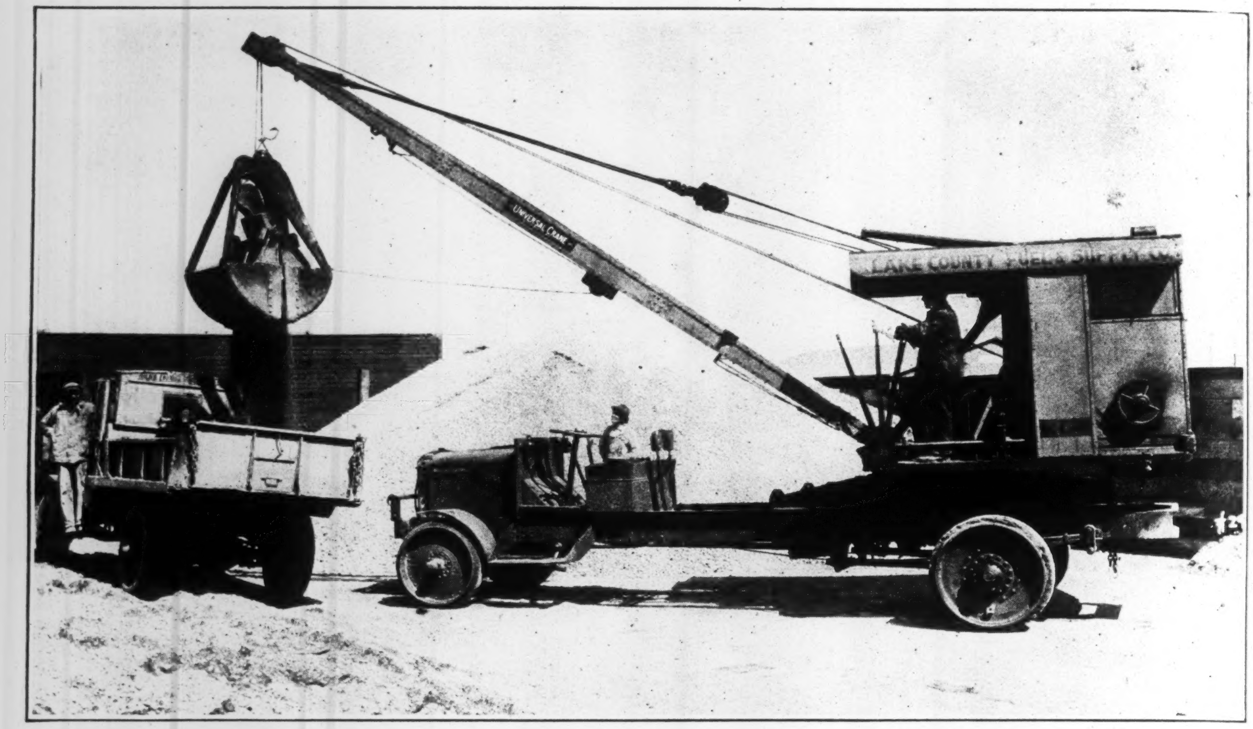
Speed—Mobility—Power—Strength



The Crane that has Them All!

All that you want in a crane, Universal provides,

Speed to finish the job in a hurry and at a profit.

Mobility for moving the unit to the next job quickly with the least wasted time.

Power to meet unusual demands and earn profits impossible with less of it.

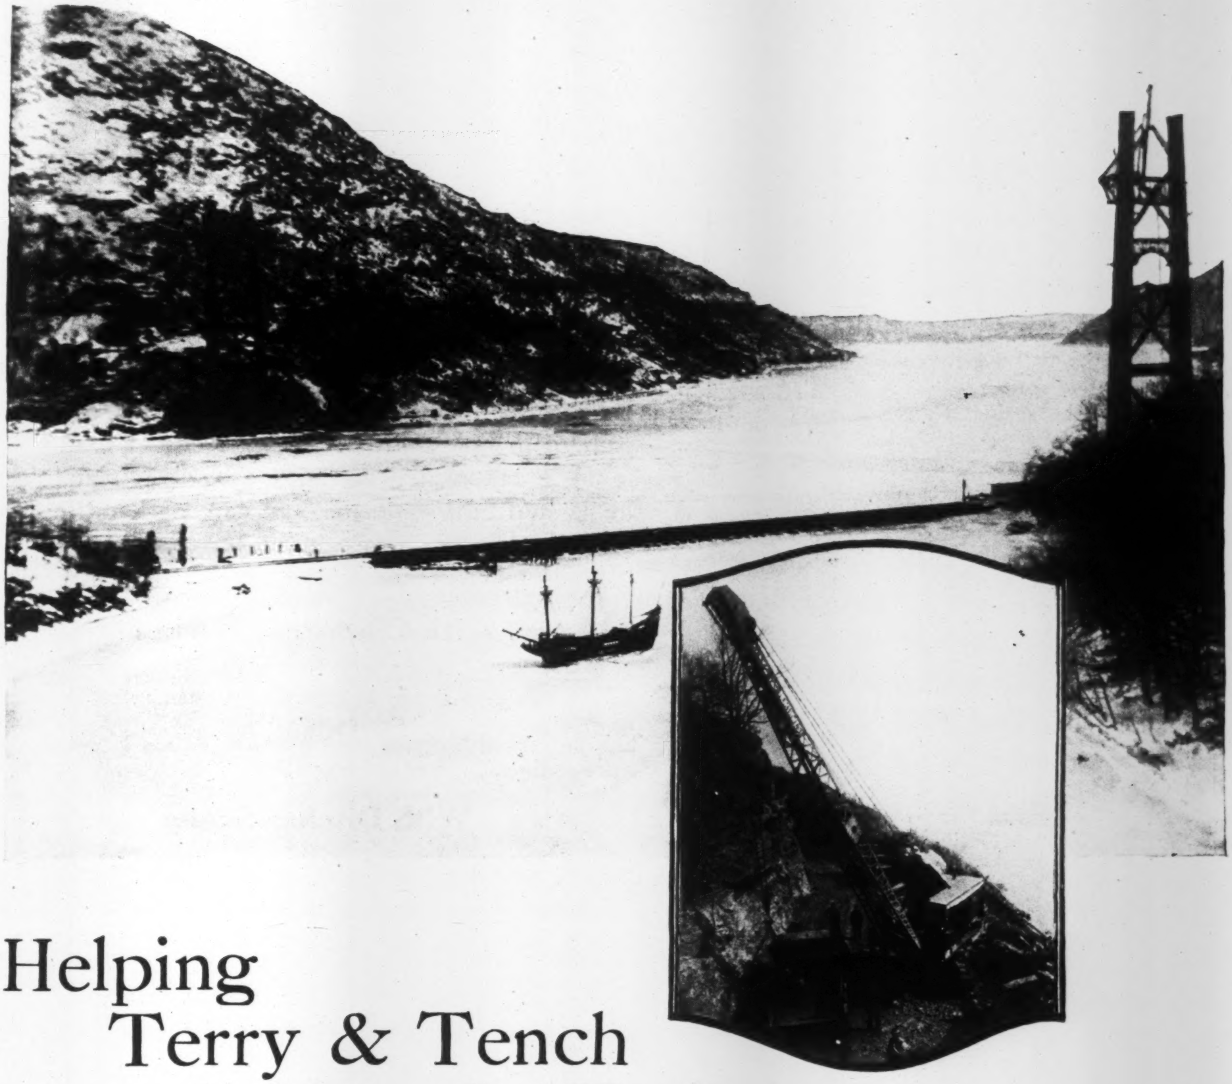
Strength for endurance, giving ability to run day and night, week after week, without delays, if the job demands it and to keep giving economical service for years to come.

It is because Universal gives you all these in abundance that owners stick to Universals and *One out of every four sales is a repeat order.*

It will pay you to get complete details about this crane.

Wire or write for Bulletin No. 226

The Universal Crane Co., 1144 Swetland Bldg., Cleveland, Ohio



Helping Terry & Tench bridge the Hudson

WORKING in the shadow of Anthony's Nose, a Northwest Convertible Crane is helping Terry and Tench to bridge the historic Hudson. Here on fabled ground, beneath the site of old Fort Clinton and above the little replica of Hendrick Hudson's Half Moon the "Last Word" in gasoline crawler cranes is helping to reduce construction costs for Terry and Tench.

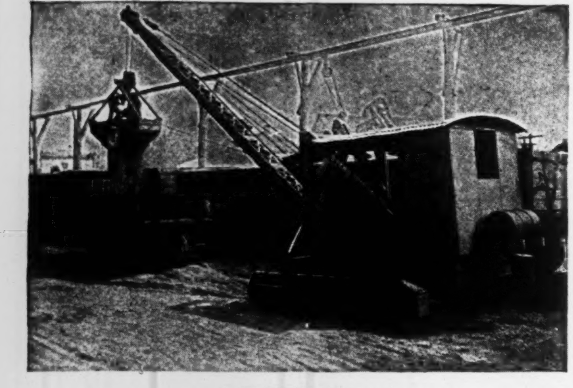
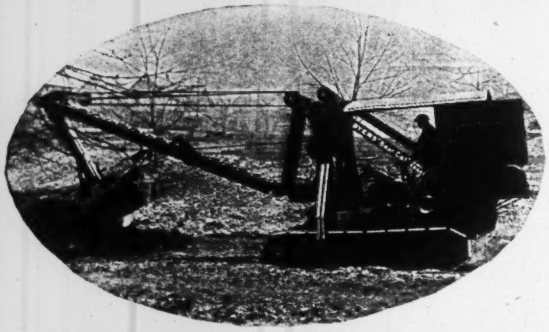
BYERS





Three machines in one, a material handler, a ditcher, a grader and excavator—and a "Bear Cat" at all three jobs.

The "Bear Cat"

The reports that are coming in from the owners of Byers "Bear Cat" Cranes are almost too extravagant to print. Matched against bigger cranes of much greater rated capacity, the "Bear Cat," due to its swiftness, mobility and ease of handling, is actually doing more work in some cases, and doing it much more economically.

With Clamshell Bucket

Handling loose materials of all kinds with a ½-yard clamshell bucket, two or three round trips of the boom per minute can be expected from an average operator. The "Bear Cat" can also do ordinary digging with a clamshell, and is being used successfully on such work right along.

With Ditcher Scoop

At sewer and trench work the "Bear Cat" with ditching attachment is a whirlwind. The full caterpillar mounting gives the traction and mobility necessary and the work moves along with a speed and steadiness that can only be appreciated in the actual seeing. This attachment is offered in two widths, 18 and 24 inch, and operates to a depth of 15 feet.

With Shovel Attachment

The "Bear Cat" is a very efficient grading tool with the Byers-Fogarty shovel attachment or skimmer scoop. On tough, extensive jobs of road grading it has proved entirely satisfactory, and more and more buyers are ordering this attachment now along with one or both of the others.

With these interchangeable attachments, the owner of a "Bear Cat" has virtually three machines in one, earning money all the year around.

Don't lose out on this summer's business. Let us send you more information.

THE BYERS MACHINE COMPANY

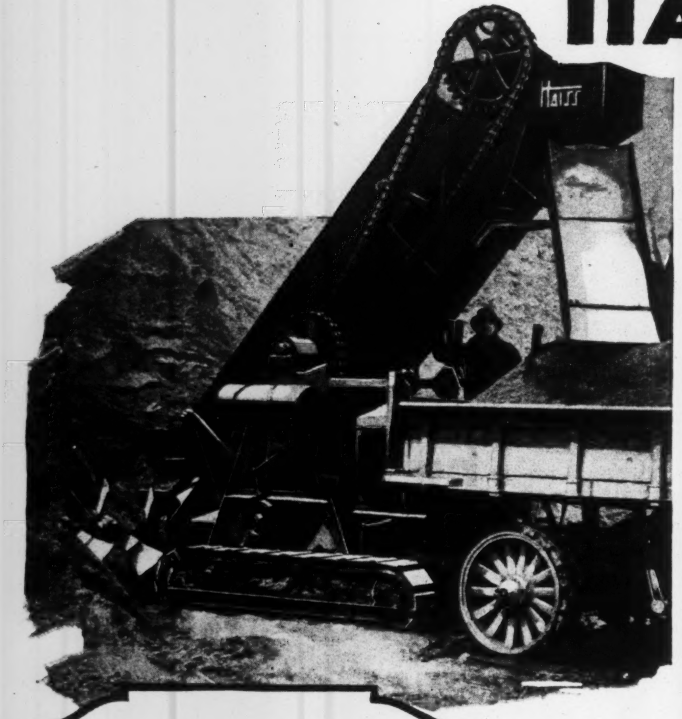
BLAW-KNOX BUCKETS

Low Upkeep? You get full measure in the sturdy built HAISS Creeper Loader!



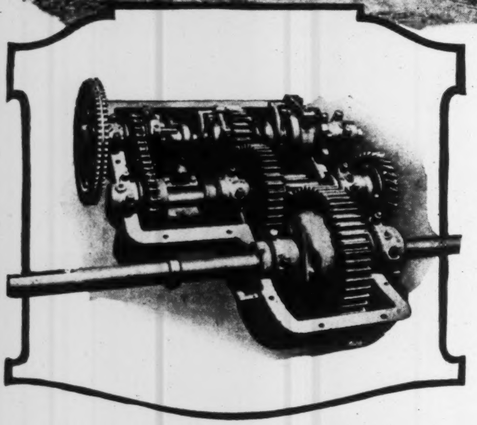
Haiss builds a machine that costs least over a period of years. How so? Every part is strong, no expense is spared to use the best materials for particular purposes. Remember, except for some bearing blocks, the whole machine is built of steel. Haiss uses steel castings for every cast part under strain. You don't have breakages.

Every provision is made to keep dust and grit from the wearing parts. The *enclosed transmission* alone should make the Haiss your unmistakable choice among loaders. All the gears, and clutches too, running in an oil bath, wholly enclosed and protected from dust and dirt. If you ever owned an open shaft machine you must know how quickly the clutches wear when exposed to stone dust flying around. The time you save in not making clutch adjustments every little while is worth a lot to you.

Alemite lubrication on all bearings and the Haiss designed hollow creeper tread rollers packed with grease make these machines truly economical. There's ample lubricant where the friction comes and hard steel parts to stand the gaff.

See the specification of materials in Catalog 523

The George Haiss Manufacturing Company, Inc
140th Street and Rider Avenue
New York, N. Y.



The Enclosed Transmission

marks the Haiss as a good machine to own, all the clutches are inside and the size and weight of the gears speak for themselves.

Seven Years' Continuous Service and Still on the Job

The Hughes-Foulkrod Co., have 12 "Standard" Mixers in operation at the present time.

"The Standard" Mixer shown in the photograph below has been in continuous service for seven years for the Hughes-Foulkrod Co., Philadelphia and Pittsburg Contractors. On this job it mixed the concrete for the foundations and at the time this photograph was taken, was mixing the mortar for the brickwork.

This "Standard," like many others in use throughout the country, has given satisfaction and has been absolutely reliable during its years of service—and even now, it shows no signs of wearing out—no mean accomplishment after the thousands and thousands of yards of concrete and mortar it has mixed.

To reliable and well rated contractors who are in the market for a machine, we offer "The Standard" for 15 days' trial. Write us for further information and a new catalog.

THE STANDARD SCALE & SUPPLY CORPORATION

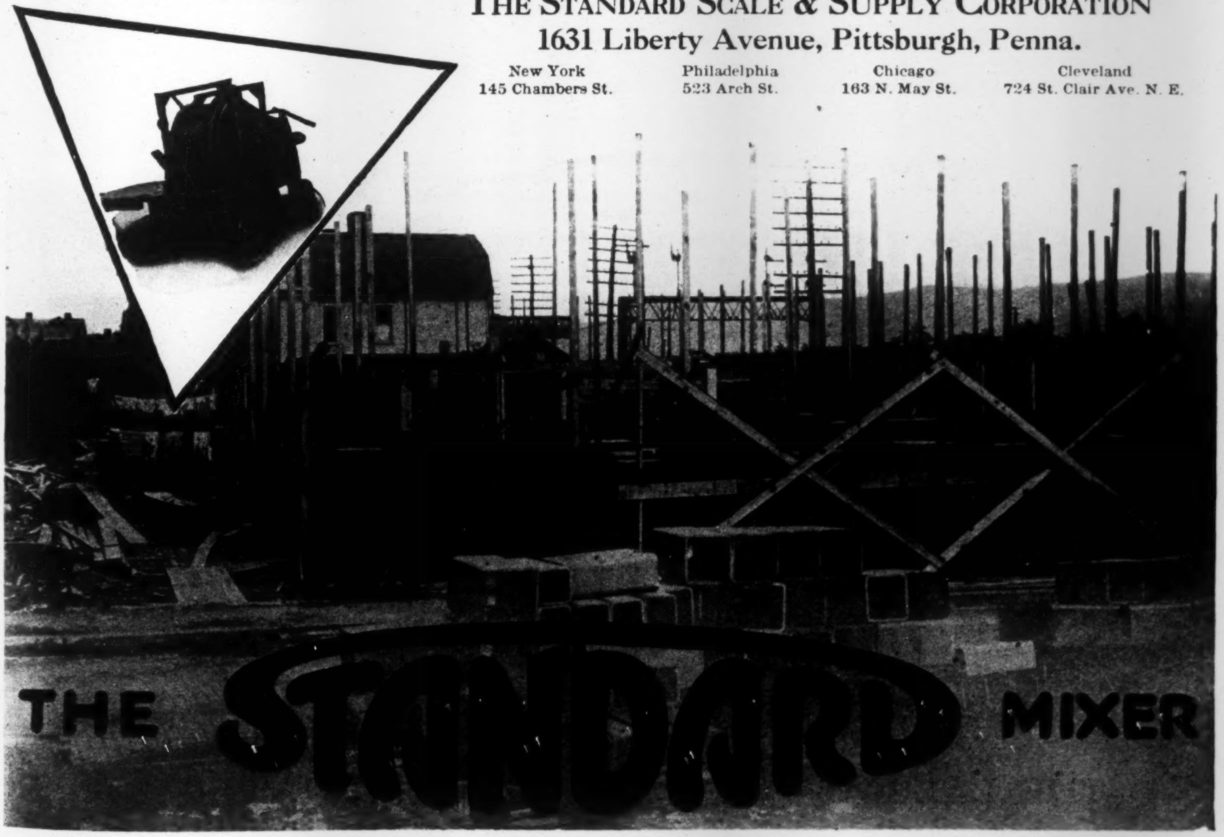
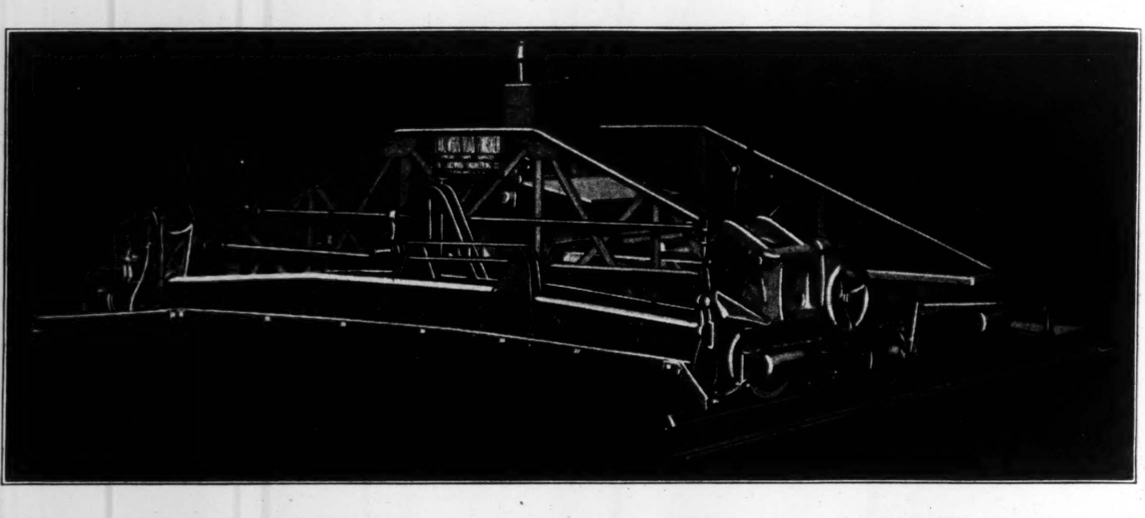
The seven year old "Standard" Mixer in use on an apartment house job at Leetsdale, Pa.





The FINISHER and the FLOATBRIDGE

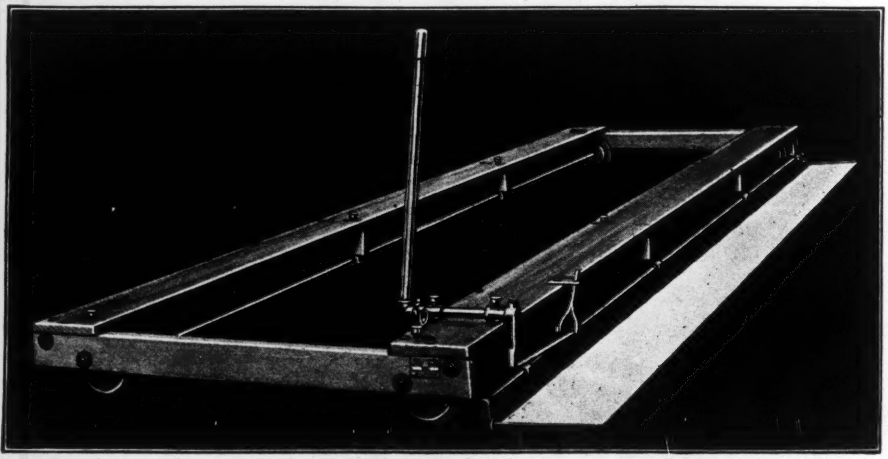
Is indispensable where 1 to 2 inch slump concrete must be finished—It Spreads, Tamps and Floats.

Combines a Substantial Bridge and Hand-operated Finishing Belt.

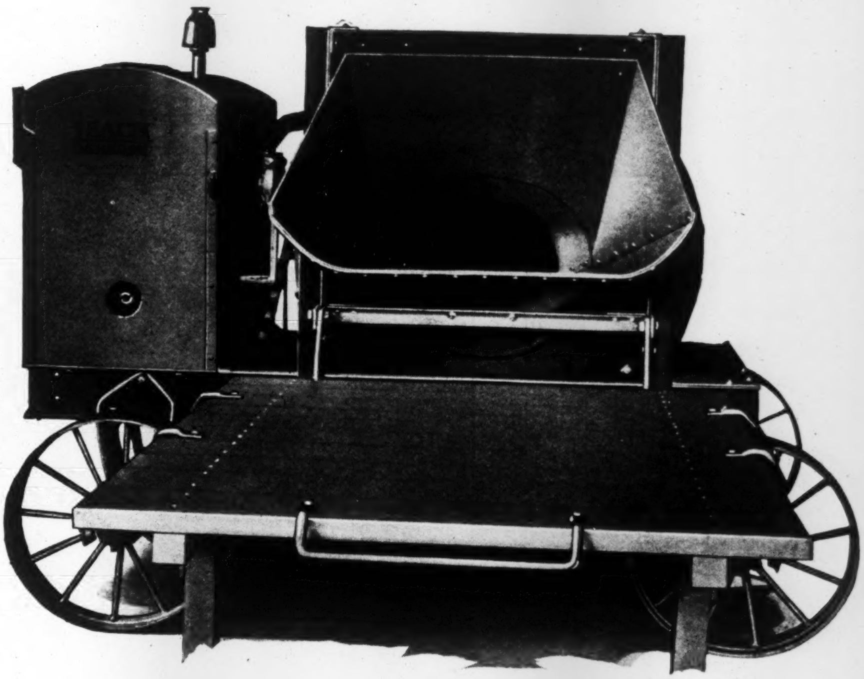
That better concrete of greater density results from the tamping action of the Lakewood Finisher is conclusively proved by core tests made in many localities. Not only does the tamping produce a smooth surface but elimination of voids results in *greater density to the very bottom of the slab.* Eleven years' experience and over 1,200 machines have proved the Lakewood principle of tamping concrete to be correct. There is no substitute for, or any method "just as good" as mechanical tamping. The 1924 Model Finisher gives a contractor more real value than ever before. This machine, with good forms, will give a smooth surface at a less cost than hand methods.

The belt float on the Lakewood Floatbridge is operated by the lever shown. The machine automatically advances with each stroke. In addition, the substantial bridge offers a support for trowelling and touching up. It's the handiest tool on the job. Made for 8 to 30 ft. widths. Used also on city street work, and can be furnished to travel on the curbs. Each machine has an extra belt as standard equipment.

Bulletin 42-R gives complete details of the Lakewood Finisher and the Floatbridge. Yours for the asking.



THE LAKEWOOD ENGINEERING CO., CLEVELAND



To the man who knows how to size up a 7-S mixer—

GO over the Leach-Oshkosh Mixer from wheels to exhaust. You'll find—if you know what's good and bad in mixers—that this is one 7-S Mixer without a single weak point.

The first thing that you'll look for is mixing speed—and you'll find it.

Time the drum speed of the Leach. You'll find that the Leach drum goes 3 to 5 revolutions per minute faster than you've ever seen a 7-S drum go. But that isn't all; the mixing action is perfect because of the correct design of the mixing blades.

And now look at the discharge chute. It's longer and wider than any chute you've ever seen on a mixer of this size—36 inches long and 15½ inches wide. It's the pivoted type and has a steeper slope than you're accustomed to seeing—6 degrees greater than the average slope of the discharge chute in other 7-S mixers.

Try the short discharge lever. The action is easier—simple linkage and good balance are responsible for that action. And don't overlook the locking device that holds the chute in the discharge position. No wonder the Leach-Oshkosh discharges in 7 to 8 seconds!

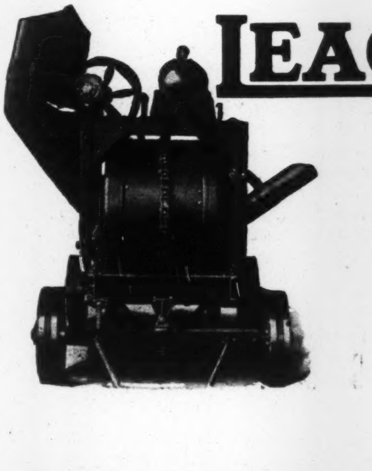
Now go around to the charging side and look at the big receiving hopper. The lower edge is only 13 inches above the platform. You'll know how convenient this is when you dump a wheelbarrow of sand into the drum through the big opening. Just one more Leach refinement!

There isn't enough space here to cover the hundred and one distinguishing points of the Leach and its trouble-proof engine, but it doesn't take a practical man long to discover them.

The coupon below brings a book covering the Leach in detail and including the Robert W. Hunt Company inspections described below.

Mail it.

Leach Company, 649 S. Main St., Oshkosh, Wisconsin
Formerly Oshkosh Mfg. Co.



LEACH - *Oshkosh* MIXER

Leach leads!

The Robert W. Hunt Co., nationally known research engineers, has made a careful engineering investigation of most mixers of the 7-S class. These investigations are significant to every careful buyer of concrete mixers. The coupon opposite brings your copy.

for Industrial Driveways, Factory Yards, Sidewalks and Driveways

Driveways, Factory Yards, and Sidewalks, when built of *reinforced* concrete, will outwear and outlast any and all other types of construction.

For *invisible* strength and for permanency, use National Steel Fabric Reinforcement because it provides the greatest amount of strength for a given amount of steel and, at the same time, is less costly to transport, handle, and place in the concrete.

Get in touch with our nearest office regarding your requirements.

National Steel Fabric Company
(Subsidiary of Pittsburgh Steel Company)

Furnished in Rolls and Sheets

NATIONAL STEEL FABRIC CO

WORLD'S LARGEST MANUFACTURERS *of* WELDED STEEL FABRIC

Greater Possibilities

THE INSLEY STEEL MAST HOIST plant has greater possibilities for the handling of either a 7-S or 14-S batch than almost any other equipment available to the concrete builder.

Its purchase and erection costs are such it does not mean the tying up of anticipated profits in equipment on the medium sized job.

Its operating efficiency is superior to that of the wood tower equipment heretofore used in that it is possible to reach 60 ft. with self supported chuting.

Its salvage value is high in that outside of chutes and sheaves there are practically no parts subject to wear. It is good for job after job.

If you have concrete to handle it will pay you to write for Catalog No. 45.

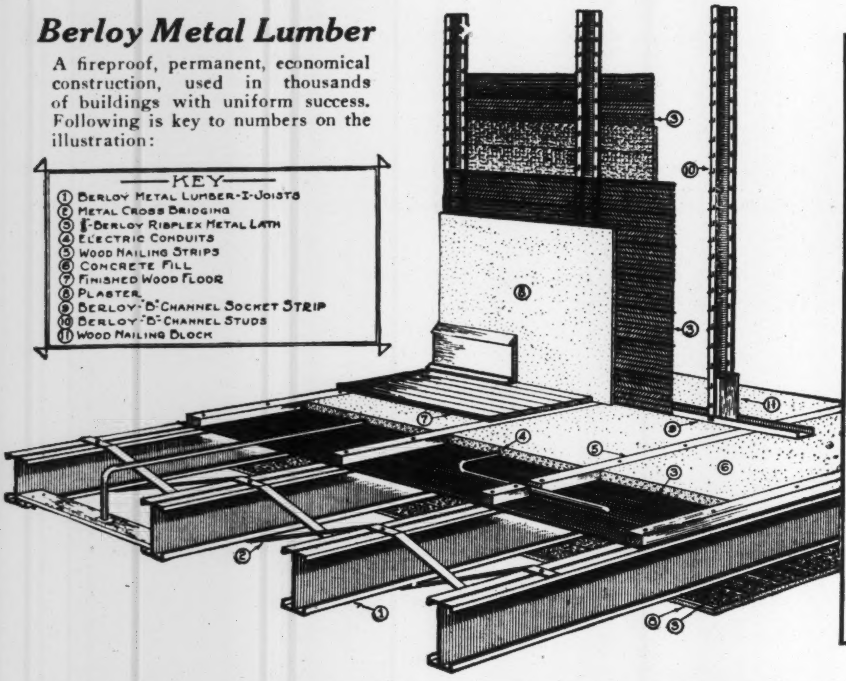
Berloy Metal Lumber

A fireproof, permanent, economical construction, used in thousands of buildings with uniform success. Following is key to numbers on the illustration:

KEY

① Berloy Metal Lumber-I-Joists
② Metal Cross Bridging
③ ⅜-Berloy Ribplex Metal Lath
④ Electric Conduits
⑤ Wood Nailing Strips
⑥ Concrete Fill
⑦ Finished Wood Floor
⑧ Plaster
⑨ Berloy-"B"-Channel Socket Strip
⑩ Berloy-"B"-Channel Studs
⑪ Wood Nailing Block



Brick walls are not enough, Furnace walls, too, are made of brick

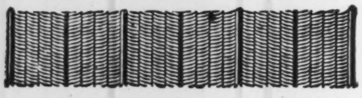
More than ninety fires out of a hundred originate on the interior.

In view of this fact it would seem that far too little attention has been given to making interiors fireproof or at least fire-resistive.

This page tells about fire-safe interior constructions that have been used in thousands of buildings.

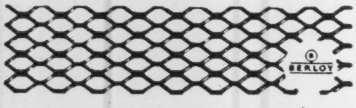
THE WAY TO FIRE SAFETY

Berloy ⅜ in. Ribplex



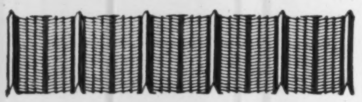
Metal Lath with ribs ⅜-in. high spaced 8-in. on centers. Ideal for all straight away lath work.

Diamond Mesh Lath



Essential for ornamental furring and other formed lath work. Excellent for all lath purposes.

Berloy ¾ in. Ribplex



For work requiring heavier, stiffer reinforcement Ribs are ¾-in. high spaced 4.8-in. on centers.

Our nearest sales office will gladly give you full information on the Berloy line of Metal Laths for use in any form of lath work as well as with Metal Lumber.

Fire losses continue to mount

In spite of propaganda against carelessness. In spite of efficient fire departments. In spite of brick and stucco walls. In spite of metal or other unburnable roofs our fire losses continue to mount.

One building burns to every four built

This is an average, over ten years.
Engineers! Architects! Contractors! Building Owners, why?
Let's face this thing squarely. What is the fundamental weakness?
What should we do to save our buildings?

We must stop providing available fuel

It is not an uncommon thing for a building to be a mass of flame within ten minutes after a fire starts. Fire departments have no chance to save the building. Inmates often fail to escape with their lives.

Most fires originate on the interior

Ninety-six percent of all fires are said to originate inside the building. Carelessness, overheated furnaces, defective wiring, and dozens of other causes of fires cannot be controlled. Fires will continue to start.
Interiors should be made fire resistive by protecting burnable material, or, better still, fireproof throughout.

Ideal fire-safe interior constructions

Berloy Metal Lumber provides an economical fireproof interior construction. The Underwriters' Laboratories have given an official rating of one hour to wood frame partitions and ceilings protected by plaster on Metal Lath. Our nearest office will gladly give you full information on these materials. Ask for Metal Lumber Bulletin L-24 or Lath Folder F-24.

RAIL STEEL
REAL STRENGTH

Rail Steel and Building Authorities

'THE BROWN HOTEL, LOUISVILLE, KY.
W. J. Knight & Co., Engineers
Preston J. Bradshaw, Architect
McCormack-Combs Const. Co., Contractors

Municipal building codes have been devised solely for the purpose of public safety. Their specifications define the best accepted economic practice based on years of experience in the use of building materials.

Our principal cities where the largest buildings are being erected and where the utmost care must consequently be exercised have shown their confidence and taken the lead in including Rail Steel Bars in their specifications.

The following is a partial list of these cities, which gives conclusive proof of the dependability of Rail Steel Bars, rolled by mills of the Rail Steel Products Association.

List of Principal Cities

Akron, O.
Atlanta, Ga.
Boston, Mass.
Cambridge, Mass.
Chicago, Ill.
Charleston, S. C.
Cincinnati, O.
Cleveland, O.
Columbus, O.
Dallas, Tex.
Denver, Colo.
Des Moines, Ia.
Fort Worth, Tex.
Grand Rapids, Mich.
Hartford, Conn.
Hamilton, Canada
Indianapolis, Ind.
Jacksonville, Fla.
Kansas City, Mo.
Kitchener, Canada
Los Angeles, Cal.
Louisville, Ky.
Lowell, Mass.
Memphis, Tenn.
Milwaukee, Wis.
Mobile, Ala.
Montreal, Canada
Newark, N. J.
New York, N. Y.
Orange, N. J.
Pittsburgh, Pa.
Portland, Me.
Portland, Ore.
Providence, R. I.
San Francisco, Cal.
Schenectady, N. Y.
Scranton, Pa.
Spokane, Wash.
Springfield, O.
St. Louis, Mo.
St. Paul, Minn.
Syracuse, N. Y.
Toronto, Canada
Utica, N. Y.
Winnipeg, Canada
Windsor, Canada
Worcester, Mass.

Send for this Valuable Book—Free

The first and only authoritative and comprehensive treatise on concrete reinforcing bars and containing most important information on the manufacture, qualities and use of Rail Steel Bars. The cost of this booklet makes it necessary for us to control its distribution and we ask that your request for copy be sent us on the letterhead of an architectural or engineering firm. Address the nearest office, Dept. A.

The Rail Steel Products Association was organized to continue and further promote the high quality standard of Rail Steel, established after many years of co-operative research work by the metallurgists of the individual rolling mills who are now members of this Association.

Specify your reinforcing steel to meet A.S.T.M. Specification A-16-14 or equal.

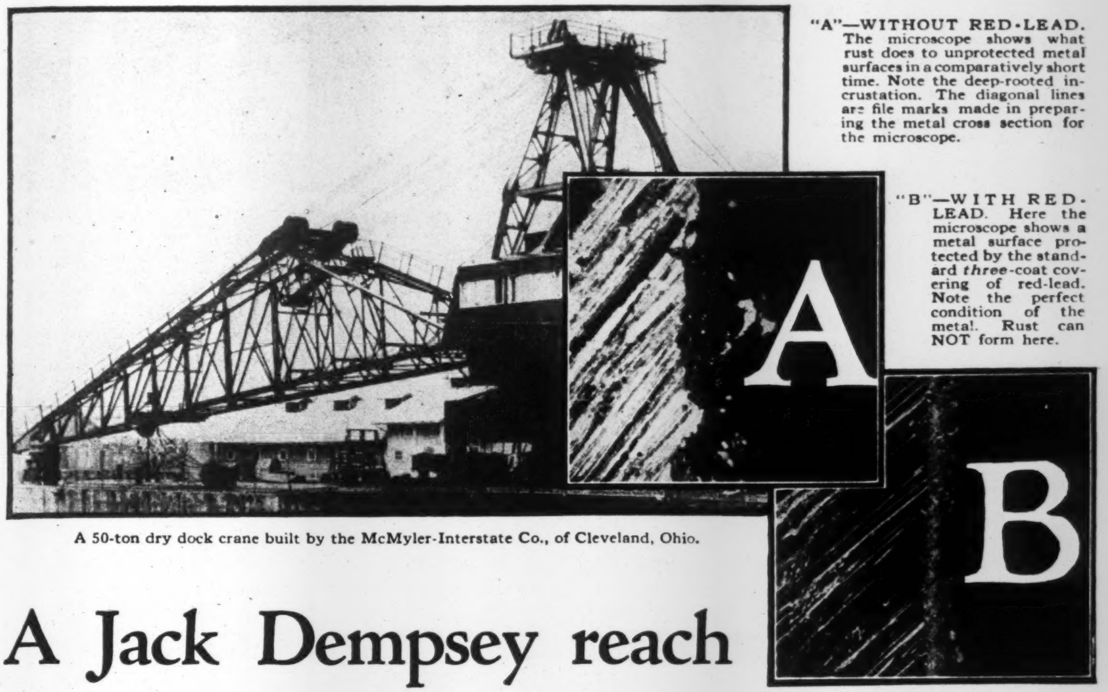
RAIL STEEL *for* REINFORCING



"A"—WITHOUT RED-LEAD. The microscope shows what rust does to unprotected metal surfaces in a comparatively short time. Note the deep-rooted incrustation. The diagonal lines are file marks made in preparing the metal cross section for the microscope.

"B"—WITH RED-LEAD. Here the microscope shows a metal surface protected by the standard *three*-coat covering of red-lead. Note the perfect condition of the metal. Rust can NOT form here.

A 50-ton dry dock crane built by the McMyler-Interstate Co., of Cleveland, Ohio.

A Jack Dempsey reach but just a thin red film for defense

THE wheel base of this crane is only 22 feet. The overturning moment imposed by the loads at extreme radii is exceptionally large, yet it handles these loads with ease and safety—

Main Hoist, 50 tons at 90 ft., 6 in. radius
Auxiliary Hoist, 15 tons at 129 ft., 6 in. radius
Whip Hoist, 5 tons at 133 ft. radius

In designing this crane the engineering problem was complicated by the large overturning moment and also by the extraordinary wheel loads. The load is distributed over 32 wheels and is equalized by a system of equalizer beams, so that the loads on the wheels supporting one corner of the crane are uniform

Every square inch of metal on such important and costly equipment must surely be protected from rust. Red-lead may provide *only a thin red film for defense,* but the thin red film is adequate. Metal surfaces coated with pure red-lead are safe from rust. Dutch Boy red-lead is *pure* red-lead.

Save the surface and you save all

Mixed with pure linseed oil, Dutch Boy red-lead makes a paint that cannot be surpassed as a rust preventive. It spreads smoothly and uniformly and has unusual covering power. It sticks tight to clean metal. It dries to a hard, yet elastic, coating which expands and contracts without cracking. It gives *full* and *economical* protection to the metal surfaces it covers.

Dutch Boy red-lead is obtainable in both paste and liquid form. The *liquid* comes in the natural red-lead color and also in light and dark green, light and dark brown and black finishing coats. The *paste* comes in the natural color only, but can be shaded to browns, greens and blacks.

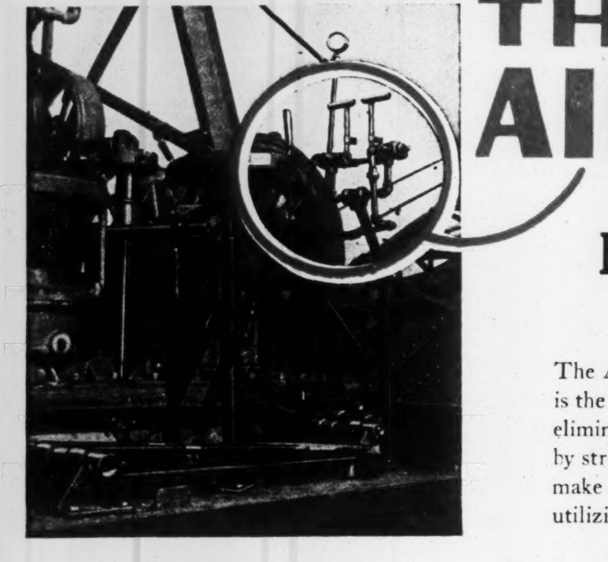
New York, 111 Broadway; Boston, 131 State St.; Buffalo, 116 Oak Street; Chicago, 900 West 18th St.; Cincinnati, 659 Freeman Ave.; Cleveland, 820 West Superior Avenue; St. Louis, 722 Chestnut St.; San Francisco, 485 California Street; Pittsburgh, National Lead & Oil Co. of Penna., 316 Fourth Avenue; Philadelphia, John T. Lewis & Bros. Co., 437 Chestnut Street.

Dutch Boy Red-Lead

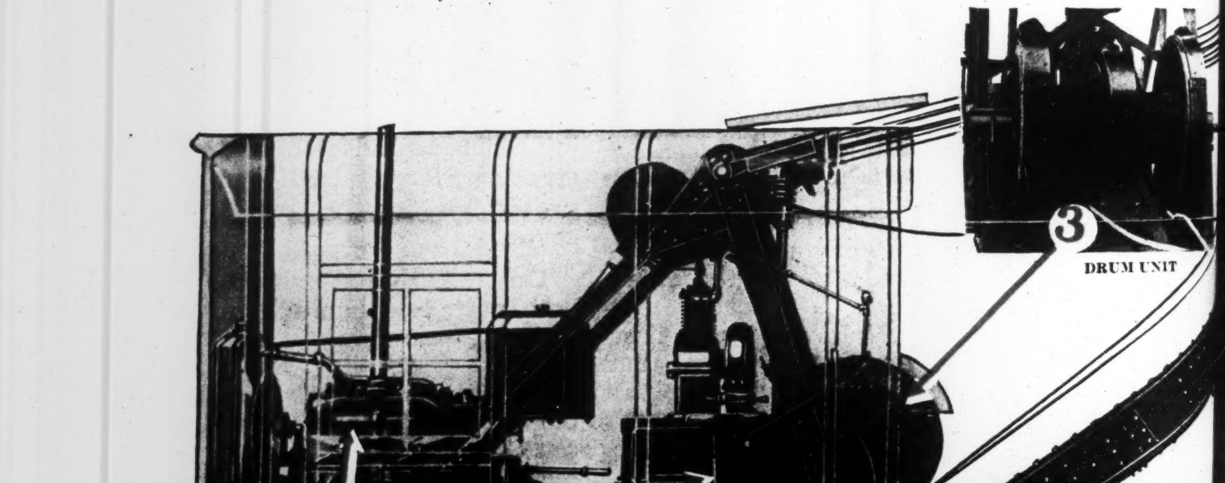
AUSTIN

THREE LEVER
AIR CONTROL



Direct Air Control for Drum Clutches

The Austin Air Control promotes efficient, speedy operation. It is the simplest form of control ever used for clutches, due to the elimination of toggles, fingers, etc. The clutches are operated by straight air, giving instant contact or release. These clutches make contact over the entire 360 degrees of clutch surface—thus utilizing the full power applied.

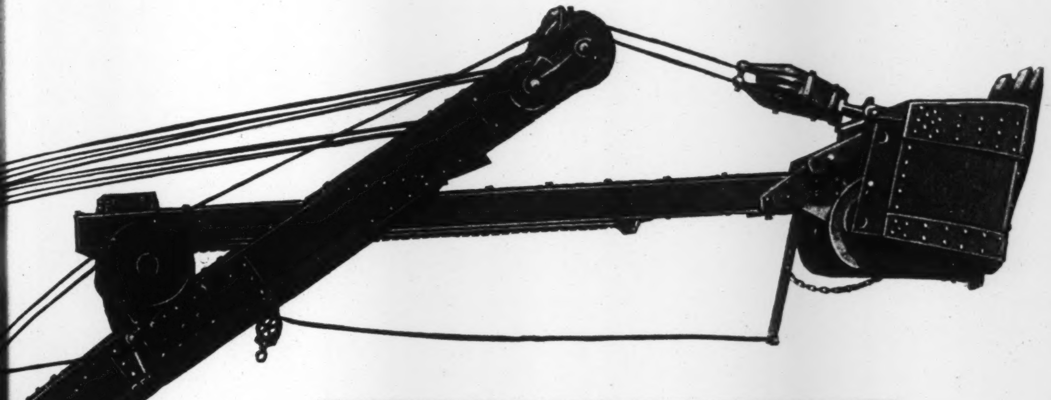


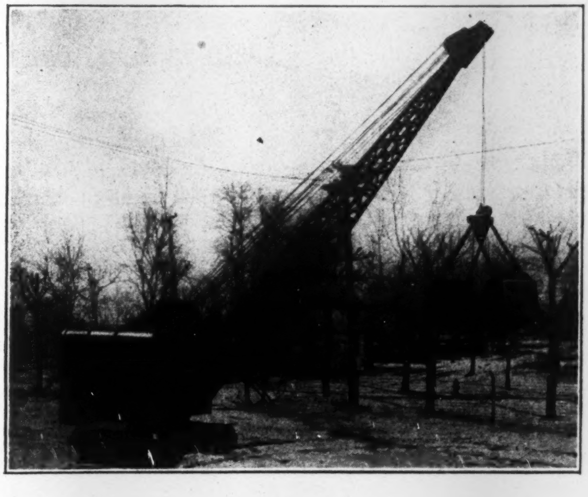
SIMPLEX SHOVEL

Speed with endurance is what you get when you purchase an Austin Simplex Shovel. It is speed that completes the job with a showing of profit. Endurance maintains the profit on every job over a long period. The simplicity of design reduces the number of wearing parts adding to the life of the unit in many ways. Heavy individual parts increase the strength of the machine—making a more rigid construction.

Rigid construction reduces the upkeep cost and insures low cost of operation.

Complete details given on request for folder DL 103-S





CONVERTIBLE

And the Simplex is designed for use as a Crane or Clamshell. Only a change of booms and re-reeve of cables is necessary. Buy a machine that you can keep profitably employed at all times—the Austin Simplex.

Fireproofing for steel must do *double* duty

A dependable fireproofing material for beams, columns and girders must do more than resist fire. It must *insulate* the steel so that its temperature will never exceed 500° F., the point at which steel begins to lose strength.

Pyrobar Gypsum Tile meet both requirements. Incombustible, they also bar heat travel, and when exposed to intense heat a slow calcination allows only 5 per cent of the heat to reach the steel. They protect against steel failure in most fires.

Pyrobar Tile come in uniform square-edge units. They are easily fitted to beams, columns and girders and consequently cost less in place than less protective materials. Write for booklet describing different types of Pyrobar covering and showing erection details.

CARNEY

for Brick and Tile Mortar

Makes Four Cubic Feet of Smooth Mortar to Every Sack

Carney Has These Exclusive Merits:

IT can be used directly after mixing or left in the box over night. There is no waste to Carney. It requires no lime which saves time and labor in mixing. It prevents loss and waste through carelessness. Each sack (cloth or paper) contains one cubic foot. It has a four parts sand carrying capacity which means four cubic feet of smooth mortar to one sack cement. It lays the maximum number of brick. Being more plastic and smoother working, the mason can work faster and easier on the wall. It does not harden in the box. It can be used immediately after mixing and does not require soaking. It works perfectly in cold weather. It is ideal for all wall-bearing buildings. It becomes harder than the brick and tile it binds, continuing to harden indefinitely. It sets a creamy white, contrasting beautifully with brick and tile. Contractors bid lower, do better work and make more profit with Carney. The final cost of a Carney wall is always lower.

Carney is the perfected cement for brick and tile mortar.

TELSMITH IS *STEEL*—

GUARANTEED AGAINST BREAKAGE BY TRAMP IRON

"Oho," sings the hammer-head as he slips into the crusher! "Just see what I'm going to do to this chap! I'll bend his shaft and I'll crack his frame! What I don't break, the scrap man will buy cheap." But, unfortunately for Mr. Hammer-head, that particular machine is a modern Telsmith Crusher of the 1923-1924 crop, with ***steel*** frame, ***steel*** crown and ***rigid*** shaft, all guaranteed against breakage by tramp iron. Too bad! The pleasant little plot falls flat. Telsmith just squeezes and chews the foxy hammer beyond recognition. After a short but decisive engagement, that hunk of steel is glad to escape onto the conveyor and beat it for the bins.

But, if the crusher is iron instead of steel — an ordinary breaker instead of a Telsmith — the tale is then quite a bit different. Picture a frantic master mechanic — a rush message for a new frame — anxious days of waiting and then strenuous hours of night work, putting the old wreck back into shape again.

You take your pick of these situations when you buy a crusher. Buy a Telsmith and you have "crusher insurance"— otherwise you carry your own risk. Better look into it. Glad to send you catalog No. 155 (Telsmith Primary Breaker) and bulletin No. 2-F-2 (Telsmith Reduction Crusher).

Nine Years' Service Demonstrates the Value of P & H Construction

The Mierswa Construction Co. of Oshkosh, Wis., have used a P & H Trench Excavator since 1916. Nine years' experience has well demonstrated the lasting worth and economy of P & H design and quality construction.

To take care of increased business an additional Trencher was needed this year.

The fact that another P & H was purchased, again emphasizes the point that the best test of an excavator is actual field performance over an extended period.

And the aggregate experience of these many years of service of hundreds of P & H Machines,—is built into the P & H you buy today.

The largest plant in the country devoted to the manufacture of gasoline excavating machinery insures prompt delivery. Bulletins on Trenchers (18-X) or on Shovels, Draglines, mailed on request.

CORDUROY

Follow the Corduroy Trail —the "Tread" Mark of the P&H

Besides the wheel type and the ladder type (for deeper ditches) trench excavators — P&H Gasoline Draglines are also used for some classes of trench excavation and drainage ditches.

L.A. OTT & CO.
CONTRACTORS
BUCYRUS
20-B

Louis A. Ott of Montreal began his career operating a steam shovel on the Chicago Drainage Canal in 1894.

With this great project the history of the modern steam shovel began.

It was there that the world first learned what steam shovels could do in rock.

It was then that the foundation of Mr. Ott's long experience was laid.

He has learned about shovels in the hard school of experience.

He now enjoys the esteem, won through success, as a first ranker among Canadian contractors.

He has owned or operated nearly every make of shovel, but he now stakes his reputation on Bucyrus — four of them — this is why he says:

"I Have Found Nothing Equal to the BUCYRUS 20-B"

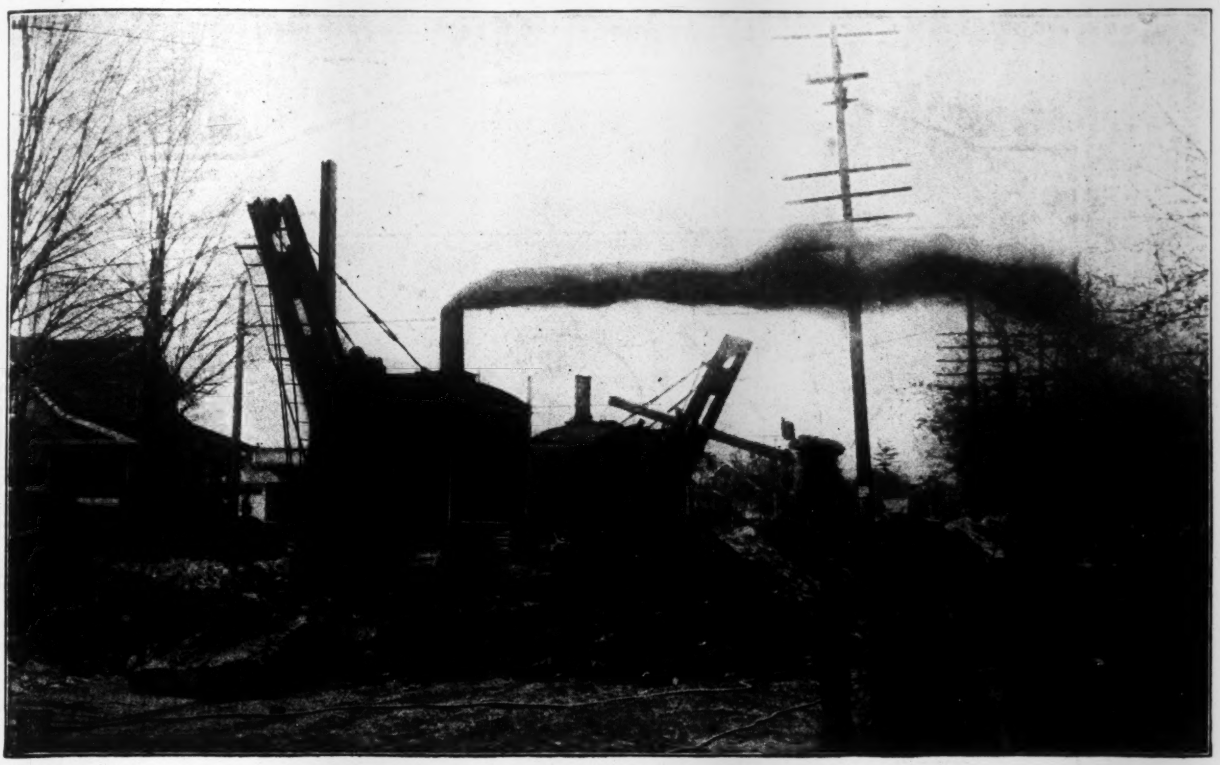
Special Plant at Evansville, Ind., Devoted Exclusively to SMALL REVOLVING SHOVELS



Team Work

These two Thews made quick work of a sewer trench through solid rock. One removed the pavement and overburden, the other followed in the rock digging and grading. Working together they advanced at the rate of 60 feet per day digging a 6 foot wide by 15 foot deep trench. And the shovels are only ¾ yard Type O Thews at that.

They are owned by K. P. McMahon and Gantose Construction Company, of Cleveland. The one on the follow up, owned by Gantose, not only shovels but digs the rock with the aid of an occasional pot shot to start it.

Ask either owner what they think of Thews. Mr. Gantose states that prior to this job he worked his Thew in rock digging for 300 consecutive days and his total repair expense amounted to less than 4 cents per day. He further states, "That shovel doesn't owe me a cent. It's as good as new yet, but I could scrap it right now and figure that I had more than my money's worth."

That is how owners everywhere talk about their Thews—Isn't that how you want to talk? You will if you use a Thew.

THE THEW SHOVEL COMPANY, LORAIN, OHIO

In Forty States and Every Province

WE have built and installed pipe in forty of the forty-eight states of the Union and in every one of the provinces of Canada.

In practically every instance, this has meant that we have manufactured at the spot, necessitating that we have faced nearly every type of local condition as regards materials, transportation, labor, topography and climate. We have operated in Canada on the North and Florida on the South; in Washington on the West and Virginia on the East; and in Colorado in the middle.

Such wide experience is of vital importance when it is a matter of pipe which is to be permanent — to function thirty, sixty, a hundred years.

LOCK JOINT PIPE CO., 9 Rutledge Ave., Ampere, N. J.

A "Big" Little Air Compressor

By "big", we mean it contains all the fine points that are embodied in the construction of the larger and more famous members of the Ingersoll-Rand family of air compressors. The running parts are enclosed. Removable covers afford instant access for inspection. Running parts and main bearings are lubricated by an automatic flood system. The inlet and discharge valves are of the Ingersoll-Rand plate type, with large valve area and noiseless in operation. Reliable regulators automatically load and unload compressor.

These Small Air Compressors are built in two classes, —Class "ER" (belt driven) as shown above, and Class "FR" (steam driven). Both are straight line, single stage units.

Every I-R Branch Office and Service Station has competent engineers who will gladly co-operate with you in selecting compressor equipment that will prove the most economical for your requirements.

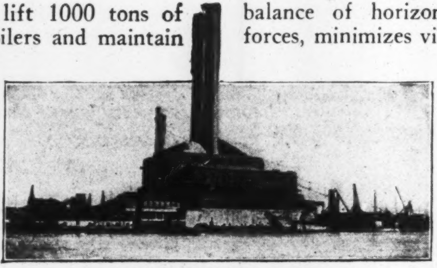
Compressed Air Transports Powdered Coal at Cahokia Station

COMPRESSED Air Transport is the novel method employed at the Cahokia Station of the Union Electric Light & Power Co., East St. Louis, Illinois (McClellan & Junkersfeld, Inc., Engineers and Constructors), for elevating the powdered coal to the overhead bunkers above the boilers. From that point the coal is delivered to the feeders by gravity and blown into the furnaces.

The total lift is 160 feet.

Some conveying problem to lift 1000 tons of coal a day for eight 1800-hp. boilers and maintain a steady and adequate supply.

The problem was solved by the engineers by using compressed air at 100 lbs. pressure. For this purpose they installed **3 Sullivan Angle Compound Compressors,** size 20-12x14, short belt connected to motors. One unit is maintained as a standby in case of emergency.



Cahokia Power Station

Angle Compounds are noted for their ability to render year-in-year-out continuous service. Equipped with "wafer" air valves, force feed plus gravity lubrication, and Sullivan automatic load control, they require the minimum of attention and care, and practically take care of themselves over long periods.

The angle compound design, with its accurate balance of horizontal and vertical reciprocating forces, minimizes vibration, reduces wear, and holds down power input per 100 cu. ft. of free air to a remarkably low point.

Angle compounds are built in single units from 400 to 1,700 cu.ft. capacity; in twin units to 2,700 cu.ft. for belt drive or direct motor connection.

GOLDEN-ANDERSON

Patent Automatic Cushioned Controlling Float Valves

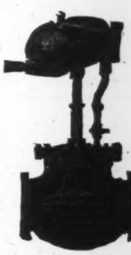
They carry a constant water level in feed water heaters by perfectly controlling the flow of makeup water.

Operated by protected enclosed copper float.

Cushioned by both air and water.

Operate without hammering, sticking or chattering. No metal-to-metal seats. Made angle or straightway.

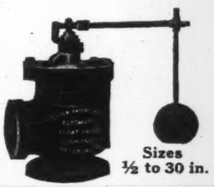
Sizes 1 in. to 30 in.



GOLDEN-ANDERSON
Pat. Automatic Cushioned Water Float Valves

1. Automatically Maintain Uniform Water Levels in Tanks, Standpipes, etc.
2. Instantly Adjusted to Operate Quickly or Slowly.
3. Floats Swivel to any Angle—Most Satisfactory Float Valves Known.
4. No Metal-to-Metal Seats — No Water, Hammer or Shock.
5. Cushioned by Water and Air.

Sizes ½ to 30 in.



GOLDEN-ANDERSON
Pat. Automatic Double Cushioned Check Valves

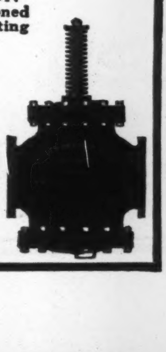
1. Especially adapted for Water Service.
2. For High or Low Pressure.
3. Thoroughly Cushioned, No chattering, Hammering, or Sticking.
4. Globe or Angle Patterns up to 30 in.
5. Especially adapted for hydraulic elevator service.

GOLDEN-ANDERSON
Pat. Cushioned Water Relief Valves

1. Automatically relieve excess pressure.
2. Prevent stress, strain and bursting of mains.
3. Correct mechanical construction.
4. Perfect air and water cushioning.
5. No metal-to-metal seats. No hammering or shocks.
6. Angle and globe pattern. Sizes 3 to 30 in.

GOLDEN-ANDERSON
Pat. Automatic Cushioned Water Pressure Regulating Valves

1. Maintain a constant reduced pressure regardless of fluctuations on high pressure side.
2. Perfectly Cushioned by water and air. No metal-to-metal seats.
3. The best valve made for maintaining a constant low pressure where consumption is continuous.
4. Operates quickly or slowly as required—No attention necessary.
5. Positively no hammering or sticking. Sizes to 24 in.



For even pressure throughout the entire system—

Golden-Anderson

Patent Automatic *"Cushioned"* Controlling Altitude Valves

These five features are GUARANTEED

1. They keep the water level constant in reservoirs, standpipes, tanks, etc., under all conditions.
2. Very simple in design. Contain no floats or fixtures inside or outside of tanks.
3. A perfect cushion by water and air absolutely prevents water hammer, surges and broken mains. No metal-to-metal seats.
4. Can be closed in three ways, by hand, or automatically by water if a pipe breaks and by electricity from distant points.
5. When desired can be connected to work "both ways" on a single pipe line.

"Made with Stop-Starter Attachment for Centrifugal Pumps."

Full details on request. Write us.

LaSalle Hotel Garage, Chicago—Geo. A. Fuller Co., General Contractors

An Exacting Job—

IN ORDER that the business of this garage might go on without interruption, the reinforcing had to be delivered on the job before 9 A.M. each day as needed. Where the new addition connected to the old building it was necessary for us to send a draftsman to take actual measurements as each part of the old structure was exposed. We then prepared our details, cut and fabricated the reinforcing and made delivery the following morning.

This is but one example of the service we are prepared to give in addition to furnishing everything required in concrete reinforcement. We carry complete stocks of bars, mesh, etc., and can fabricate to any specifications. Get our price—it will save you money and worry too.

You don't sign the dotted line

WHEN YOU SIGN a contract with the Linde Company, you don't sign the dotted line, but the line of no trouble.

A Linde contract means all the oxygen you need whenever you need it. It is a contract for dependable delivery. And Linde delivery is dependable because its 115 plants and warehouses are backed by a will to serve, without which, ability to deliver would be useless to you.

A contract with Linde also includes help in the efficient use of your oxy-acetylene apparatus. A part of this help is given monthly in "Oxy-Acetylene Tips." Write for it.

A Linde Text Book

The index to "Gas Welded Pipe Joints" reads like that of a text book—and that's what it is.

• • •

This book covers welding costs, cutting costs, laying costs, pipe line total costs, pipe pattern cutting, etc. It has more than fifty pages chock full of instructions, information, tables, diagrams, and illustrations.

• • •

It is a text book, indeed, published by the Linde Air Products Company as a part of Linde Service.

• • •

"There has been such a call for detailed information with regard to the costs of welded pipe installations of various kinds, that it has led to the compilation of the data which make up this book"—from the Preface to "Gas Welded Pipe Joints."

• • •

All books written and published by the Linde Company are to supply definite needs. And the needs of customers come to the attention of Linde through its practical field service to customers.

• • •

Any Linde user may secure a copy of "Gas Welded Pipe Joints" or information regarding all Linde books from the nearest Linde District Sales Office.

WESTINGHOUSE ELECTRIC

Westinghouse

Has Proved their Worth

The crane in the illustration is one of the No. 4 Brownhoists owned by the Westinghouse Electric & Mfg. Co. This crane is in use at the Trafford, Pa. plant.

The Westinghouse Electric and Manufacturing Co. is a recent addition to the long list of industrial leaders who have bought one Brownhoist crane, proved its worth, and expressed their satisfaction by purchasing additional Brownhoists.

There are definite reasons why such companies as Westinghouse have chosen Brownhoist cranes. The high rate that these machines return on the capital invested, their wide range of adaptability to all types of handling service and their ability to stand up on the hardest kind of work, are but a few of the influencing factors.

The time and labor saving possibilities, lower maintenance and operating costs and longer life of Brownhoist equipment, make it the logical selection for those plants in which high economy standards are maintained.

May we tell you of plants with conditions similar to your own that are using Brownhoists successfully? May we help you in the solution of your material handling problems as we have helped Westinghouse and others?

The advice of our engineers is available without cost or obligation. Just write us for further information.

NURSES' HOME AND EMPLOYEES' DORMITORY

White Plains, N. Y.

Sealed bids will be received for labor and material for plumbing work of the Nurses' Home and Employees' Dormitory on premises at Grasslands Hospital, in the Town of Mount Pleasant, County of Westchester and State of New York, at the office of the Clerk of the Board of Supervisors, at the Court House, White Plains, New York, until eleven o'clock a.m. (Daylight Saving Time), July 7th, 1924.

Specifications, drawings and all information relative to the same may be procured either from Walker & Gillette, Architects, No. 128 East 37th Street, New York City, or from Fred L. Merritt, Clerk of Board of Supervisors, Court House, White Plains, N. Y., on making a deposit of the sum of Ten dollars ($10.00), Five dollars ($5.00) of which will be returned to the bidder making such deposit upon returning such plans and specifications to the Clerk of the Board of Supervisors within ten days after the opening of bids for such work. Each bid or proposal must be accompanied by a certified check in the sum of three per cent (3%) of the amount bid made payable to the Treasurer of the County of Westchester, same to be forfeited to the County of Westchester as liquidated damages in the case of failure on the part of the successful bidder to enter into a contract for the execution of the work awarded to him and to furnish a satisfactory bond within five days after notice of such award. The successful bidder will be required to execute the contract and furnish a surety company bond in a sum equal to fifty per cent of the amount of the contract awarded to him guaranteeing the faithful performance of the work, said contract and bond to be in the form required by the County Attorney.

The Board of Supervisors reserves the right to reject any and all bids, or to accept any proposal which it may deem for the best interest of the County of Westchester.

Dated, White Plains, N. Y., June 16th, 1924.

Bids: July 10.

Road Work

New Brunswick, N. J.

Notice is hereby given that sealed bids will be received by the Board of Chosen Freeholders of Middlesex County for the construction of Old Bridge-Matawan Road in the Township of Madison, in the County of Middlesex, with a reinforced concrete pavement, estimated amount of concrete pavement required is 56,712 square yards, and opened and read in public at the County Record Building, New Brunswick, N. J., on July 10, 1924, at 2.30 p.m. Standard Time.

Drawings, specifications and forms of bid, contract and bond for the proposed work, prepared by Morgan F. Larson, County Engineer, and approved by the State Highway Commission, have been filed in the office of said Engineer at 175 Smith Street, Perth Amboy, N. J., and of said State Highway Commission, Trenton, N. J., and may be inspected by prospective bidders during business hours. Bidders will be furnished with a copy of the specifications and blue prints of the drawings by the Engineer on proper notice and payment of cost of preparation. Bids must be made on the Standard Proposal forms in the manner designated therein and required by the specifications, must be enclosed in sealed envelopes, bearing the name and address of the bidder and name of road on the outside, addressed to the Board of Chosen Freeholders of Middlesex County, and must be accompanied by a certificate of a Bonding Company agreeing to furnish bond in the amount of 100% of the Contract, and a certified check for not less than ten (10) per cent of the amount bid, provided said check shall not be less than $500.00 nor more than $20,000.00, and be delivered at the place and on the hour above named. The standard proposal form is attached to the specifications, copies of which will be furnished on application to engineer.

By order of the Board of Chosen Freeholders of Middlesex County.

THOMAS J. MULVIHILL,
Clerk.

Bids: July 7.

Garage and Dairy Barn

White Plains, N. Y.

Notice to Contractors—Including Plumbing and Heating Contractors.

Separate sealed bids or proposals for the following work:

(a) For the erection and completion and electrical work (exclusive of plumbing and heating) of Garage and Dairy Barn required in connection with the County Hospital in the Town of Mount Pleasant, County of Westchester and State of New York, and known as Grasslands Hospital.

(b) For the plumbing work required for Garage and Dairy barn.

(c) For the heating work required for Garage and Dairy Barn; will be received at the office of the Clerk of the Board of Supervisors at the Court House, White Plains, New York, until eleven o'clock a.m. (D. L. S.), Monday, July 7, 1924. Specifications, drawings and all information relative to the same may be procured either from Walker & Gillette, Architects, of No. 128 East 37th Street, New York City, or from Fred L. Merritt, Clerk of the Board of Supervisors, Court House, White Plains, N. Y., on making a deposit of the sum of Ten Dollars ($10.00), Five Dollars ($5.00) of which will be returned to the bidder making such deposit upon returning such plans and specifications to the Clerk of the Board of Supervisors within ten days after the opening of bids for such work. Each separate bid or proposal must be accompanied by a certified check in the sum of three per cent of the amount bid, made payable to the Treasurer of the County, same to be forfeited to the County of Westchester as liquidated damages in the case of failure on the part of the successful bidder to enter into a contract for the execution of the work awarded to him and to furnish a satisfatcory bond within five days after notice of such award. Each successful bidder will be required to execute the contract and furnish a surety company bond in a sum equal to fifty per cent of the amount of the contract awarded to him guaranteeing the faithful performance of the work, said contract and bond to be in the form required by the County Attorney.

Pursuant to the provisions of the statutes, separate bids must be submitted for items (a), (b) and (c). No bid will or can be considered that combines any two or more of such items.

The Board of Supervisors reserves the right to reject any and all bids, or to accept any proposals which it may deem for the best interest of the County of Westchester.

Dated, White Plains, N. Y., June 19, 1924.

Bids: July 9.

REINFORCED CONCRETE SUPER-STRUCTURE AND PILE FOUNDATIONS FOR SOUTH PARK BOULEVARD VIADUCT

South Park Commissioners

Chicago, Ill.

Sealed proposals will be received by the South Park Commissioners, 57th Street and Cottage Grove Avenue, until 12:00 o'clock noon, Wednesday, July 9, 1924, for the complete construction of Reinforced Concrete Super-Structure for the "South Park Boulevard Viaduct," and the East and West Approach Structures and the Pile Foundations for the West Approach, in accordance with drawings and specifications, copies of which may be obtained at the office of the Consulting Engineers, Condron Company, on and after June 20, 1924, upon depositing therefor the sum of $50.00 for the complete set or for the set of "Item B," and the sum of $25.00 for the set of any one item except "Item B," which deposits will be returned to bidders upon return of drawings and specifications.

Proposals must be enclosed in opaque sealed envelopes marked "Proposal" and bearing title of the work bid upon, and the name of bidder.

The right is reserved to reject any or all bids, or to accept any bid or "item" of any bid which, in the judgment of the Commissioners, will be for the best interest of the public.

Any one of the following "items" of the work may be bid upon, and separate contracts or a general contract may be let, at the option of the Commissioners:

Item (A)—Piling and Footings. (In specification No. 3.)

Item (B) — Concrete Super-Structure. (Specification No. 3.)

Item (C)—Gunite Protection of Steel. (Specification No. 4.)

Item (D) — Waterproofing Walls and Decks. (Specification No. 5.)

Item (E)—Drains and Sewers. (Specification No. 6.)

Item (F)—Electric Conduits, Wiring and Ornamental Lamp Posts. (Specification No. 7.)

Item (G)—Ornamental Concrete. (Specification No. 8.)

Each proposal should be accompanied by a certified check for a sum not less than five (5%) per cent of amount of proposal, payable to South Park Commissioners, as a guarantee of the good faith of the bidder, which check will be returned to the bidder unless forfeited under conditions stipulated in proposal.

Proposals shall be made on "Proposal Form" accompanying specifications.

ELMER J. WHITTY,
Secretary.

Morwell Power Scheme

SPECIFICATION NO. 24/25
STATE ELECTRICITY COMMISSION
OF VICTORIA

Melbourne, Victoria, Australia.

Tenders are hereby invited for the supply, delivery, etc., of the following for the Morwell Power Scheme.

Copies of Tender Form and Specification will be available upon application to:

Office of the Bureau of Foreign & Domestic Commerce, United States Department of Commerce, Room 830, 76 West Monroe St., Chicago, and Office of the Bureau of Foreign & Domestic Commerce, United States Department of Commerce, 734 Customs House, New York City.

SPECIFICATION NO. 24/45—66,000-VOLT INSULATORS

CHARGE: £2 2s. 0d. for the first three copies of Tender Form, Conditions of Contract and Specification complete. This charge will be returned on receipt of a bona fide tender. A fourth copy and any further copies will be supplied for the sum of 10s. 6d. each. This charge is not returnable.

PRELIMINARY DEPOSIT: A Preliminary Deposit of £50 0s. 0d. is to be lodged with Tender.

The Specification may be inspected at the above mentioned offices.

The Commission does not bind itself to accept the lowest or any tender.

Tenders on prescribed form, properly endorsed and addressed, must be delivered to the undersigned in Melbourne not later than 5 p.m. on August 4, 1924.

R. LIDDELOW,
Secretary.

OFFICIAL PROPOSALS

Bids: July 9.

Boulevard Construction

Atlantic City, N. J.

Sealed bids will be received by the Board of Chosen Freeholders of Atlantic County, N. J., at 12 o'clock, noon, (Daylight Saving Time), on July 9th, 1924, during a regular meeting of said Board at its Assembly Room in the Guarantee Trust Bldg., Atlantic City, N. J., for reconstruction of a certain County Road, known as the Absecon Boulevard, joining Absecon and Atlantic City with a standard, sheet-asphalt pavement on a 6", 1-3-5, concrete base; the approximate area of the sheet asphalt being 104,800 sq.yds. and of the concrete base 109,000 sq.yds., together with gravel shoulders, excavation and embankment, drainage provisions, reconstructed guard rail, additions to 9 existing bridges and other incidental construction items. The bids will be opened and publicly read at the aforesaid time and place.

Plans, specifications and forms of bid, certificate of surety, contract and bond, covering the proposed work, are on file at the offices of the State Highway Commission in Broad St. Bank Bldg., Trenton, N. J., and at 503 Market St., Camden, N. J., and at the office of the County Engineer of Atlantic County, 741 Guarantee Trust Bldg., Atlantic City, N. J. At any of the above offices the plans and specifications may be inspected and a prospective bidder may secure a printed copy of the specifications and blueprints of the plans from the office of the County Engineer in consideration of a deposit of $10.00 which will be refunded provided the plans and specifications are returned to the office of the County Engineer, in good condition, by noon of July 9th, 1924, (Daylight Saving Time); otherwise the plans and specifications will become the property of the prospective bidder and the deposit will be forfeited. Each bid must be made on the standard proposal form in the manner required by the specifications and must be accompanied by a certified check, or cash, in the amount of $20,000. A satisfactory bond in the full amount of the contract price will be required of the contractor and a contract will be awarded, if awarded at all, within one month of the date of receiving bids, but such award will be made subject to the sale and delivery of bonds to be issued for the purpose of financing the work; the award of contract will also be subject to approval by the State Highway Commission.

The right is reserved to reject any or all bids.

By Order of the Board of Chosen Freeholders of Atlantic County, N. J.

F. W. WILLETTS, Clerk.

Bids: July 15.

Subway Construction

DEPARTMENT OF CITY TRANSIT
CITY OF PHILADELPHIA
11TH FLOOR, 1211 CHESTNUT STREET
Philadelphia, Pa., June 9, 1924.

Sealed Proposals, addressed to the undersigned, at the offices above mentioned, will be received until 11 o'clock a.m., (Eastern Standard Time), on Tuesday, July 15, 1924, and publicly opened and read immediately thereafter, for construction of about 10,131 linear feet of 4-track subway in Broad Street, from north of Stiles Street to the south side of Clearfield Street.

Plans and Specifications can be seen at the office of the Department on the 12th floor, 1211 Chestnut Street, and copies of same, with blank forms for proposals, will be supplied to intending bidders upon deposit of $50.00, which will be refunded upon return of the Plans and Specifications in good condition.

Bidders must be skilled and regularly engaged in the class of work for which they are competing.

No bid will be considered unless accompanied by a certified check on a responsible Bank or Trust Company in favor of the City of Philadelphia, to the amount of five (5) per centum of the sum of such bid, in accordance with the provisions of an ordinance approved March 7, 1924, and reprinted in full in the Specifications.

Proposals will be received upon the entire work, designated as Contract No. 105, and separately upon approximately equal sections of the work designated as Contracts No. 105-A and No. 105-B respectively.

The Director reserves the right to contract for the work as a whole or in two sections, and to reject any or all bids, as he may deem best for the interest of the City of Philadelphia.

H. E. EHLERS,
Director.

OFFICIAL PROPOSALS

Bids: July 9.

Highway Work

STATE OF MARYLAND
STATE ROADS COMMISSION
Baltimore, Md.

Sealed proposals for building nine sections of State Highway, as follows:

Montgomery Co. Cont. M-52. One section of State highway from Colesville toward Ashton for a distance of 1.0 mile. (Concrete.)

Montgomery Co. Cont. 169-8. One section of State highway from Kensington to Chevy Chase Lake, a distance of 2.03 miles. (Concrete shoulders.)

Prince George's Co. Cont. P-53. One section of State highway from Bladensburg to East Riverdale, a distance of 2.0 miles. (Concrete.)

Howard Co. Cont. Ho-48. One section of State highway from end of Cont. Ho-42 to Jonestown, a distance of 1.3 miles. (Concrete.)

Howard Co. Cont. Ho-25. One section of State highway between West Elkridge and Millers Corner, for a distance of 1.48 miles. (Concrete.)

Baltimore Co. Cont. B-12-C. One section of State highway through Catonsville, for a distance of 0.46 mile. (Concrete.)

Queen Anne's Co. Cont. Q-30. One section of State highway from Centerville to Centerville Landing, a distance of 0.7 mile. (Concrete.)

Cecil Co. Cont. Co-39. One section of State highway between Calvert and Fade Hill for a distance of 1.0 mile. (Concrete.)

Calvert Co. Cont. C-17. One section of State highway from Huntingtown toward Plum Point for a distance of 1.5 miles. (Gravel.)

will be received by the State Roads Commission, at its offices, 601 Garrett Building, Baltimore, Maryland, until 12 M. on the 8th day of July, 1924, at which time and place they will be publicly opened and read.

Bids must be made upon the blank proposal form, which, with specifications and plans will be furnished by the Commission upon application and cash payment of $1.00, as hereafter no charges will be permitted.

No bids will be received unless accompanied by a certified check for the sum of Five Hundred ($500) Dollars, payable to the State Roads Commission.

The successful bidder will be required to give bond, and comply with the Acts of the General Assembly of Maryland, respecting contracts.

The Commission reserves the right to reject any and all bids.

By order of the State Roads Commission this 19th day of June, 1924.

JOHN N. MACKALL,
Chairman.

L. H. STEUART, Secretary.

Bids: July 8.

Pavements—Concrete and Bituminous Bound Macadam

Wallingford, Conn.

Notice is hereby given that sealed bids will be received by the Court of Burgesses of the Borough of Wallingford, Connecticut, New Haven County, for the construction of the following estimated pavements:

1,200	sq.yds. of concrete pavement.
5,950	sq.yds. of Bituminous Bound Macadam (Penetration method).
4,135	lin.ft. of combined concrete curb and gutter.
450	lin.ft. of blue stone curbing.
145	sq.yds. concrete gutters.

A certified check for 5% of the contract shall accompany each proposal and a Surety Co. bond of 50% of the contract price will be required of the successful contractor.

Bids will be opened and read in public at the Borough Clerk's office on Tuesday, July 8th, 1924, at 6 p.m., standard time. Forms of Proposals, specifications and contract for the proposed work may be secured from Wm. A. MacKenzie, Borough Engineer, Wallingford, Conn.

The Court of Burgesses reserves the right to reject any or all proposals or to accept any proposal for one or more sections or for the concrete curbs and gutters as a separate unit.

Signed, JOHN P. BRIDGETT,
Warden.

WM. A. MACKENZIE, C. E.

OFFICIAL PROPOSALS

Bids: July 14.

Sewage Treatment Works and Appurtenances

Borough of Bergenfield, N. J.,
Borough of Dumont, N. J.

The Mayor and Council of the Boroughs of Bergenfield and Dumont, Bergen County, New Jersey, request proposals for the construction of a Sewage Treatment Works and Appurtenances.

The foregoing works are more particularly described and set forth in the plans and specifications on file with Thomas F. Bowe, Consulting Engineer, and with the Borough Clerks.

The plan and specifications, form of proposals, contracts, form of bonds required may be seen at the offices of Thomas F. Bowe, Consulting Engineer, 110 William Street, New York City. Copies of such plans and specifications may be obtained on making a deposit of twenty-five dollars ($25.00) (cash or certified check), fifteen dollars ($15.00) of which deposit will be refunded upon return of the plans and specifications five (5) days after the receipt of proposals complete and in good condition.

All bids must be made upon a form of proposal to be obtained from the Consulting Engineer and must give the prices both in writing and figures and must give such other information and be signed in the manner indicated by the form of proposal. Each bid must be accompanied by a certified check on some solvent bank; in the amount of five (5%) per cent of the bid price. The certified checks shall be made payable to the Boroughs of Bergenfield and Dumont; checks of the unsuccessful bidders will be returned immediately upon the award of the contract. The check of the successful bidder will be returned to the bidder upon the execution of the contract and the furnishing of the bond required, within ten days after the date of the award thereof, or within such extended time as may be determined by the Borough Councils. In case of failure to execute the required contract and furnish the required bond within such time, such check shall be forfeited to the Boroughs of Bergenfield and Dumont as liquidated damages.

The proposals hereing required shall be presented to the Mayor and Council of the Boroughs of Bergenfield and Dumont, Bergen County, New Jersey, at the Council Chamber, Madison Avenue, Dumont, Bergen County, New Jersey, on Monday, July 14, 1924, at 8:00 p.m. Daylight Saving Time. No bids will be received prior to said hour and none thereafter. The proposals shall be submitted in sealed envelopes or packages and endorsed respectively as follows:

Proposal for the construction of a Sewage Treatment Works and Appurtenances.

The right is expressly reserved to reject any or all bids, to waive any informality in the bids received and to accept any bid which is deemed the most favorable to the interests of the Boroughs of Bergenfield and Dumont, Bergen County, New Jersey.

Dated June 16, 1924.

Mayor and Council of the Borough of Bergenfield, N. J.

By OTTO E. DOLAINSKI,
Borough Clerk.

Mayor and Council of the Borough of Dumont, N. J.

By HENRY J. BERSCH,
Borough Clerk.

THOMAS F. BOWE,
Consulting Engineer.

Bids: June 30.

Sanitary Sewers

TOWN OF ADAMS
OFFICE OF SELECTMEN
Adams, Mass.

Sealed proposals addressed to the Board of Selectmen, Adams, Mass., and endorsed "Proposal for Sanitary Sewer Construction" will be received by the Board of Selectmen at its Office until 4 p.m., Monday, June 30, 1924, and at that time and place will be publicly opened and read.

Work includes furnishing all labor and material and constructing approximately two miles of sanitary sewers in sizes ranging from eight inches to twenty-two inches.

Plans may be seen and forms of specifications and contract may be obtained at the office of the Selectmen.

Each bid must be accompanied by a certified check for two thousand dollars ($2,000.00) payable to the Town of Adams.

Board of Selectmen, Town of Adams.

By H. L. HARRINGTON.
D. A. MURPHY.
A. F. BAILOT.

Bids: July 3.

Channel Dredging

DEPARTMENT OF PUBLIC WORKS
Buffalo, N. Y.

Sealed proposals for work and supplies as set forth below, will be received at the office of this Department, Room 5 Municipal Building, until 11 o'clock a.m., July 3rd, 1924.

No proposal will be considered unless it be accompanied by a certified check, payable to the order of the Department of Public Works, in the amount specified in specifications or by a bond conforming to law; such bonds to be fifty per cent of the sum named in the proposal.

Plans and specifications and estimate of quantities can be seen, and printed forms of proposals, and any desired information, can be had on application at the Bureau of Engineering on and after this date.

This Department reserves the right to reject any and all bids, and to waive any informalities.

A separate proposal must be made for the work and supplies included in each descriptive paragraph following:

RE-ADVERTISEMENT

For the completion of subdivision "B" of Section No. 2 of the Buffalo River and Cazenovia Creek Improvement, including the channel of Buffalo River from the westerly line of Babcock street to the westerly line of Seneca street and the channel of Cazenovia Creek from the Buffalo River channel to about 100 feet easterly of South Park avenue.

Work consists in the removal of about 950,000 cubic yards of earth excavation.

Bid and contract will be on a price per cubic yard place measurement.

Formal advertisement will be found in the Buffalo Commercial, Buffalo Express and Buffalo Times on June 13th, 14th, 20th and 21st, 1924.

This is not a complete formal advertisement.

Bids: July 1.

Bridge

Norristown, Pa.

Sealed proposals will be received at the office of the County Controller, Court House, Norristown, Penna., on July 1, 1924, at 10 o'clock Standard Time and opened at 11 o'clock Standard Time for furnishing tools, machinery, labor and materials necessary for the construction complete of a reinforced concrete bridge over the Schuylkill River on DeKalb Street, between Norristown and Bridgeport, Montgomery County, Penna., in full accordance with plans and specifications on file in the office of the County Commissioners.

The bridge consists of seven spans 115 ft. each and a total width of 60 ft.

All proposals must be for the work complete in full accordance with plans and specifications and must be made on the form of proposal attached to and forming a part of the specifications.

Copies of the plans and specifications may be obtained in the office of the Consulting Engineer, J. B. Long, 59-61 Boyer Arcade, Norristown, Penna., on payment of five dollars per set.

Each bidder must accompany his proposal with a certified check for $15,000.00 made payable to the Commissioners of Montgomery County, Penna., as a guarantee of good faith and to protect the County from any loss by failure to comply with the terms of the proposal. This check shall be handed to the Chief Clerk to the County Commissioners at least one hour before the time set for opening the bids.

The right is reserved to reject any or all bids.

WM. C. IRVIN.
County Controller.

Bids: July 1.

Highway Work

Harrisburg, Pa.

Pennsylvania Department of Highways, Harrisburg, Pa. Bids will be received July 1, 1924, for the construction of thirteen projects, totaling seventy-four miles, construction to be either bituminous surface on a concrete base or reinforced concrete. Projects situated in the following counties:

Berks, Bradford, Wyoming, Chester, Dauphin, Indiana, Luzerne, Lycoming, Monroe, McKean, Schuylkill, Westmoreland, York.

Full particulars upon application to Paul D. Wright, Secretary of Highways, Harrisburg, Pennsylvania.

Bids: July 18.

Canal Terminal Construction

STATE OF NEW YORK
DEPARTMENT OF PUBLIC WORKS
BUREAU OF CANALS

Albany, N. Y.
June 18th, 1924.

Sealed proposals will be received by the undersigned at his office, 55 Lancaster street, Albany, N. Y., until twelve o'clock noon (daylight saving time), of Friday, July 18th, 1924, at which place and hour they will be publicly opened and read, for the construction of Barge canal terminals, pursuant to the provisions of Chapter 746, Laws of 1911, and amendatory laws, Chapter 698, Laws of 1920, and Chapters 146 and 225, Laws of 1923, as follows:

—1—

TERMINAL CONTRACT NO. 81-C.

For furnishing and installing bagging garners, marine leg pushers and hoists and miscellaneous equipment in the grain elevator at Gowanus Bay, Borough of Brooklyn, New York City.

Contract plans, sheets 1 to 16 inclusive.

—2—

TERMINAL CONTRACT NO. 82-H.

For installing a heating system in the administration building on the terminal pier at Oswego.

Contract plans, sheets 1 and 2.

—3—

TERMINAL CONTRACT NO. 82-P.

For installing a plumbing system in the administration building on the terminal pier at Oswego.

Contract plans, sheets 1 and 2.

—4—

Also, for constructing a dry-dock and an approach channel thereto, at Waterford, N. Y., pursuant to the provisions of Chapter 106, Laws of 1922, and Chapter 450, Laws of 1923, and amendatory laws.

Sheets 1 to 12 inclusive.

Plans may be seen, and detailed specifications, engineers' estimates of quantities, proposal blanks, form of contract and bonds required and other information for proposers may be had at the office of the Bureau of Canals, Albany, N. Y.; at the office of the Division Engineer, Department of Public Works, at Utica, Syracuse, Rochester and Buffalo; and at the Terminal Warehouse, Pier 6, East River, New York City.

Blueprint copies of plans will be furnished by the State Engineer and Surveyor upon the receipt at his office in the Telephone Building, Albany, N. Y., of payment at the rate of fifteen cents (15c.) per sheet. Refund will not be made for any blueprints which may be returned.

Monthly estimates will be paid of ninety per centum (90 per cent) of the work done at the contract price. Every proposal for said work must be accompanied by a money deposit in the form of a draft or certified check upon some good banking institution in the city of Albany or New York, issued by a national or state bank (or trust company, in the case of terminal contract), in good credit, within the State and payable at sight to the Commissioner of Canals and Waterways for five per centum (5 per cent) of the amount of the proposal.

The person whose proposal shall be accepted will be required to execute a contract and furnish bonds within ten days from the date of notice of award delivered to him or them in person or mailed to the address given in the proposal.

Upon execution of the contract and approval of bonds, the certified check or draft will be returned to the proposer unless the same shall have been presented for collection prior to such time in which case the amount of the deposit will be refunded by the Commissioner of Canals and Waterways.

The deposits of bidders other than the one to whom the award of contract shall be made will be returned immediately after the award has been made.

The bond required for the faithful performance of the contract shall be in such sum as shall be fixed by the Commissioner of Canals and Waterways, which sum shall not be less than twenty per centum (20 per cent) of the estimated cost of the work, according to the contract price, and an additional bond known as the labor bond, in the sum of ten per centum (10 per cent) of the amount of the estimated cost of the work, according to the contract price, will be required as security that the contractor will pay in full at least once in each month all laborers employed by him upon the work specified to be done in the contract.

In the event that more than one surety company is offered as surety on said bonds co-insurance only will be accepted.

Each proposal must be addressed to the Bureau of Canals, State Department of Public Works, Albany, N. Y., and must be endorsed on the envelope with the name of the construction for which the proposal is made.

Award, if made, will be made to the person or persons whose proposal shall be lowest in cost to the State for doing the work, and which shall comply with all provisions required to render it formal. Before any award shall be made the lowest bidder will be required to satisfy the Commissioner of Canals and a Waterways of his ability to provide suitable equipment and materials for the proper performance of the work.

The right is reserved to reject any or all proposals and readvertise and award the contract in the regular manner it, in the judgment of the undersigned, the interests of the State will be enhanced thereby.

ROYAL K. FULLER,
Commissioner of Canals and Waterways.

Bids: July 8.

Bids for Sidewalk Construction

Lakeland, Fla.

Sealed proposals will be received by the City of Lakeland, Florida, until 7:30 p.m., Tuesday, July 8th, 1924, for paving sidewalks with widths of 5 and 6 ft. and lengths totaling about 130,000 lin.ft. The type of sidewalk to be bid upon is portland cement concrete on sand foundation, and includes grading and necessary connections with existing work.

Blank forms of proposal and specifications will be furnished prospective bidders. Plans for the same are on file in the offices of the City Manager and City Engineer of said City, where they may be examined.

Certified check for $4,000.00 is required with each bid and bond for 50% of the contract price will be required of the successful bidder, such bond to be a bond with reputable and responsible Surety Company as Surety written through their resident Agent and who has been their such **resident Agent in the City of Lakeland for** six months.

The City reserves the right to reject any and all bids.

The City reserves the right to increase or decrease the amount of work included in these specifications without affecting in any way the contract prices and without affecting the specifications or contract in any other respect.

The City reserves the right to group the work in units as set forth in Instructions to Bidders, and to let separate contracts for any one or more units.

The City reserves the right to purchase concrete materials and furnish them to the contractor to be placed by him under the specifications at prices bid by him.

ANTON SCHNEIDER,
City Manager.
J. L. DAVIS,
City Clerk and Auditor.
CHARLES CARROLL BROWN,
City Engineer.

Bids: July 9.

Sewage Pumping Station

Jackson, Mich., June 16, 1924.

Sealed proposals will be received by the City Clerk of the City of Jackson up to 12 o'clock noon, Eastern Standard Time, of Wednesday, the 9th day of July, 1924, for the construction of a sewage pumping station comprising a reinforced concrete, steel and brick structure about 27 feet square in plan, with a pump pit, rack chamber, motor room, steel rocks, sluice gates, and cast iron piping and valves.

The Plans and Specifications under which the work is to be done may be examined at the office of the City Clerk or of the City Manager at Jackson, and copies may be obtained by making a deposit of Ten Dollars, which will be refunded upon their return in good condition, within ten days after the date of receiving proposals.

A certified check in the sum of One Thousand Dollars will be required with each proposal.

The right to accept any proposal, to reject any or all proposals, and to waive defects in proposals, is reserved by the City.

J. E. WHITTAKER,
City Manager.

OFFICIAL PROPOSALS

Bids: July 16.

Delaware River Bridge

CONTRACTS 17 AND 18
PHILADELPHIA AND CAMDEN
APPROACH SUPERSTRUCTURES

Philadelphia, Pa.

Sealed proposals will be received by the Delaware River Bridge Joint Commission at Room 806 Widener Building, Philadelphia, Pa., until 1.30 o'clock p.m., Eastern Standard Time, July 16, 1924, when they will be publicly opened and read, for Contracts Nos. 17 and 18, for the construction of the superstructures of the Philadelphia and Camden approaches of the bridge over the Delaware River between the cities of Philadelphia and Camden.

Contract No. 17 is for the construction of the superstructure of the Philadelphia approach, located between Front Street and Fourth Street in Philadelphia.

Contract No. 18 is for the construction of the superstructure of the Camden approach, located between the Camden anchorage, west of Delaware Avenue, and Third Street, in Camden.

The work under each contract will include the furnishing, fabricating, painting and erecting of the steel superstructure complete as shown on the drawings. The work comprises approximately 11,600 tons of steelwork in Philadelphia and 13,500 tons of steelwork in Camden. The contract time for the entire work is twenty-two months. Unit price bids are asked for each contract.

Attention is called to the forms prescribed for bidders on these two contracts, in that they are invited to bid under either or both of two forms in each contract. In Form "A" the bidder is to state his prices for the work proposed without dependence upon the award of the other contract. In Form "B" the bidder is to state his prices for the work proposed, upon the express condition that he also be awarded the other contract. The proposal in Form "B," in order to be valid, must be made in the proposals for both contracts.

Copies of the contract and contract drawings may be obtained at the office of the Joint Commission upon deposit of Twenty-five dollars for each contract, which deposit will be returned upon receipt of bid or return in good condition of the contract books.

Each proposal must be accompanied by a certified check for the sum of Fifty Thousand Dollars ($50,000) payable to the Delaware River Bridge Joint Commission, and Surety's consent must be shown. The bidder or bidders to whom the contracts are awarded will be required to give bond in the sum of 50 per cent of the amount of the contract.

The right is reserved to reject any or all bids.

Delaware River Bridge Joint Commission.
GIFFORD PINCHOT,
Chairman.
JOSEPH K. COSTELLO,
Secretary.

Bids: July 7.

Water Supply

Victor, N. Y.

Sealed proposals will be received by the Board of Trustees of the Village of Victor, N. Y., until 8 o'clock p.m., on the 7th day of July, 1924, for the additional water supply consisting of about three miles of eight-inch supply main, intake, pump house and accessories.

Plans and specifications may be seen at the office of the Board at Victor, N. Y., or at the office of Hopkins & Field, Engineers, 349 Cutler Building, Rochester, N. Y. Plans may be obtained from the engineers upon a deposit of ten dollars.

The Board hereby reserves and has the right to reject any or all bids, or to accept any that in its judgment will be for the best interests of the Village.

A surety bond satisfactory to the Board in form and amount will be required of him to whom a contract may be awarded.

A certified check, made payable to the Board of Trustees of Victor, N. Y., to the amount of $1,000, must be deposited by each bidder and accompany his bid, as a guarantee that in case the contract is awarded to him he will, within ten days thereafter, execute such contract and furnish his bond.

Bids must be sealed and addressed to the Board of Trustees, Victor, N. Y., and marked on the outside of the envelopes "Proposal for Additional Water Supply."

EDGAR B. CASE, Village President.
MICHAEL KEATING, Clerk.
Dated, Victor, N. Y., June 2, 1924.

OFFICIAL PROPOSALS

Bids: July 21.

Pipe Sewers and Disposal Works

Hasbrouck Heights, N. J.

Sealed proposals will be received and opened publicly by the Mayor and Council of the Borough of Hasbrouck Heights, N. J., at the Borough Municipal Hall, at 8:15 p.m. (Daylight saving time), Monday, July 21, 1924.

Proposals are to cover construction (both materials and labor) of certain pipe sewers and disposal works, according to plans and specifications filed with the Borough Clerk.

Copies of plans and specifications may be seen also at office of the engineers, City-Wastes Disposal Company, 45 Seventh Avenue, New York City. Sets may be borrowed upon deposit of $15 of which $10 will be refunded if papers are returned in good condition before August 1, 1924.

Approximately the proposed work consists of:

About 72,000 feet of vitrified pipe sewers, 8-inch to 20-inch, with manholes and flush-tanks.

About 3,800 feet of iron pipe sewers with appurtenances, 8-inch to 16-inch.

An indeterminate amount of drain-tile laid in sewer trench.

Sewage tanks, trickling filters and sand-beds with appurtenances.

Each bid must be made on blank forms obtained from the Borough Clerk or the Engineers, and must be accompanied by a certified check for $10,000 as a guarantee of good faith.

The Borough reserves the right to reject any or all bids.

JOSEPH P. BREEZE,
Borough Clerk,
Hasbrouck Heights, N. J.

Bids: July 12.

Street Paving and Storm Sewer Construction

Cold Spring, N. Y.

Sealed proposals will be received by mail by the President and Trustees of the Village of Cold Spring, New York, at the Hose House in Cold Spring, New York, until three o'clock (standard time), July 12, 1924, for street improvements and storm sewer line.

The work will consist of about 6,000 square yards of reinforced cement concrete pavement; 3,700 linear feet of curb, and 3,000 linear feet of concrete storm sewer pipe 18" to 30" in size and concrete box culvert.

All bids must be upon blanks provided in the proposal furnished to bidders.

Bids must be accompanied by a certified check for three per cent (3%) of the amount of the bid. Plans and specifications will be on file at the Village Clerk's office in the Village of Cold Spring, New York, and at the office of the Engineer, H. Eltinge Breed, 507 Fifth Avenue, New York City.

Copies of the plans and specifications may be obtained on and after June 28, 1924, for three dollars ($3.00) per set. No refund for blanks returned. Bidding blanks will be furnished free.

The right is reserved to reject any or all bids.

CHARLES HASENMAILE,
Village Clerk.

ENGINEER,
507 Fifth Avenue,
New York City.

Bids: July 31.

Sanitary Out-Fall Sewers

Tulsa, Okla.

Bids will be received by the City of Tulsa on July 31st, 1924, for the construction of sixteen miles of sanitary out-fall mains, with two disposal plants. Estimated total cost $450,000.00. Ninety per cent of monthly estimates in cash.

CHARLES SCHULTZ,
City Engineer.

If we had no faults we should not take so much pleasure in noting those of others. (Old adage.) But even so "Swart Service Really Serves" *unusually well.*

258 Valley Road, West Orange, N. J.

OFFICIAL PROPOSALS

Bids: July 22.

Court House Building Improvement

Norristown, Pa.

Bids will be received by the Controller of Montgomery County, at his office in the Court House, Norristown, Pa., up until 10 o'clock a.m. (Standard time), July 22, 1924, for the Renovation and repairing of the Court House Building, Norristown, Pa., in accordance with plans and specifications on file in the County Commissioners' office.

The Commissioners reserve the right to reject any or all bids.

Checks accompanying proposals must be handed to the Clerk of the County Commissioners, one hour before the time for the opening of bids, which will be done publicly at 11 o'clock a.m. (Standard time), July 22, 1924, in the County Commissioners' office.

WM. C. IRVIN,
Controller.

Railroad Construction, Calumet, Mich.

Calumet, Mich.

Bids are invited at once by the Calumet and Hecla Consolidated Copper Company, Calumet, Michigan, for construction of a single track railroad about 9.3 miles long, near Calumet, Houghton County, Michigan, involving approximately 302,000 cu.yds. earth excavation, 45,000 cu.yds. rock excavation, 247,000 cu.yds. earth borrow, 3,200 cu.yds. concrete, placing 9,000 lineal feet of culvert pipe, 9.3 miles track laying, ballasting and fencing.

U. S. GOVERNMENT

SEALED PROPOSALS will be received by the U. S. Veterans Bureau, Room 791, Arlington Building, Washington, D. C., until 11:00 A.M., July 22, 1924, and then and there publicly opened for the construction of New Bituminous Macadam roads, and resurfacing and patching of existing roads at U. S. Veterans Hospital No. 78, North Little Rock, Arkansas. Proposals will be considered only from individuals, firms, or corporations possessing satisfactory financial and technical ability, equipment and organization to insure speedy completion of the contract and in making awards the records of bidders for expedition and satisfactory performance on contracts of similar character and magnitude will be carefully considered. Drawings and specifications may be obtained upon application to the Construction Division, U. S. Veterans Bureau, Room 791, Arlington Building, Washington, D. C., or to the Medical Officer in Charge, U. S. Veterans Hospital No. 78, North Little Rock, Arkansas. Deposit with application of a check or postal money order for $10, payable to the Treasurer of the United States, is required as security for safe return of drawings and specifications within ten days after date of opening proposals. FRANK T. HINES, Director, June 23, 1924.

TREASURY DEPARTMENT, Supervising Architeet's Office, Washington, D. O., June 20, 1924. Drawings and specifications may be obtained from the Custodian, U. S. Post Office, Pontiac, Mich., or from this office in the discretion of the Supervising Architect. Jas. A. Wetmore, Acting Supervising Architect.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., June 20, 1924.—SEALED PROPOSALS will be opened in this office at 3 P.M., July 21, 1924, for the construction including mechanical equipment and approaches of a (one story brick and tile non-fireproof) Post Office Building (approximately 75 ft. x 51 ft. in size) at Jerseyville, Ill. Drawings and specifications may be obtained from the Custodian of the site at Jerseyville, Ill., or at this office in the discretion of the Supervising Architect. Jas. A. Wetmore, Acting Supervising Architect.

U. S. ENGINEER OFFICE, Nashville, Tenn. Sealed proposals will be received here until 11 a.m., July 7, 1924, and then opened, for one steel steamboat hull. Further information on application.

U. S. GOVERNMENT

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., June 16, 1924.—Sealed proposals will be opened in this office at 3 p.m., July 14, 1924, for the construction of a one-story brick and tile non-fireproof Post Office building (61 feet 6 inches by 69 feet) at St. Johnsbury, Vt. Drawings and specifications may be obtained from the Custodian of the site at St. Johnsbury, Vt., or at this office in the discretion of the Supervising Architect. Jas. A. Wetmore, Acting Supervising Architect.

U. S. ENGINEER OFFICE Florence, Ala. Sealed proposals will be received here until 11 a.m., Aug. 5, 1924, and then opened, for furnishing and erecting a bascuel bridge across the navigation lock of Wilson Dam. Further information on application.

PROPOSALS FOR LEVEE WORK.—Office, Mississippi River Commission, 1st & 2nd Districts, 1006 McCall Building, Memphis, Tenn.—Sealed proposals will be received here until 11 a.m., July 8, 1924, and then opened, for constructing about 5,315,000 cubic yards of earthwork in the Upper and Lower St. Francis, Reelfoot and White River Levee Districts. Further information on application.

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., June 16, 1924.—Sealed proposals will be opened in this office at 3 p.m., July 15, 1924, for the construction of a one-story brick nonfireproof Post Office building, approximately 75 by 50 feet in size, at Waterloo, N. Y. Drawings and specifications may be obtained from the Custodian of the site at Waterloo, N. Y., or at this office in the discretion of the Supervising Architect. Jas. A. Wetmore, Acting Supervising Architect.

UNITED STATES ENGINEER OFFICE, P. O. Box 72, Louisville, Ky. Sealed proposals will be received here until 2:00 p.m., central time, July 24, 1924, and then opened, for furnishing and delivering approximately 750 tons of Hydrated Lime for Dams Nos. 44, 45 and 46, Ohio River. Further information on application.

UNITED STATES ENGINEER OFFICE, P. O. Box 72, Louisville, Ky. Sealed proposals will be received here until 2:00 p.m., central time, July 22, 1924, and then opened, for furnishing and delivering Structural Steel, Castings, etc., for Locks Nos. 49 and 50, Ohio River. Further information on application.

EMPLOYMENT

POSITIONS VACANT

DRAFTSMAN—Experienced man on gas works design. Write giving outline of experience, salary expected and time available. All correspondence confidential. P-209, Engineering News-Record, 10th Ave. at 36th St., New York.

EXPERIENCED structural detailers wanted. Single men preferred. Only experienced men need apply. Application should give telegraphic address. State experience and accompany sample drawing of work. State salary desired. Address Box 654, Havana, Cuba.

EXPERIENCED engineer and estimator on building construction of all kinds, familiar with work in the vicinity of Newark, N. J. Reply stating experience, reference and salary expected. P-250, Eng. News-Record, 10th Ave. at 36th St., N. Y.

FOREMEN and subforemen wanted immediately for construction work on large dam. Experienced men capable of handling crews of concrete, form and steel workers, riggers, mechanics, and common labor. Apply by letter to Consumers Power Company, Qoline Dam, Mesick, Michigan.

GRADUATE engineer wanted to teach mechanics and assist in testing laboratory; teaching experience desired. Box 483, State College, Pa.

MAP draftsman, for tax maps, experience, neatness, accuracy and speed essential. Location, Eastern Ohio. Submit samples of work and state salary. P-240, Eng. News-Record, Leader-News Bldg., Cleveland, O.

ONE assistant engineer and two instrument men with highway construction experience wanted. Apply J. R. Hunt, Road Engineer, Williamson, W. Va.

RESIDENT engineers on highway construction, salaries $180 to $200 per month. State age, education, experience and references first letter. R. D. Jordan, Div. Engr. State Highway Commission, Selma, Alabama.

REINFORCED concrete designing engineer wanted. Must have executive ability and be accustomed to handle a drafting room. Location Japan. Requirements are thorough technical training of at least five years, two of which should include executive experience, in charge of design. Application must state age, experience, nationality, habits, and whether married or single. References required, preferably from previous employers. No application will be considered that fails to follow above instructions exactly. Wanted also a reinforced concrete engineer with sales experience for Rangoon, Burma. Submit same information as above. Truscon Steel Co., Youngstown, Ohio.

SEVERAL experienced draftsmen on stairs, elevator inclosures, marquise, and and the general line of ornamental iron work wanted. In replying state experience and salary expected. Address Richmond Structural Steel Company, Inc., Richmond, Va.

Learn Estimating and Construction Management

through practical spare time study course. Full particulars and first lessons sent for free examination.

TYREAN INSTITUTE
15 Grove St., Palmer, Mass.

SEVERAL detailers and checkers experienced on shop drawings for structural steel work. Excellent opportunity for first-class men. Whitehead & Kales Co., Detroit, Mich.

STRUCTURAL steel detailers and checkers wanted. Only experienced men need apply. J. Cutler Iron Works Inc., 95 Lombardy St., Brooklyn, N. Y.

STRUCTURAL steel detailer and checker, experienced in building work. State in application age, nationality, education, experience, references, salary expected, and date available. The James H. Tower Iron Works, Providence, R. I.

STRUCTURAL steel and railroad bridge draftsmen wanted. State age, nationality, education, experience in full, salary expected and the date you can report for work. Address P. G. Lang, Jr., Engineer of Bridges, Baltimore and Ohio Railroad Company, Baltimore, Md.

SURVEYOR with actual experience in sectionizing, subdividing and city lot surveying. Permanent position at good salary for registered surveyor who has been in business for himself in Chicago district. James Anderson Company, Lake Forest, Ill.

WORKING sub-foremen capable of sheathing, excavating and concreting small foot bridge abutments and building dry retaining walls. Wages $6.00 to $7.00 per day. Apply by letter or in person to Superintendent, Bronx Parkway Commission, Bronxville, N. Y.

EMPLOYMENT AGENCIES

GENERAL Engineering Agency, Allegheny Building, Pittsburgh, require proposals for transcontinental connections, Boston, New York, Philadelphia, Birmingham, St. Louis, Detroit, etc. Mechanical superintendents, production, power, electrical divisions. Master mechanics, plant draftsmen, chemists, for architectural, structural; office, shop and field work. Office structures, factory buildings, automotive, steel, mining, smelting and chemical industries. Chief draftsmen, checkers, detailers, sixty bonafide topographical map or constructional draftsmen for highways, railways. Assistant City Engineers, small cities. Professors, instructors, teachers for colleges, high schools. Latin-American connections. Commission, 3 per cent. Employers served freely.

WANTED immediately: Bridge designer, middle west, $185; chief of party, highway work, south, $175 and expenses; structural and field engineer, speak Spanish, Mexico, $200, transportation; structural draftsman, Texas, $175; highway draftsman, east, $150; highway instrumentman, east, $100 and expenses; instructor in C. E. and director athletics, $2,400; concrete highway inspector, $150. Apply Business Mens Clearing House, Denver, Colorado.

EMPLOYMENT SERVICE

SALARIED men seeking tentative offers of new connections, are invited to communicate confidentially with the undersigned, who will negotiate overtures without jeopardy to present connections. A professional, ethical service, restricted to high grade positions; established 1910. Retaining fee refunded as provided in our "Refund Contract" if service is not satisfactorily rendered as per contract, and such refund be requested within three months from date remitted. Send name and address only for particulars. R. W. Bixby, Inc., 701 Lockwood Building, Buffalo, New York.

SPECIALIZED SERVICE

for placement of men with technical training for all branches of manufacturing, commercial and engineering lines, negotiations strictly confidential, no advance obligations required. Many thousands of satisfied clients can testify as to the merit of our eighteen years of service.

INTERSTATE EXCHANGE
658 Rose Bldg., Cleveland, O.

***Wilson Courses* (by mail)**

Called the most "Practical Courses" in existence. The courses called by students "Men Makers. With just sufficient theory to make the practice work *understandable.* No re-hashing of college work: We aim to help you apply your college taught theory in the most interesting manner possible. The price of such a course should not hold any ambitious man from subscribing because the difference in salary will quickly cover the item; we have found this to be true in all cases where the student was in earnest. IMMEDIATE promotion upon acquisition of more earning power, following a period of studying our courses. Wilson trained men are finding it easier to secure and hold positions.
Send for our literature and learn WHY. It IS FREE.

Courses are
Reinforced Concrete Engineering,
Structural Steel Designing, Estimating, Drafting
Bridge Design, Estimating
Concrete Drafting and Estimating

Preparatory course for men who lack a technical education, leads right into the higher courses. Write NOW:

Wilson Engineering Corporation
College House Offices, Harvard Sq., CAMBRIDGE, MASS.

SALES, technical graduate, 29, married, 3 years' construction and design, 3 years' sales; present employed. SA-147, Engineering News-Record, 10th Ave. at 36th St., New York.

PATENT ATTORNEY

PATENTS — Send for form "Evidence of Conception" to be signed and witnessed. Form fee schedule, information, free. Lancaster and Allwine, 272 Ouray Bldg., Washington, D. C.

EDUCATIONAL

Private Practical Instruction

Arithmetic, Algebra, Geometry, Trigonometry, Calculus, Engineering, Draughting, Designing, Architectural, Mechanical, Topographical, Structural, Surveying. Thorough preparation for Colleges, Technical institutions, Civil Service Engineering examinations, Axeman, Rod man, Transitmen, Inspectors, Highways, Sewers, Paving, Masonry, Engineering. L. Mondell, C. E., 50 East 42nd St., N. Y.

BUSINESS OPPORTUNITIES

Contractor

I wish to get in touch with a small contractor who would like to associate with a young civil engineer having a knowledge of accounting and willing to invest a small amount in the business. BO-213, Engineering News-Record, 10th Ave. at 36th St., New York.

Wanted

Well-equipped middle sized machine shop, preferably located in Middle West, for manufacturing patented pulp and paper machinery; acquiring financial interest preferred. BO-232, Eng. News-Record, 10th Ave. at 36th St., New York.

WANTED

Wanted

Several modern used transits and levels, best makes. Name lowest cash price, make, equipment and condition. W-248, Eng. News-Record, Old Colony Bldg., Chicago, Ill.

SALESMAN WANTED

Salesman in Chicago territory to handle a well established, well advertised drafting room necessity. Knowledge of drafting desirable. Give references in application.

AS-228, Engineering News-Record
Leader-News Bldg., Cleveland, Ohio.

GROTON IRON WORKS

The entire plant of the Groton Iron Works, Groton, (New London) Conn. has been purchased by us and is now to be offered for sale, including all real estate, buildings, equipment and material. This plant, modern in every respect —was formerly operated by the U. S. Shipping Board Emergency Fleet Corporation. It occupies 34 acres of land with over 1800 ft. frontage on New London Harbor. Extensive wharves and switch tracks on the New York, New Haven and Hartford Railroad provide unusual shipping facilities. There are 15 buildings providing in excess of 200,000 sq. ft. of manufacturing space. The equipment is all in surprisingly good condition, owing to the fact that it has had very little use, and almost endless variety of machinery is available. Among the principal items are:

Cranes, Overhead Gantry and Jib
Fabricating Shop Equipment
Machine Shop Equipment
Pipe Shop Equipment
Blacksmith Shop Equipment
Joiner Shop Equipment
Electrical Equipment
Hoists, Elec., Steam and Shepard
Transformers, 15 to 667 K.V.A.
Pipe, Great Quantity
Motors 1 to 75 H.P.

PROPOSALS WANTED

Purchase of Old Cummer Paving Plant

Notice is hereby given that sealed proposals, bearing the number (6298) of the bid and endorsed with the name of the bidder and the date of presentation, will be received at the office of the Purchasing Agent, at the City Hall, Saint Paul, Minnesota, until 2:00 P.M., Tuesday, July 1, 1924, for the purchase of an old Cummer Paving Plant, belonging to the Department of Public Works.

A bond in the sum of 10 per cent of the amount bid with two sureties, residents of the city of St. Paul, or a Surety Company bond in the same amount, or a certified check for ten per cent of the amount bid, must accompany each proposal as surety for the making and execution of a contract. Bidders having a general bond covering all bids on file in the office of the Purchasing Agent must so state on their bid.

The city reserves the right to reject any or all bids, or any part thereof.

Bids are to be submitted in duplicate upon the regular proposal blank, which may be obtained upon request in the office of the Purchasing Agent, and are subject to the conditions stated thereon. All bids will be opened in public, at the time above stated, by the Purchasing Agent, in the presence of the Purchasing Committee.

H. W. AUSTIN,
Purchasing Agent.

USED EQUIPMENT

AND NEW, OFFERED FOR RE-SALE

Space for these advertisements is sold by the advertising inch—30 inches to a page. The price per inch is based on total space used—multiply ad space by number of insertions.

RATE PER INCH:

1 to 3 inches	$5.00 an inch
4 to 7 inches	4.80 an inch
8 to 14 inches	4.70 an inch

An inch is measured vertically on one column—three columns to a page. Any space may be used measured by the even inch in height by 1, 2, or 3 columns in width.

RATES FOR LARGER SPACES, OR SPACE ON A YEARLY BASIS, FURNISHED ON REQUEST.

Pumps

1—8-in. Morris Cent. with steam engine.
3—Morris 6-in. Cent. Sand, with steam engine.
1—Morris 4-in. Cent., with steam engine.
1—No. 5 Pulsometer; also No. 3 Nye.

Buckets

6—Clam Shells, ¾ to 1½-yd. capacity.
1—½-yd. Owen clamshell.
1—1 yd. Class "E" Hayward.

Hoists

4—7x10, D/D Lidgerwood, Lambert, Mundy.
1—Flory 8¼x10, D/C 3/D with boiler.
1—Mundy, 7¼x10, D/C, D/D, with atttached swinging gear, with boiler.
1—Mundy, 8x12, D/C, 3/D, with boiler.
1—O&S, 7x10, D/C, S/D link motion.
4—Swinging Engines.

Cars

20—24-in. ga., all-steel Flat, with Batch Boxes.
17—24-in. ga., V-shaped, 1½ yd.
Also various types 36-in. and std. ga. cars.

Drag Lines and Dredges

5—Monighans, Models 1T, 2T, 2½ and 3S.
3—Bucyrus Class 20 and 24.
1—Marion 21 caterpillar.
1—Lidgerwood, 60-ft. boom, steam power.
2—Northwest, gas. power, on caterpillars.
4—Bay City Dredges, 25 to 65-ft. Spans.

Derricks

12—Wood and Steel Derricks, from 5 to 20-ton capacity, 50 to 120-ft. booms, rigged for single and 3-line work.

Trenching Machines

1—Parsons Model 24 used very little, equipped with 4-cy. Minneapolis Motor.
1—Parsons Model 48, Steam Power, Cat. type.
1—Buckeye Ditcher, Cat. Traction, will dig 5 ft. deep and 11½ to 17 in. wide.
1—Parsons Model 36, Gas Power.

Paving and Road Equipment

4—Road Rollers, from 3½ to 10-ton.
1—Cummer Asp. Plant, cap. 1850 sq. yd.
2—Merriman Asp. Plants.
6—Pavers from 1 sack to 21-E, various makes.
20—Western Bottom Dump Batch Boxes, 37 ft.

We also have various makes of Boilers, Cars, Locomotives, Crushers, Conveyors, etc.

ECA
REBUILT

"WE BUY— REBUILD SELL OR RENT"

All equipment listed below is in stock and may be inspected at one of our four Rebuilding Plants.

BOILERS

4—Locomotive type, 1—75 hp.; 2—50 hp., on skids, and 1—24 hp. on wheels.

22—Vertical Boilers, ranging in size from 30-in. diameter by 60-in. in height to 48-in. diameter by 120-in. high.

CARS

66—Flat Cars, 24-in. gauge, spring journals and couplers. 12 Koppel, frame 35x84, 6-in. channels. 10 Lakewood. 44 Western Wheel Scraper.

38—1¼-yard "V" shaped Koppel cars.

CLAMSHELL BUCKETS

58—Sizes from 2 yd. to ½ yd., following makes, Standard, Hayward, Blaw-Knox, Dreadnaught, Owens, Lakewood, Kiesler, Haiss, McMyler.

PAVING MIXERS

6—Koehring Paving Mixers on traction wheels and caterpillars, size 10-E, 14-E, and 21-E.

1—Austin Cube—14-E.

CABLEWAY EXCAVATOR

1—Sauerman ¾-yd. Cableway Excavator Bucket.

1—Pioneer ¾-yd. Cableway Excavator Bucket, complete with cable, blocks and sheaves for 350 ft. span, and one 8½x10 double drum hoist with boiler.

CRANES AND DRAGLINES

1—Northwest Combination Crane and Dragline, caterpillar, 40-ft. boom, 70-hp. Gasoline Engine, 1-yd. Bucket.

1—Byers Auto Crane, on traction wheels, with 30-ft. boom, with ½ or ¾-yd. clam shell bucket, steam.

1—15-ton, 8-wheel, O. & S., 40-ft. boom.

1—15-ton Industrial 50 ft. boom 1½-yd. clam shell bucket M.C.B. used only 5 months.

CABLEWAY

7-ton Lidgerwood. Head tower 115 ft., tail tower 105 ft., 1370-ft. span. Complete with carriers, table, blocks, etc. With 1—10x12 Reversible Lidgerwood Steam Hoist. No boiler.

STRIPPING SHOVEL

1—Marion No. 250 Steam Shovel equipped with 50-ft. dipper stock, 75-ft. boom, 3½-yd. dipper; shop No. 3032.

SPECIALS

CATERPILLAR COMBINATION CRANE AND DRAGLINE

1—Northwest Combination Crane and Dragline, mounted on caterpillars, 40-ft. boom, 70-hp., 4 cylinder heavy duty gasoline engine, either 1-yd. clamshell or dragline bucket; thoroughly rebuilt, condition equal to new; immediate delivery.

KOEHRING 21-E PAVER

1—21-E Koehring Paver, mounted on half caterpillars, equipped with boom and bucket, batch meter, steam engine and boiler; new 1922; first class condition; is real bargain.

TRACK

10 Miles Portable Track, made up in 15-ft. sections, 20-lb. rail, 24-in. ga., clip and bolt construction—1/3 with 5 steel ties to section, 1/3 with 6 ties and balance with 7 ties. Also complete quota of curves and switches.

CARS

66—24-in. ga. Flat Cars: 44—Westerns, 10—Lakewood, 12—Koppel.

38—1¼-yd. V-shaped, 24-in. ga. Koppel Dump Cars.

12—Western 1½-yd., 24-in. ga. Dump Cars.

BATCH BOXES

129—60 Lakewood steel tipover type, 30 cu. ft. cap.; 44 Western, wooden, 25 cu. ft. cap., and 25 Lakewood steel tipover type, 25 cu. ft. cap.

CONCRETE MIXERS

1—Ransome, No. 56-S, cap. 2-yd. on skids, without tower.

44—Concrete Mixers, sizes 28-S, cap. 1-yd., 21-S, cap. ¾-yd.; 14-S, cap. ½-yd., and 10-S, cap. 1¾-yd. With steam or electric power with side loaders or batch hoppers. Following makes: Marsh-Capron, Koehring, Milwaukee, Ransome, Smith, Smith-Chicago, Rex, Lakewood, Foote, Cube or Oshkosh.

38—7-S, cap. 1 bag, with low charging platforms, with gasoline engines.

STEAM HOISTS

8—Three-Drum Hoists, with or without boilers. Sizes, 9x12, 9x10, 8¼x10, and 7x10, with separate swingers for derrick work. All makes.

72—Two-Drum Hoists, with or without boilers. Sizes, 10x12, 9x10, 8¼x10, 7x10, 6¼x10, 6x8, and 5x8. Can be equipped with holding drum for bucket work. Several special Cableway Excavator or Drag Scraper Hoists. All makes.

2—4¾x6 double cylinder, single drum, reversible with elevator sheave, complete with boiler.

5—Swinging Engines.

2—Double Drum Belt Hoists, 6000 lb. line pull. 1—5000 lb. line pull.

LOCOMOTIVES

1—Schenectady, 16x24, standard gauge, 6-wheel Switcher, with tender. Weight on drivers, 45 tons.

1—10x16 Davenport, 20 ton, std. ga., steam. Shop No. 1497.

2—18-ton, 36-in. ga., cylinders 10x16. 1 Porter, shop No. 5238. 1—Vulcan No. 1575.

4—6-ton, 24-in. ga. gasoline locomotives. 1—Whitcomb, 1—Plymouth, 2—Burton.

1—3-ton Plymouth, 24-in. ga. gasoline locomotive.

1—6-ton Burton, 36-in. ga. gas.

ROAD ROLLERS

4—10-ton, 3-wheel; 1 Buffalo-Pitts; 1 Peerless; 1 Monarch; all steam; also 1—2-cylinder Austin gasoline.

5—Tandem; 1—10-ton Iroquois 1—8-ton Erie; 1—5-ton Iroquois; 1—5-ton Buffalo-Pitts; 1—3-ton Erie; all steam.

PILING

15—Pcs. U. S. straight web, 20 ft. long.

36—Pcs. Lackawanna 14x⅜ in.—10 Pcs. 22 ft. 6 in. long, 5 Pcs. 24 ft. long, and 21 Pcs. 28 ft. long.

STEAM SHOVELS

1—Type A-1 Thew, traction wheels, ⅞-yd. dipper.

2—Type O Thew, on traction wheels with ⅝-yd. dipper.

1—Type O Thew, traction wheels with ⅝-yd. dipper—shipper shaft.

4—Keystone Excavators. 3—No. 3. 1—No. 4.

ELECTRIC HOISTS AND DERRICKS FROM HOG ISLAND

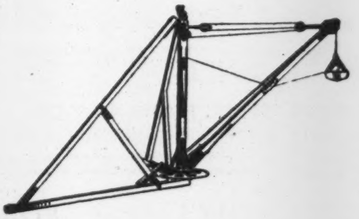
Available For Inspection and Shipment From Our Four Plants

Specifications of Electric Hoists

Large number of American late model hoists. These hoists have 2 drums with attached swinging gear, with 37-hp. Otis A.C., 440-v., 60-cy., 3-ph. electric motor—complete with controllers and resistance grids—can be changed to suit customer's current requirements if desired

Can furnish counterweighted holding drums with these hoists when used for operating bucket.

Also several 55 and 75-hp., single and double drum hoists with A.C. motors.



Specifications of Derricks

Large number of practically new American stiff-leg derricks.
Boom, 14x14x80 ft., trussed.
Mast, 16x16x40 ft.
Legs, 14x14x62 ft.
Bull wheel, 16 ft.
For Single Line Work or Arranged for Bucket Operation.
Will sell fittings only if desired.
Also have large stock of lighter stiff-leg derricks, several steel stiff-legs, 20, 30 and 50 ton.

GUY DERRICKS

A number of both wood and steel guy derricks, 5, 10 and 25-ton capacity.

The above is only a partial list of our equipment. Write for latest stock list.

CONSTRUCTION EQUIPMENT

READY FOR IMMEDIATE DELIVERY

BLOWERS

2—Connersville Blowers 14x10 in., 350 r.p.m., displacement 2.77 cu.ft.

BOILERS

1—50-hp. Steward Locomotive type on skids.
1—60-hp. Nagle Locomotive type on wheels.

BUCKETS

2—¾-yd. Buffalo clam shell.

CABLEWAY

1—1000-ft. span, Lenher Engineering Co., 3-ton stationary, complete with 9x10 Mead-Morrison DD DC skeleton steam hoist.

CARS

30—"U" shaped Koppel 35 cu.ft. concrete cars 30-in. gauge.
10—1½-yd. Western 30-in. gauge, side Dump Cars.
2—4-yd. Western 36-in. gauge, side Dump Cars.
1—Standard gauge, Northwestern Gasoline Car.

COMPRESSORS

1—I.-R. P.R.E. type 1726 ft. direct connected to 334 hp. G.E. Synchronous AC motor, 3-ph., 60-cy., 2200-v., 200 r.p.m. generator and starter.
2—I.-R. Imperial type 888 ft. belt driven with motors, 150 hp. G.E. AC, 3-ph., 60-cy., 220 v., 700 r.p.m. oil switches and controllers.
3—Chicago Pneumatic 750 ft. 17x10x12 O.C.B. compound belt driven with 150 hp. G.E. slip-ring motors, 3-ph., 60-cy., 2200-v., 695 r.p.m., oil circuit breakers and controllers.

CRUSHER EQUIPMENT

1—Austin No. 5 Gry. Crusher manganese head and concaves.
1—Austin No. 3 Gry. Crusher manganese head and concaves.
1—Austin No. 5 Standard Elevator 50 ft. center to center.

DRILLS AND DRILL SHARPENERS

20—No. 248 I.-R. Water Leyner Drills complete.
15—DCR No. 13 I.-R. Jackhammers with 1-in. hex. rotation sleeves.
3—Ingersoll Leyner Oil Furnaces.

HOISTING ENGINES

2—Special No. 35 Lidgerwood 7x10 steam D.C. single friction drum.
1—Flory S.D. 35 hp. Westinghouse slip ring A.C. motor, type CW, 3-ph., 60-cy., 200-v., 865 r.p.m. with controller and resistance grids.
1—Flory Elec. D.D. with 50 hp. Westinghouse slip-ring, AC motor, type H.F., 3-ph., 60-cy., 220 v., 860 r.p.m. with G.E. controller.
1—Lidgerwood S.D. with 52 hp. G.E. AC motor, type ITC-5012, 3-ph., 60-cy., 830 r.p.m. 220 v., with controller and resistance grids.
2—Ingersoll-Rand Little Tugger Air Hoists.

DERRICKS

1—Stiff legged Derrick complete with boom 15x13 in.x65 ft. lg., mast 15 in.x35 ft. lg., bull wheel 14 ft. diam.

LOCOMOTIVE CRANE

1—12-ton 8-wheel standard gauge Osgood with 40-ft. boom.

LOCOMOTIVES, GAS AND ELECTRIC

4—4-ton 30-in. gauge Whitcomb elec. storage battery, complete, batteries.
3—Type 2, Model CL, 4-ton Plymouth Gas 30-in. gauge, equipped with elec. starting and lighting system.
3—3-ton 36-in. gauge Plymouth Gas.

MIXERS

1—No. 28-S Chain Belt Rex 1 cu.yd. Motor drive.
1—Austin Cube—1 cu.yd. motor or steam drive.

MOTORS AND GENERATORS

21—3 to 50 hp. AC, Squirrel Cage, 3-ph., 60-cy., 220 volts, 850 to 1700 r.p.m. with starters.
1—G.E. Generator DC 50 kw. Class 6-46-975, 900 r.p.m. with Wooton charging panel type No. 6, Serial No. 13469, 125 v.
1—G. E. Generator DC 12¼ kw. type 8C compound wound, 1325 r.p.m. complete with rheostat, panel and instruments.
1—Westinghouse Generator DC 7½ kw. compound wound, style No. 294610, 1740 r.p.m., complete with rheostat, panel, instruments, etc.

PUMPS

2—5x8 Worthington Triplex Plungers with motor base.
1—5x8 Dean Triplex Plunger with motor base.
4—7½x5x6 Worthington Duplex piston pattern.
2—7½x4½x12 Worthington piston pattern.
12—Cameron steam pumps of various sizes.

RAILS AND PIPE

11500 ft. 6¼ in. well casing wgt. per ft. 11.65 lbs. with Dresser joints.
A large quantity 2-in., 3-in., 4-in. and some 6-in. standard Blk. Merchant Pipe with good threads and couplings.

SHOVELS

4—No. 2 Hoar Tunnel Muck Shovels equipped for 30-in. gauge track, 6 cu.ft. dipper.

TRANSFORMERS

6—50 kva. G.E. Transformers, type H, 2300-v., 50/60-cy., 1-ph., 115/230 sec. v.

MISCELLANEOUS

Large quantity small tools and equipment including chain blocks, blacksmith tools, machine shop outfit, Jacks, Bingates, electric wire, drill columns with arms, manifolds complete, etc.

Now when a bunch of careless men
Pile on all they can stow,
The **"Hook 'er to the Biler"** hoist
Will just refuse to go.
Its load, of course, is never more
Than steam time piston makes.
So any school boy could design
This kind which never breaks.

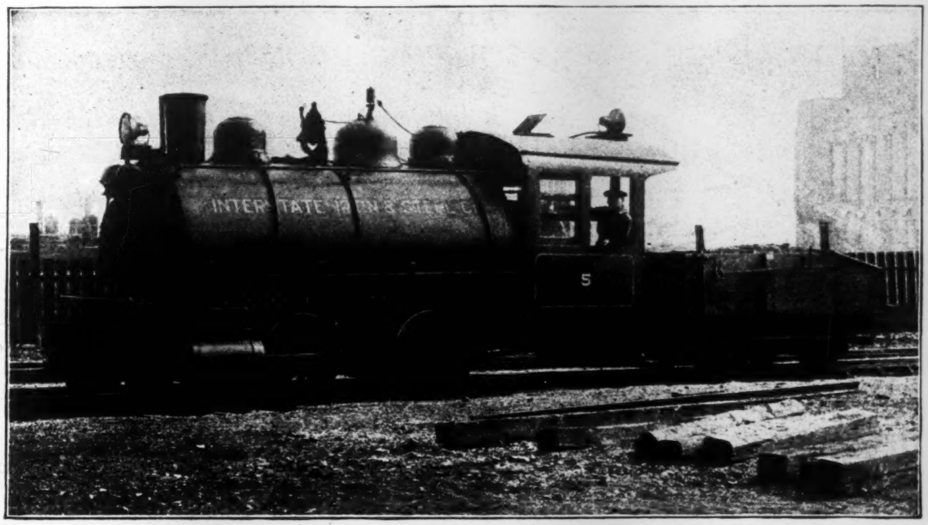
STORM, RUST & GAS PROOF

CAST ALUMINUM ALLOY BUILT TO LAST

Pyle-O-Lytes

and STEAM TURBO-GENERATORS



Interstate Iron & Steel Company locomotive equipped with Pyle-O-Lytes, Type 1045 AGB, front and rear, and with Pyle-National Type "K-2" Steam Turbo-Generator.

Pyle-O-Lyte Type 1045

widely used for yard lighting around iron and steel plants—one of many Pyle-National floodlighting units. It speeds up night work and increases the efficiency of men and equipment. Cases built of long-lived cast aluminum alloy that will outlast many ordinary sheet metal units—storm, rust and gas proof.

For Every Lighting Requirement of Iron and Steel Plants

FOR either locomotive lighting, or for yard floodlighting, you will find Pyle-National units that exactly meet your needs—efficiently, dependably, and at reasonable cost for installations and operation. The same equipment that lights 90% of the steam railway locomotives in the United States and abroad has proved its dependability for industrial lighting of every nature.

Pyle-National Steam Turbo-Generators

are your most dependable source of current for locomotive lighting—or for any other lighting requirement where highline current cannot be used. They are of simple but rugged construction, and long-lived, even under the most severe working conditions. Their steam consumption is less than that of any other Turbo-Generator of equal size and capacity. Furnished in five types, with capacities ranging from 500 watts to 7½ k.w.

HARGER AND BONNEY
HIGHWAY ENGINEERS' HANDBOOK
THIRD EDITION - REVISED AND ENLARGED
COVERS ALL TYPES OF ROAD CONSTRUCTION

"Humdinger"

We use the word cautiously.

But that is how a prominent highway engineer of our acquaintance describes

Harger and Bonney's

Highway Engineers' Handbook

Third Edition

986 pages, pocket size, flexible, $5.00 net, postpaid

We asked him what he regarded as the best handbook on highway work.

He said: "Without question, Harger and Bonney. It's a humdinger. I use it and have had others use it, and I know. It's indispensable for field work. Harger and Bonney has the data needed by the man on the job—the man who is actually building roads."

The third edition of this practical handbook covers all the types of road construction.

The authors have put into it what they themselves needed to know in order to carry on the work of inspection, engineering, designing, construction and supervision on road projects of all types.

Examine HARGER and BONNEY for 10 days, FREE it's a field book—pocket size

Fordson Hauls 4½ Tons of Rock Asphalt, 3 Miles—8 Times per Day

Here is a striking example of how dependably and economically Fordson Power is serving contractors and engineers on hauling jobs of every description. In this case it is Rock Asphalt, and the equipment used by the owners, McArthur Construction Co., Kenton, Ohio, consists of two Fordson Tractors and four dump trailers.

Called on to make 8 trips each day a distance of 3 miles on every trip, with a load of 4½ Tons of Rock Asphalt, the Fordson Tractor proved capable to the task and at the same time helped to reduce the cost of hauling 5.74 cents per ton mile.

Adaptability to different uses, low upkeep, and the unsurpassed service available to users of Ford equipment are among the advantages that accompany the use of the Fordson for industrial purposes.

For excavating and general construction work, for road building and maintenance, for transporting supplies, tools and men, in fact, on every kind of an industrial job there is work that Fordson can do at a big saving in time and money.

Let your nearest authorized Ford dealer arrange a practical Fordson demonstration for you. See for yourself how the Fordson can reduce hauling and power costs for you.

Any Authorized Ford Dealer has facts and figures that will show you how you can profitably Fordize your business

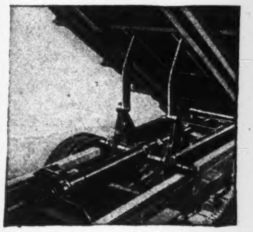
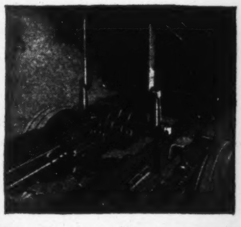
"Hard Luck, Bill!
You'll never fix *that hoist* today!"

Van Dorn Gear-Driven Hoists



The Van Dorn "Average Duty" Underbody Hoist. For pay loads up to 7½ tons. $415 complete; a *low* price for a *high* quality hoist.



The Van Dorn "Heavy Duty" Underbody Hoist. For pay loads of 9 tons. Powerful in action, yet easy to control. $585 complete.

Van Dorn Hoists Always Work!

THEY do not lose power through leaking or clogging; they can not let the truck body fall; they never freeze up in the winter; they need oil for lubrication only, not for operation—they are free from *all* the troubles of common hoists!

The reason is: *they're gear-driven.* They operate in the same way the truck itself does. Long experience has shown that the gear drive (worm, spur or bevel) is the most dependable way to move a truck; and the gear drive is therefore the most dependable way to operate a hoist! Common sense says so—experience proves it! May we send catalog?

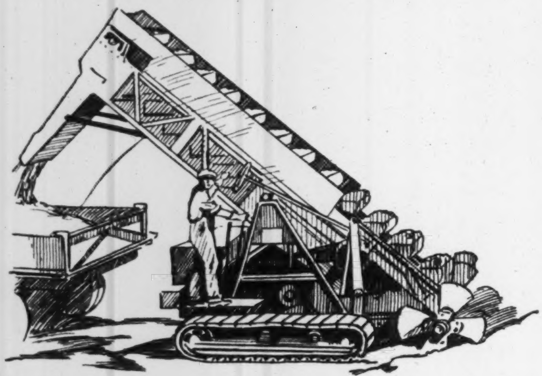
MECHANICAL DUMP TRUCK HOISTS & BODIES

HERCULES
POWER UNIT



Development of excavating and loading machinery has gone far toward a reduction of time, labor and expense connected with this type of work.

In order to take fullest advantage of the saving that is possible thru the use of such machinery, it is essential that it be equipped with a dependable power plant that will withstand the severe test of long uninterrupted service.

Hercules Power Units are supplying a steady, even power for just such service as well as for scores of other industrial power needs that require similar performance under equally trying conditions.

HYDRO-ELECTRIC LIBRARY
for ten days free

What has succeeded—what has failed—what has been economical—and what has been expensive—in all departments of hydro-electric work—explained by Lyndon—Braymer—Taylor—Mead—and gathered together in convenient form in this library.

Exactly what to do and how to do it—exactly what not to do and how to avoid it—the facts in this library are worth much more than 15 cents a day—but that's all they cost. Examine the library free.

What the books cover

- Hydro-electric design.
- Construction of hydro-electric power plants.
- Design and construction of dams.
- Design and construction of pipe lines.
- Design and construction of transmission lines.
- Detailed descriptions of typical American plants.
- Plans and specifications, advantages and disadvantages of various types of electrical machinery.
- Financial and commercial considerations in hydro-electric development.
- The entire engineering problem from the first investigation to the complete plant.

It doesn't cost a penny

to examine this library. We will send the books for just the coupon. If you cannot benefit from them, send them back—If you decide to keep them you need send us what amounts to about fifteen cents a day—$4.00 in ten days and $4.00 monthly for four months.

Ten-ton road roller built by Austin Manufacturing Company, Chicago, equipped with Buda B T U model, 4-cylinder engine, 5" bore by 6½" stroke

A "Buda-Equipped" Roller

During the past few years the Buda engine has replaced steam in many kinds of engineering units. Now it has invaded the "steam-roller" field.

After exhaustive tests the Austin Manufacturing Company selected the Buda engine as the most practical, economical and satisfactory internal combustion engine for their 4-cylinder, 10-ton road roller. Subsequent performance, they report, has more than justified their decision.

Every day it becomes more apparent in the engineering field that *if it's a job for a gasoline unit, Buda's the engine for the job!*

Sanitary sewer installation in Omaha, Nebraska.

To be laid and forgotten

THE kids away in the distance in this picture have probably seen this sewer line for the last time; it is built of the one material in every-day use which is absolutely immune from the attacks of the natural elements of wear and tear.

Ground chemicals and sewer acids cannot penetrate its glass-coated walls; electrolysis cannot break down its structure; it is wear-proof.

Latest practice in the design and construction of concrete and masonry structures

JUST OUT

Hool and Kinne's

Reinforced Concrete and Masonry Structures

Editors-in-Chief, GEORGE A. HOOL and W. S. KINNE

Professors of Structural Engineering, University of Wisconsin
Assisted by a Staff of Fourteen Specialists

722 pages, 6x9, illustrated, $6.00 net, postpaid

This is the sixth volume in the Hool and Kinne Series of Structural Engineering Handbooks.

It offers a practical and detailed discussion of every important element entering into the design and construction of concrete and masonry structures.

The book is thorough, beginning with the preparation and placing of concrete and ending with unit and quantity estimating. Throughout, each of the sixteen specialists has assumed a knowledge of the elementary principles of the subjects on the part of his reader and has accordingly been able to treat his subject with greater detail and practicability than would have been possible otherwise.

Particularly noteworthy are the treatments of Reinforced Concrete Buildings, Concrete Forms, Chimneys and Concrete Detailing. The complete progress report of the New Joint Committee on Concrete and Reinforced Concrete is included in the Appendix.

CONTENTS: I. **Preparation and Placing of Concrete.** Preparation of Concrete. Transporting and Placing of Concrete. II. **Forms for Concrete.** III. **Bending and Placing Concrete Reinforcement.** IV. **Finishing Concrete Surfaces and Waterproofing.** Finishing Concrete Surfaces. Waterproofing. V. **Reinforced Concrete Buildings. General Design.** Basement Walls Concrete Columns. Floors and Roofs—Beam and Slab Construction. Special Types of Reinforced Concrete Roofs. Drainage and Insulation of Concrete Roofs. Roofs Parapet Walls. Miscellaneous Structures. VI. **Retaining Wall Design.** Designing of Gravity Retaining Walls. VII. **Slab and Girder Bridges.** Slab Bridges. Girder Bridges. VIII. **Arches.** General Data. Analysis of Arches. Multiple Span Arches on Electric Piers. IX. **Hydraulic Structures.** Masonry Dams. The Ellipse of Electricity in Arch Analysis. Abutments and Piers. Details of Reinforced Concrete Arch Bridges. Construction of Masonry Arches. Reservoirs. X. **Chimneys.** Draft and Size of Chimneys. General Consideration in Chimney Design. Culverts. Conduits and Sewers. Large Brick Chimneys. Reinforced Chimneys. XI. **Concrete Detailing.** XII. **Estimating Concrete Costs.**

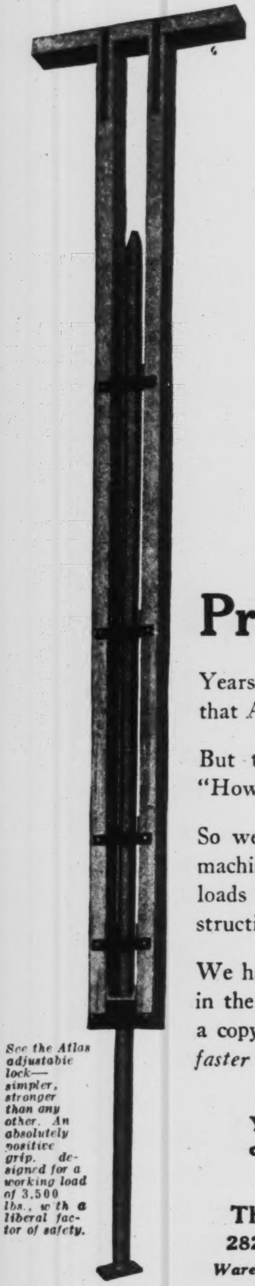
METROPOLITAN SYSTEM

of Floor and Roof Construction

Main Office: Marbridge Bldg., New York City



See the Atlas adjustable lock—simpler, stronger than any other. An absolutely positive grip, designed for a working load of 3,500 lbs., with a liberal factor of safety.

Safe!

5000 lbs.

on a single Atlas Shore at full extension without the slightest slip!

Proved by Test!

Years of practical use long ago proved that Atlas Shores carry the load safely.

But the question is frequently asked: "How much *will* Atlas Shores stand?"

So we put an Atlas Shore in a testing machine, running the test way beyond loads possible to secure in actual construction work.

We have printed the results of this test in the circular shown above. Write for a copy if you are interested in *cheaper, faster* shoring that is also *absolutely safe*.

You won't buy other shores once you try Atlas Shores!

Feb. 13, 1924.

Gentlemen:-

Regarding the ROOSHORS which we purchased from you sometime ago, we would advise that up to the present time we have found them just as represented by you when we purchased. They are very economical and handy in erection and also save a tremendous amount of shoring lumber. We have used them so far on six different jobs and in each instance they proved extremely satisfactory.

At the present time we have 3500 ROOSHORS on hand, which is a sufficient quantity for our present needs. If, however, we should secure more contracts where we could use same to advantage, we will undoubtedly purchase more.

Very truly yours,

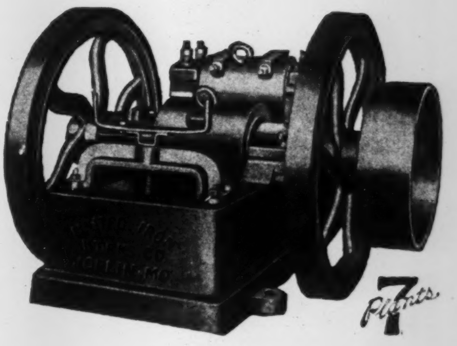
Low Upkeep



—low first-cost

This "United" Blake type crusher both serves you well and saves you money. It saves you on first cost and upkeep and the day after day service it renders increases the contractor's profits.

The "United" Crusher is strong, compact, and solidly put together. Heavy bed, heavy balance wheels, and substantial design throughout give it plenty of stamina. The wearing parts are of a special alloy that approximates manganese steel yet at only a third of its cost. Size of crushed product can be regulated while machine is in operation. Well protected against tramp iron.

It is concentrating on one type of crusher that makes the low price of the "United" possible. This crusher can be had unmounted, mounted on skids, or mounted on a truck with elevator.

Every contractor with a crushing problem should have a "United" Crusher.

Write for Booklet H.

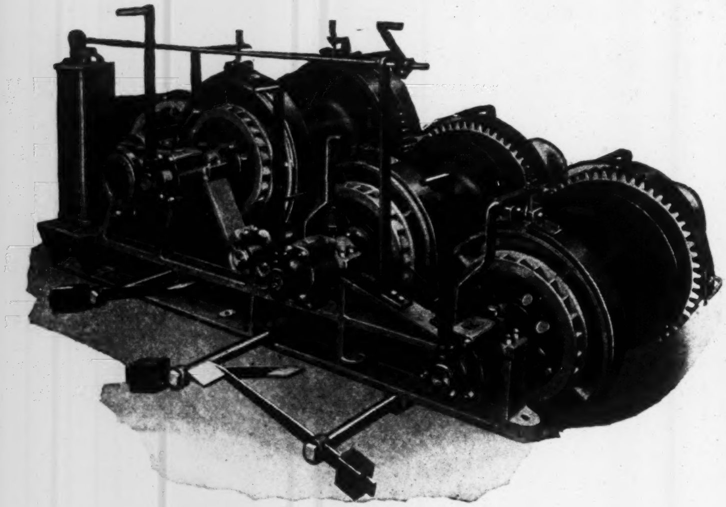
Construction Held Up!

By Heated Friction on Hoist

Has This Ever Happened to You?



Undue heating of frictions and brakes is now eliminated by use of *Asbestall* non-burn frictions and *Asbestolin* lined brakes as built on Mundy hoists.

Asbestall frictions will not char or burn and are unaffected by moisture and oil. These blocks will wear many times longer than wood, leather and other materials.

Brakes lined with Asbestolin, composed of woven metallic asbestos, are mounted on flange end of drum, as shown. This gives more radiating service and prevents the brakes from heating.

May we send our new No. 17 Catalog?

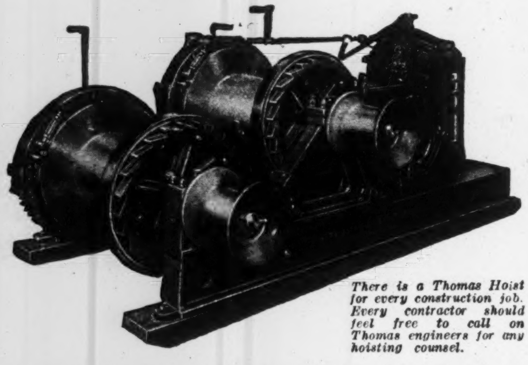
Steam and Electric Building Hoists

This standard double drum Thomas Hoist is the type most universally used for general hoisting. It is a hoist easy to operate and control. Being equipped with the Thomas band frictions, it operates without a thrust bearing. There is no possibility of friction becoming hot. Friction Driven Boom Swinger can be added at any time.

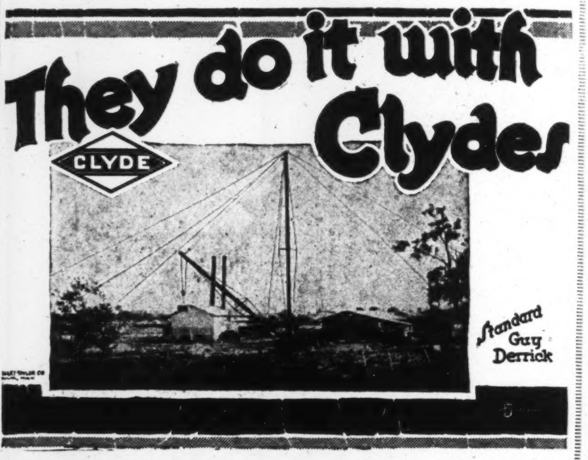
The Thomas automatic motor brake which positively prevents motor from backing down in case of interruption of current, is standard equipment on these hoists.

Ask for Bulletin No. 15

THOMAS ELEVATOR CO.
24 South Hoyne Ave., Chicago



There is a Thomas Hoist for every construction job. Every contractor should feel free to call on Thomas engineers for any hoisting counsel.



"We have never regretted for one minute the purchase of this equipment and will say in our experience with this derrick, we could not afford to be without it for double the initial expense. The saving on our material relative to unloading and handling is far greater than we expected.
INDIANA ASPHALT PAVING CO., W. C. Richter, Sec."

"Temperature Always Under Control"

Think of the cooling an engine needs that operates the powerful machines used to excavate drainage and irrigation canals, clean waterways and build levees and railroad embankments! This work certainly puts a cooling job on the Radiator.

That is why Modine Radiators are used as standard equipment on the engines operating Monighan Walking Dragline Excavators. The Monighan Machine Company says "Temperature is Always Under Control."

Modine Radiators have greater cooling capacity per pound of core material than any other construction.

Write for the Modine Booklet.

PUTTING THE RIGHT STEEL ON THE JOB
TISCO

Putting the Right Steel On the Job

"Profits are based on uninterrupted operations"

There are many kinds of steel; some are tough, some glass hard, some resistant to pressure, some to shock, some to abrasion. Efficiency comes in selecting the particular steel suited to the work which it shall be called upon to perform. A machine is not apt to break down if the parts subject to the greatest wear are made of the proper steel; the proper steel is available and economy demands its use. Scarcely a day passes that some of our engineers do not make specific applications which prove to be money-saving.

The booklet, "Putting the Right Steel on the Job," sets forth a number of these applications. Send for it.

Trident Water Meters

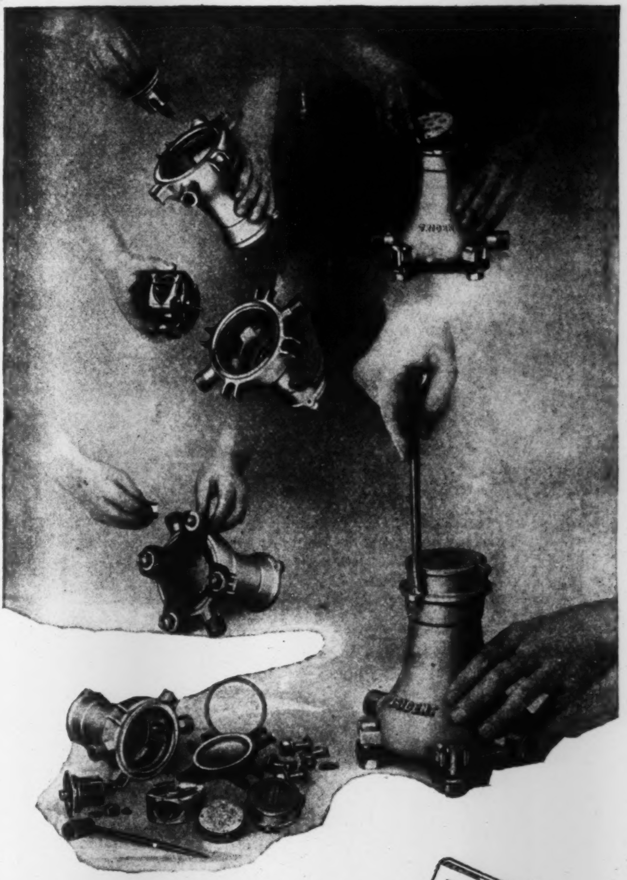
Interchangeable Unit Construction

"Each essential member of the complete Trident assembly is a self-contained unit and this is true regardless of the type. In beginning the assembly of the Trident Frost-proof Meter, the first member to be inserted in the main casing is the Trident Oil-Enclosed Gear Train. Next the piston with the patent Trident thrust roller bearing is inserted in the disk chamber and the two halves of this chamber snapped together by hand. Then the measuring chamber is placed in the main casing.

The breakable bottom is then put in place, the nuts of the four T-head bolts holding it turned on by hand and then tightened with the special Trident socket wrench. The assembly is then completed from the other end by placing the improved interlocking Trident register at the top and fastening it in place by means of the register box and sealing screws. These operations are carried out with a specially designed tool provided with Trident water meters.

This great ease of assembly is due, first, to the fact that there is only one correct way of putting Trident parts together; second, because all are made to such high standards of precision that every Trident part can be used with any other part without the necessity of hand fitting.

The complete meter has been reduced to three main units, making it easy for an inexperienced person to take the meter apart and put it together again, either with the old parts or with replacement parts. Maintenance charges consist largely of labor costs and these have been reduced to a minimum in the Trident."



Ease and Simplicity of Trident Assembly
The Assembly Is Progressive and Parts Can Go Together in But One Way. Each Part Is a Unit and Interchangeable.

Frost-protected or frost-*proof*?

In considering water meters it pays to know the difference

'Most any modern water-meter is frost-protected. It has some part which breaks under extreme pressure and thereby saves the main casing and mechanism from serious damage.

But breakable parts mean expense for renewals and the inconvenience or even loss of having the meter temporarily out of service.

That's where the Lambert Frost-Proof Meter is different. Slitted brass collars used in clamping the top and bottom casings together, open under excessive pressure and allow the casing to part to any necessary extent. After freezing, the collars can be reclosed and the meter bolted anew.

No new parts are necessary, no service interruption is caused and the job can be done in a few minutes. That's real meter economy!

Write now for the Lambert Booklet N.R., chock full of sensible meter ideas. Just a postal brings your copy.

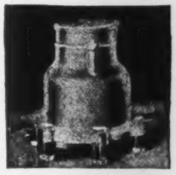
Judge for Yourself
The Quality of Hersey Water Meters

Here are the results of the last eight tests made on Hersey Disc Type Water Meters by the water commissioner of a medium sized eastern city during March 1924.

These meters had been protested by property owners and were taken from their settings and placed directly on a Mueller Meter Tester without examination.



METER No. 714,240 DATE SET, JUNE 19, 1919
1 cubic foot 5/8 inch stream weighed 63.00 pounds or 99.2% accurate
1 cubic foot 1/16 inch stream weighed 63.00 pounds or 99.2% accurate

METER No. 671,038 DATE SET, JANUARY 30, 1921
1 cubic foot 5/8 inch stream weighed 62.75 pounds or 99.6% accurate
1 cubic foot 1/16 inch stream weighed 62.50 pounds or 100% accurate

METER No. 693,007 DATE SET, NOVEMBER 27, 1916
1 cubic foot 5/8 inch stream weighed 62.50 pounds or 100% accurate
1 cubic foot 1/16 inch stream weighed 62.50 pounds or 100% accurate

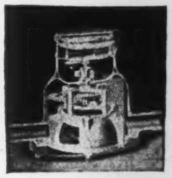
METER No. 763,210 DATE SET, JUNE 2, 1916
1 cubic foot 5/8 inch stream weighed 62.50 pounds or 100% accurate
1 cubic foot 1/16 inch stream weighed 62.50 pounds or 100% accurate

METER No. 714,343 DATE SET, AUGUST 10, 1917
1 cubic foot 5/8 inch stream weighed 62.00 pounds or 100.8% accurate
1 cubic foot 1/16 inch stream weighed 62.00 pounds or 100.8% accurate

METER No. 389,704 DATE SET, DECEMBER 28, 1918
1 cubic foot 5/8 inch stream weighed 63.00 pounds or 99.2% accurate
1 cubic foot 1/16 inch stream weighed 63.00 pounds or 99.2% accurate

METER No. 347,247 DATE SET, SEPTEMBER 17, 1917
1 cubic foot 5/8 inch stream weighed 62.00 pounds or 100.8% accurate
1 cubic foot 1/16 inch stream weighed 62.00 pounds or 100.8% accurate

METER No. 880,602 DATE SET, SEPTEMBER 15, 1921
1 cubic foot 5/8 inch stream weighed 62.50 pounds or 100% accurate
1 cubic foot 1/16 inch stream weighed 62.50 pounds or 100% accurate



These meters have been in service from 3 to 8 years under water pressure ranging from 85 to 95 pounds per square inch and show no falling off of registration accuracy.

Tests such as these prove the superiority of the Hersey Water Meter as an automatic revenue computer. Have you received our latest catalog?

Working With The Contractor

P. I. W. engineers have a wide knowledge of the construction field. Not only steel plate construction — in which they are naturally experts — but the building and general contracting fields.

That is why so many industrial engineers recommend P. I. W. Products. They know first of all what the P. I. W. hallmark means—the best engineering practice and a product of extreme long life. But added to this they know that the contractor will receive ready and intelligent co-operation from a veteran P. I. W. field force.

If your building project includes STEEL PLATE you can do no more than enlist P. I. W.

THIS No. 1100 style Toledo overhead track scale weighs molten metal in the plant of Wilson Foundry & Machine Company, Pontiac, Mich. Weights are tallied and total weights of metal run are taken off daily.

The overhead track type adapts itself to the user's operating methods; it serves convenience and efficiency, and occupies no floor space. The head is located out of the way, but where the weights can be read quickly and conveniently.

There is a Toledo scale—automatic, accurate, durable—for every weighing requirement.

Toledo Scale Company. Toledo, Ohio

"Hamilton Furniture" means efficient drafting rooms

The Hamilton line of drafting room furniture is more than mere furniture. It is the embodiment of ideas, developed by long experience, for insuring convenience and efficiency, and saving time, in the drafting room. In Hamilton equipment is included all the little niceties of better and more efficient construction that insure better service.

Hamilton Drafting Room Furniture includes drawing tables of all kinds, filing cabinets, combination tables, steel and wood sectional blue print files, folding horses and trestles, T squares, straight edges, etc., etc.

Let us send you descriptive matter.

Speed the day's work in the drafting room

AUTOMATIC MACHINERY in the shop—TYPEWRITERS and ADDING MACHINES in the office—UNIVERSAL DRAFTING MACHINES in the drawing room, heighten concentration, dispel monotony and speed the day's work.

To the man at the board, the Universal brings positive insurance against the drain of purely repetitious motions; his *entire* attention can be focused on the work in hand.

To the management it is insurance of increased output and lowered costs, for it eliminates the perfectly useless expenditure of human effort.

That this feeling is practically universal is evidenced by the tens of thousands of installations throughout the mechanical world.

Models to fit every possible condition—can we help you? Descriptive booklet upon request

Directory of Engineers

Moran, Maurice & Proctor
Consulting Engineers
Foundations for Buildings, Bridges and Dams, and all Substructure Work. Investigations, Reports, Consultations, Designs and Supervision.
New York City. 9 East 45th St.

North, Allison & Ettlinger
Consulting Engineers
City Surveyors Topographic Surveys of large tracts.
City Planning, Field Supervision Dock, Terminal Development.
Staten Isl., N. Y., Crabtree Bldg.
New York City, 112 E. 19th St.

Potter, Alexander
Consulting Engineer
Hydraulics, Sanitation, Concrete Structures. Tel. 5501 Cortlandt
New York, 50 Church Street.

Potts, Clyde
M. Am. Soc. C. E.
Consulting Sanitary Engineer
Sewerage and Sewage Disposal. Water Works and Water Supply Reports, Plans and Estimates
New York, 30 Church St.

Dwight P. Robinson & Company, Inc.
Engineers and Constructors
Industrial Plants, Power Developments, Railroad Shops and Terminals.
New York, 125 East 46th Street
Chicago, Philadelphia, Atlanta, Youngstown, Los Angeles, Montreal, Rio de Janeiro.

Robinson, Geo. L.
Consulting Engineer
Sewers, Sewage Disposal, Water Supply.
5621 Grand Central Terminal
New York.

Sanborn & Bogert
Consulting Engineers
Water Supply, Sewerage, Tunnels and Foundations. Concrete Structures.
New York 30 Church St.

Sanderson & Porter
Engineers
New York, 52 William Street.
Chicago, 72 West Adams Street
San Francisco, 14 Montgomery St.

Sears, Horace H.
Cons. Engr. and Atty. at Law
M. Am. Soc. C. E.
Legality of Bond Issues.
120 Broadway, New York City.

Allen N. Spooner & Son, Inc.
Contracting Engineers
River and Harbor Construction. Piers, Pier Sheds, Bulkheads, Foundations, Reinforced Concrete, Bridges, Caissons, Subaqueous Pipe and Cable Laying. Marine Salvaging, Divers and Special Dredging.
New York, Pier 11, North River

Seelye, Elwyn E.
Consulting Engineer
Reinforced Concrete
Structural Steel
Foundations
New York 101 Park Avenue

Steinman, Dr. D. B.
M. Am. Soc. C. E.,
M. Am. Ry. Eng. A.
Consulting & Designing Engineer
Bridges and other Structures, Engineering Projects, Designs, Supervision, Investigations, Reports, Valuations, and Advisory Service.
New York 25 Church St.

Vermeule, Cornelius C.
Consulting & Designing Engineer
Water Supply, Sewerage.
Water & Steam Power Plants.
Reports, Valuations.
New York 38 Park Row

Waddell, Dr. J. A. L.
Consulting Engineer
Steel and Reinforced Concrete Structures, Waddell's Vertical Lift Bridge, Difficult Foundations. Reports Checking of Designs, Advisory Service, and Appraisals.
New York, 150 Broadway.

Wells, James P.
Consulting Hydraulic Engineer
Water Supply, Water Power, Storage Reservoirs
Cutler Bldg., Rochester, N. Y.

Joseph H. Wallace & Co.
Consulting Industrial Engineer
Industrial and Power Plants. Hydraulic Developments — Investigations — Consultation — Reports.
New York City. Toronto.

The J. G. White Engineering Corporation
Engineers—Constructors
Oil Refineries and Pipe Lines, Steam and Water Power Plants, Transmission Systems, Hotels, Apartments, Office and Industrial Buildings, Railroads.
Reports and Appraisals.
New York 43 Exchange Place

Penna. & Ohio

Albright & Mebus
Civil and Sanitary Engineer
Sewerage, Sewage Disposal, Town Planning.
Phila., Pa., 1502 Locust St.

Barstow & McCurdy
Civil and Sanitary Engineers
E. D. Barstow G. E. McCurdy
A. LeFebre W. S. Mathews
Sewerage and Sewage Disposal. Water Supply—Municipal Engineers.
Akron, Ohio 321 Ohio Bldg.

The J. N. Chester Engrs.
J. N. Chester D. E. Davis
J. F. La Boon, J. T. Campbell
E. E. Bankson
Consulting Hydraulic, Sanitary and Valuation Engineers.
Pittsburgh, Pa., Union Bank Bldg.

Clark, Wm. G.
Civil and Sanitary Engineer
Hydraulic, Sanitary and Municipal Engineering. Power Developments. Expert Examinations and Reports.
Toledo, O. 1046 Spitzer Bldg.

Day & Zimmermann, Inc.
Engineers
Industrial Plants, Power Plants, Sub-Stations, Transmission Lines, Examinations and Reports, Valuations, Management of Public Utilities.
Philadelphia, 1600 Walnut St.
New York City Chicago.

Engineering Service Co.
Details and Designs for all types of Steel Structures. Coke and Coal Handling Plants our specialty.
New York 233 West 42nd St.
Pittsburgh, Pa. 6200 Penn Ave.

Fayette Engineering Co.
Civil, Mining and Consulting Engineers
L. C. Mechling, E. L. Zearley.
Coal, Coke Plants.
Uniontown, Pa.

Franklin & Company
Consulting Engineers
Water Supply-Sewage Disposal.
Town Planning.
Report-Valuation-Design.
Philadelphia, 906-7 Crozer Bldg.

Gannett, Seelye & Fleming, Engineers, Inc.
Engineering, Appraisals, Construction, Management.
Harrisburg, Pa. Memphis, Tenn.

Gascoigne, George B.
Consulting Sanitary Engineer
Sewerage and Sewage Disposal
Water Supply and Purification
Treatment of Industrial Wastes.
Cleveland, Leader-News Bldg.

Harrison Mertz & Emlen, Inc.
Engineering and Consulting
Sewage Disposal, Water Supply, Landscape Contracting.
Franklin Bank Building,
Philadelphia, Pa.

Morris Knowles, Inc.
Specializing in Municipal Engineering and Public Utilities. Real Estate Developments and Town Planning.
Pittsburgh Cleveland

Ledoux, J. W.
Consulting Engineer
Water Works, Water Power, Power Plants, Reports, Designs, Construction Supervision, Valuation, Arbitration, Rate Schedules.
Phila., Pa. 112 North Broad St.

Miller, H. B.
Mining Engineer & Geologist
Coal land examinations and reports. Properties prospected Surveys and Maps of all kinds Over twenty years' experience Penna., Ohio, W. Va. and Ky.
Oliver Bldg., Pittsburgh, Pa.

W. E. Moore & Co.
Engineers
Reports, Designs and Supervision of Public Service Properties. Industrial Plant Installations. Electric Furnace Design and Applications.
Pittsburgh Pa., Union Bank Bldg.

Quimby, Henry H.
Consulting Bridge Engineer
Philadelphia, 3920 Girard Ave.

Rudd, William C.
Consulting Engineer
Water Works, Power Plants, Heating Plants.
307 Hazen Bldg., 906 Main St., Cincinnati, Ohio.

Scofield Engineering Co.
Consulting, Designing, Supervising Engineers
Philadelphia Pennsylvania

The Triangle Engineering Company
Engineers
Mill and Mine Machinery and Equipment, Installation and Erection. Zanesville, O., 14 Schultz Opera Blk.

Watson Company, The
Architects-Engineers
Warehouses,
Commercial Buildings,
Engineering Structures.
Cleveland, 4614 Prospect Ave.

The W. G. Wilkins Co.
Engineers and Architects
Railroads, Buildings, Manufacturing Plants, Coal and Coke Plants, Water Works and Sewerage. Examinations and Reports.
Pittsburgh, Pa. Westinghouse Building.

Professional Cards
In this paper offer highly appropriate type of publicity for the services of professional men in the Engineering and Construction field.

Directory of Engineers

Illinois

Alvord, Burdick & Howson
John W. Alvord—Charles B. Burdick—Louis R. Howson
Engineers for
Water Works.
Water Purification.
Flood Relief.
Sewerage.
Sewage Disposal.
Drainage.
Appraisals.
Power Generation.
Chicago Hartford Bldg.

Battey & Kipp
Incorporated—*Engineers*
Design and Construction, Complete Industrial Plants. Power Plants and Electrical Installations. Engineering Reports, Analyses and Appraisals.
Chicago, 123 W. Madison St.

Byllesby Engineering & Management Corp.

Chicago, 208 S. La Salle Street
New York Tacoma

Condron Company
Theodore L. Condron, M. Am. Soc. C. E.
Chester L. Post, M. Soc. C. E.
Consulting Engineers
Bridges, Buildings, Foundation
Chicago, Monadnock Buildings.

L. F. Harza
Hydro-electric and Hydraulic Engineer
Monadnock Bldg., Chicago.

Kelker, De Leuw & Co.
Consulting Engineers
Chicago. Conway Building

Maury & Gordon
Dabney H. Maury,
Fred. G. Gordon,
Consulting Engineers
Water Works, Sewerage
Power Plants, Appraisals.
Chicago, 1445 Monadnock Block.

Pearse, Greeley & Hansen
Hydraulic & Sanitary Engineers
Reports, Designs, Supervision, Appraisals, Water Supply, Sewerage, Water Purification, Sewage Treatment, Refuse Disposal.
Chicago, Ill. 6 N. Michigan Ave.
J. ALBERT HOLMES,
Specialist in Earth Analysis and Earth Dams.

Stern, I. F.
Consulting Engineer
Bridges, Buildings and other Structures, Engineering Projects. Design, Supervision, Investigation, Reports, Valuations, Advisory Service.
Chicago, Ill., First Nat'l Bk. Bldg.

The Strauss Bascule Bridge Company
Consulting Engineers
Movable and Fixed Bridges. Specialists in Trunnion Bascule and Direct Lift Bridges.
Chicago, 225 N. Michigan Ave.

Central West

Burns & McDonnell Eng. Co. *Consulting Engineers*
Appraisals, Rate Investigations, Expert Testimony, Water Works, Sewerage, Lighting. Interstate Bldg., Kansas City, Mo. Marsh-Strong Bldg., Los Angeles, Calif.

Black & Veatch
Consulting Engineers
Sewerage, Sewage Disposal, Water Supply, Water Purification, Electric Lighting, Power Plants, Valuations, Special Investigations and Reports.
E. B. Black N. T. Veatch, Jr.
A. P. Learned J. F. Brown
E.H. Dunmire F. M. Veatch
Kansas City, Mo., Mutual Building.

Fargo Engineering Co.
Consulting Engineers
Hydro-Electric and Steam Plants
Difficult Dam Foundations.
Jackson, Michigan.

Federal Engineering Co.
Civil & Architectural Engineers
Designers and Superintendents Buildings and Industrial Plants.
Milwaukee, Wis., 218 - 219 Stephenson Building.

Edward Flad & Co.
Engineers
Plans, Valuations, Reports, Water Supply, Sewerage, Industrial and Power Plants, Bridges, Buildings, etc.
St. Louis, Mo., Chemical Bldg.

Harrington, Howard and Ash *Consulting Engineers*
Bridges and other structures of steel and reinforced concrete. Advisory services in municipal problems. Appraisals. Kansas City, Mo., 1012 Baltimore Ave.

Hubbell, Hartgering & Roth *Consulting Engineers.*
Water Supply, Sewerage, Sewage Disposal and Municipal Engineering.
2348 Penobscot Building,
Detroit, Mich.

Charles H. Hurd
Consulting Engineer
Water Supply and Purification.
Sewerage and Sewage Disposal.
Hydraulic Developments.
Merchants Bk. Bldg., Indianapolis

Indianapolis Paving Laboratory
Consulting and Inspection Engineers
Pavements and Paving Materials.
Indianapolis, 3610 Guilford Ave.

Kiersted & Stringfellow
Consulting Engineers
611 Interstate Bldg.
Kansas City, Mo.

Kirchoffer, William Gray
Sanitary & Hydraulic Engineer
Under-ground Water Supplies. Design of High Efficiency Air Lift Pumps. New Efficient Process of Sewage Disposal
Madison, Wisconsin.

Luten, Daniel B.
Designing and Consulting Engineer
Reinforced Concrete Bridges exclusively.
Associate Engineers in each state
Indianapolis, Ind.

Meyer, Adolph F.
M. Am. Soc. C. E. & M. E.
Consulting Hydraulic Engineer
Minneapolis, 628 Met. Bk. Bldg.

Mullergren, Arthur L.
Consulting Engineer
Specialist in Electric, Light, Power and Water Pumping.
Kansas City, Mo., 555 Gates Building.

Shenehon, Francis C.
M. Am. Inst. Cons. Engrs.
M. Am. Soc. C. E.
Hydraulic Engineer
839 Metropolitan Bank Bldg.,
Minneapolis, Minn.

Smith & Co., C. E.
Consulting Engineers
Appraisals, Expert Testimony, Bridges, Electrification, Foundations, Highways, Docks, Water Supply, Flood Protection.
St. Louis, Mo., 2073 Railway Exchange.

Spooner & Merrill
Consulting Engineers
Utility and Industrial Reports. Design, Supervision, Appraisals
Grand Rapids, Mich. Powers Bldg.
with
G. H. KNUTSON Financial Engr.
Chicago, Ill. Harris Trust Bldg.

Turner, C. A. P.
Consulting Engineer
M. Am Soc. C. E., Reinforced Concrete and Structural Steel Bridges, Buildings and Manufacturing Plants.
Minneapolis, Minn., 300 Builders Exchange Bldg.

Williams, Gardner S.
M. Am. Inst. Cons. Engr.
M. Am. Soc. C. E.
Consulting Engineer
Hydraulic Investigations, Water Power Developments, Water Supply Systems, Reports, Appraisals. Ann Arbor, Michigan.

South & West

Bennett, Howard D.
Consulting & Contracting Eng'r.
Dredges of all types Designed and Built for every service Municipal Fire, Ice and Ferry Boats, Harbor and Terminal Development. Plans, Specifications, Reports, Etc.
Baltimore, Md. 2114 Allendale St.

Billingsley, James W.
Preliminary Investigations, Detailed Plans, and Construction Supervision. For Industrial Developments, Docks, Roads, Bridges, Drainage and Municipal Improvements.
New Orleans, Louisiana.

Black, McKenney & Stewart
Engineers
W. M. Black,
Maj. Gen. U. S. A. Retired.
Charles A. McKenney.
John Stewart.
River and Harbor—
Port and Terminal Work.
Hydro-Electric Development.
Municipal and
Highway Engineering.
Consulting — Organization — Administration.
1653 Pennsylvania Ave., N.W.
Washington, D. C.

Kaltenbach Brothers
Civil and Architectural Engrs.
Industrial, Office and Public Buildings. Bridges, Roads, Streets and Municipal Improvements. Tests, Investigations and Reports. Land and Mine Surveys.
Wheeling, W. Va., Bd. of Trade Bldg.

The Morgan Engineering Companies
Hydraulic Engineers
Flood Prevention—Irrigation—Drainage—Power Development.
Memphis, Dayton.

Powell, Robert E.
Member S. A. E.
Consulting Engineer,
Motor Transportation.
Motor Railroad Lines, Terminals Municipal Motor Lines, Establishment of Express Lines, Bus Lines, Transportation Problems, Estimates, Standardization and Cost Accounting.
Onancock, Accomack County, Va.

Quinton, Code & Hill
J. H. Quinton—W. H. Code—L. C. Hill, Members Am. Soc. C. E.
Investigation — Design — Supervision — Irrigation — Reclamation—Water Supply, Storage & Hydro-Electric Works.
Los Angeles, Cal., 606 S. Hill St.

Consulting Engineer
Irrigation, Power, Water Supply and Purification, Sewerage and Sewage Disposal, Reports, Estimates, Valuations and Appraisals.
Vancouver, B.C. 901 Rogers Bldg.

Schools & Colleges

Clarkson College of Technology

Courses leading to the degrees of Bachelor of Science in Chemical, Civil, Electrical and Mechanical Engineering.

Catalog upon application.

Potsdam, N. Y.

College of Engineering

Northwestern University

Five years of broad, thorough training; small classes, in which each student receives individual attention from head professors. Unsurpassed opportunities to see great engineering projects and meet engineers.
A young thriving College in an old University.
Write for "Best Preparation for Engineering" and "Booklet of Views."
John F. Hayford, Director.
Evanston, Ill., Swift Hall.

George Washington University

College of Engineering
Washington, D. C.

Chemical, Civil, Electrical and Mechanical Engineering and Architecture. Full day and late afternoon courses.

For information, address:
Dean, College of Engineering,
George Washington University,
Washington, D. C.

College of Engineering

Courses in Civil, Mechanical, Electrical, Sanitary, Municipal, Chemical Engineering. Short course in Structural Drafting.

Enter any time. No matriculation or registration fees. Expenses ¼ to ½ less than at other first-class schools. School year—Four quarters of 12 weeks each.

Length of Courses 120 Weeks. Save one year and $1000.

Experienced Instructors. Splendid Laboratories.

For catalog, bulletins or information address: Albert Edwin Smith, President, Ohio Northern University, Ada, Ohio.

Norwich University

(Founded 1819)

The Military College of Vermont. Academic Courses in Civil and Electrical Engineering. Address Prof. H. R. Roberts.

Northfield, Vermont.

New York University College of Engineering

Civil, Mechanical, Chemical, Industrial and Electrical Engineering.
For information address Chas. Henry Snow, Dean.
University Heights, New York.

Other Engineering Colleges

find this advertising desirable publicity. Why can it not serve you too?

Inspecting & Testing Engineers

Electrical Testing Laboratories

Electrical, Photometrical and Physical Tests. Inspection and Tests of Electrical and Engineering Materials. Main Office and Laboratories. New York, 80th St. and East End Ave.

Robert W. Hunt Co.

Bureau of Inspection, Tests and Consultation

Chicago, New York, Pittsburgh, St. Louis, San Francisco, Seattle, Montreal, London.

New York Testing Laboratories

Chemical & Physical Tests, Microscopical Examinations
Electrical Tests, Power Plant Tests, Expert Inspections Cities and Industries. New York City, 80 Washington St.

New Cards, Changes of Copy, Correction or Cancellations

Effective with the first issue of month following receipt.

Advertising

As a builder of prestige and business standing is unquestioned. It is an immeasurable power in influencing new business and retaining good-will.

Professional Cards

In this paper offer highly appropriate type of publicity for the services of professional men in the Enigneering and Construction field.

Your Card

should appear in this directory regularly. If it is not there now—

ATLANTA, CHICAGO, CLEVELAND, KANSAS CITY, LONG ISLAND CITY, SAN FRANCISCO
MADE IN U.S.A.

Columbia Hot Shot Batteries contain 4, 5 or 6 Columbia Ignitors in series in a neat, waterproof steel case.

Fahnestock Spring Clip Binding Posts on Columbia Ignitor at no extra cost to you.

Ignition Service Everywhere

for

- —Gas engine ignition
- —Tractor ignition
- —Starting Fords
- —Firing blasts
- —Heat regulators
- —Doorbells
- —Buzzers
- —Ringing burglar alarms
- —Protecting bank vaults
- —Calling Pullman porters
- —Motor boat ignition
- —Telephone and telegraph
- —Lighting tents and outbuildings
- —Electric clocks
- —Running toys
- —Radio "A"

CRACKLING hot sparks in the cylinder—putt-putt-putt says the engine as it turns the concrete mixer or air compressor.

Columbia Hot Shot hits hard in all weathers. This very minute in every State it is helping dig ditches, run roads, build buildings. Its power gives new push to pistons. Construction thrives where Columbias run engines, fire blasts, operate telephones, ring bells and buzz buzzers.

No matter where the job, there is a Columbia dealer nearby. Any hardware, electrical shop or general store can fix you up with new strong-arm Columbias.

Columbia Dry Batteries are sold by electrical, hardware, radio and auto accessory shops, marine supply dealers, implement dealers, garages, general stores. Insist upon Columbias.

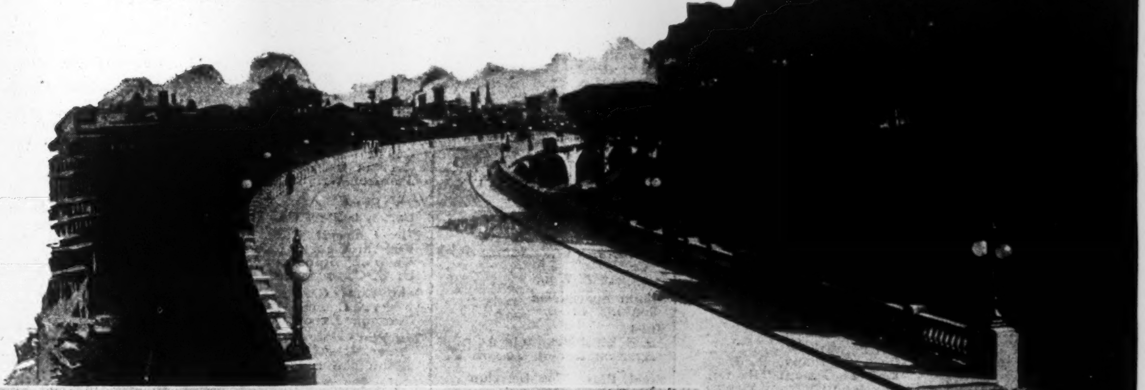
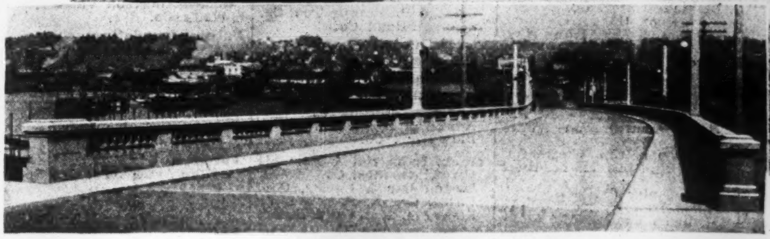
Bingamon Street Bridge, Reading, Pa., crossing the Schuylkill.
Designed by C. F. Sanders, County Engineer, Berks County, Pa.





Bridge at Olympia, Wash. Elastite Expansion Joint used.

Protecting great bridges against temperature

TEMPERATURE fluctuation, and the consequent expanding and contracting of these great concrete masses, are rendered harmless to the durability of big bridges and viaducts by the installation of Elastite Expansion Joint at regular intervals.

The fact that Elastite Expansion Joint, "the sandwich joint," is handled as a slab, in any dimension and thickness, makes installation comparatively simple and easy. It is the practical joint used exclusively by practical engineers and contractors. It is easily cut to shape with an old saw, or can be supplied cut to exact fit to meet your requirements.

When you need "joint," remember that there are big stocks of Elastite Expansion Joint in seventeen cities. Your order will be immediately shipped to your job from the nearest point. Send for sample and all the facts.

THE PHILIP CAREY COMPANY
18 Wayne Ave., Lockland, Cincinnati, Ohio

Carey Elastite Expansion Joint is used in these bridges and viaducts

Akron Ohio	North Hill Viaduct
Augusta, Ga.	Archibald W. Butts Memorial Bridge
Bethlehem, Pa.	Hill-to-Hill Bridge
Cincinnati, Ohio	Park Avenue Bridge
Fort Wayne, Ind.	Harrison Street Bridge
Galveston, Texas	Galveston Causeway
Hawkinsville, Ga.	Ocmulgee River Bridge
Kansas City, Mo.	Benton Boulevard Viaduct
Little Rock, Ark.	Broadway Bridge
Oahu, Hawaii	Heeia Viaduct
Pulaski, New York	Salmon River Bridge
Reading, Pa.	Bingamon Street Bridge
St. Louis, Mo.	Chauteau Avenue Viaduct
St. Louis, Mo.	Jefferson Avenue Bridge
Laredo, Texas	Laredo International Bridge
Washington, D. C.	Key Bridge
Watertown, New York	Grove Street Bridge

EXPANSION
JOINT
PROVED AND
ACCEPTED

Carey Elastite Expansion Joint is an asphaltic body, formed of a high-grade asphaltic compound carefully refined and tempered, sandwiched between two walls of asphalt-saturated felt forming an elastic, compressible joint. It is made in lengths, widths and thicknesses as required, can be cut to crown or to any special shape and comes to the job ready to use.

Every step in the making under the control of Vulcan Experts

Kilns have become pieces of machinery, requiring thoughtful engineering and superior workmanship.

Every stage of VULCAN Rotary Kiln manufacture is controlled right in the VULCAN plant. We have our own steel foundry. The design of shell, method of reinforcing and riveting, plan of tires, equalizing cradles, driving gear, firing hood—all are typically VULCAN, tried and tested through years of successful experience with well-known installations.

When properly designed, built, equipped and operated, Rotary Kilns have a wide field of industrial usefulness—legitimately supplanting hand labor and old mechanical devices everywhere. Not only in the manufacture of Portland cement, but in a thousand other processes as well!

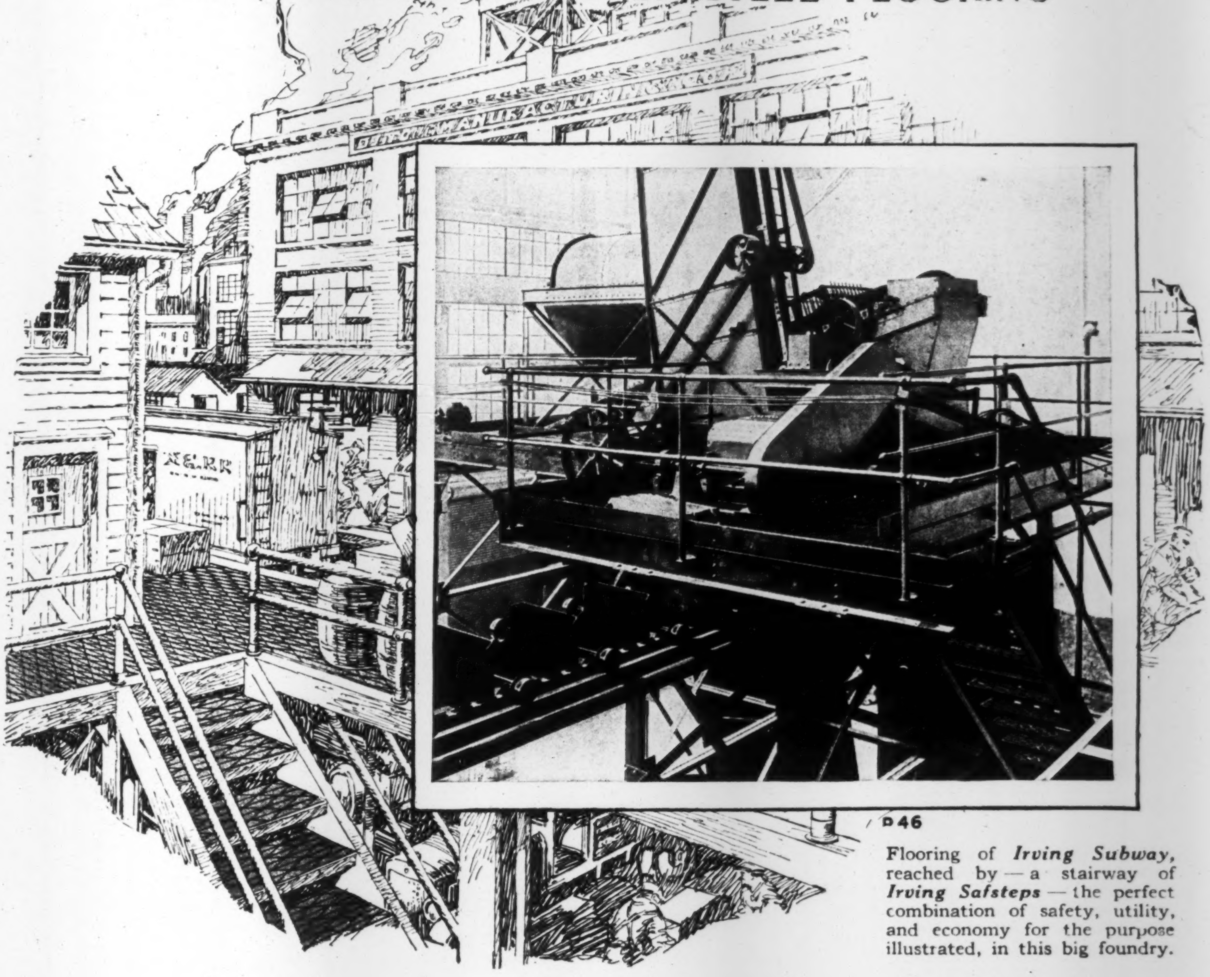
IRVING SUBWAY

PATENTED REG. U.S. PAT. OFF.

THE NON-SLIPPING OPEN STEEL FLOORING



Flooring of *Irving Subway*, reached by — a stairway of *Irving Safsteps* — the perfect combination of safety, utility, and economy for the purpose illustrated, in this big foundry.

On a hard, cold, dollar-and-cents basis—the cost per square foot per year of service—***Irving Subway*** is the cheapest flooring you can use, anywhere, for any industrial purpose—except where a solid floor is absolutely needed. When you build for permanence and seek a flooring that has every quality making for underfoot safety and comfort and efficiency, plus economy, ***Subway***—and ***Safsteps*** for the stairs—is the thing to use.

There's probably not an industry in America which isn't, somewhere, using ***Subway*** and ***Safsteps*** to advantage. And, to the millions of square feet of ***Subway*** and the thousands of ***Safsteps*** already installed, will be added more millions and more thousands, as the engineering and industrial world comes to a better appreciation of the unmatched, and unmatchable, superiorities of this all-steel open safety flooring. We want to send you Catalog 4A-5.

IRVING IRON WORKS CO.

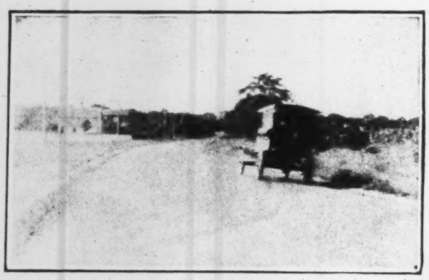
LONG ISLAND CITY, N.Y. U.S.A.

LONG ISLAND'S

FAMOUS OILED ROADS

Are treated with

A section of the highway between Watermill and Southampton, L. I., which has been treated with TEXACO Road Oil.



View of the well-known Merrick Road on Long Island. Note the smoothness of the TEXACO oiled surface.

American Road Builders in all sections are talking of the marvelous TEXACO oiled roads of Long Island, N. Y.

Federal, State, County and City engineers are discussing the results which Long Island has obtained. Many highway officials and administrators are planning to follow the methods so successfully pursued by Long Island for the past several years.

We are proud that TEXACO Asphaltic Road Oil has rendered such service to Long Island.

Call on any office of the Texas Company, Asphalt Sales Department, for information on how Long Island has used TEXACO Road Oil to such advantage.
